Toolkit for Rural Community Coordinated

Transportation Services Transit Cooperative Research Program, 2004 TRB's Transit Cooperative Research Program (TCRP) Report 101: Toolkit for Rural Community Coordinated Transportation Services examines strategies and practices used to coordinate rural transportation services, and identifies model processes used for local coordination efforts in rural communities. A stand-alone executive summary of the report provides information, instructions, and lessons learned from rural communities that have implemented coordinated transportation services--Publisher's description.

Economic Benefits of Coordinating Human Service

Transportation and Transit Services Jon E. Burkhardt, Transit Cooperative Research Program, 2003 Examines the net economic benefits associated with various strategies and practices for coordinating human service transportation and general public transit, provides quantitative estimates for these strategies and practices, and identifies innovative and promising coordination strategies and practices.

Introduction to Senior Transportation Helen K.

Kerschner, Nina M. Silverstein, 2018-01-31 Introduction to Senior Transportation focuses on an issue that is a growing concern—the community mobility needs of older adults. Surpassing the coverage available in existing gerontology textbooks, it enables the reader to understand and appreciate the challenges faced by older adults as they make the transition from driving to using transportation options (many of which were not designed to meet their particular needs). It considers the physical and cognitive limitations of older adult passengers, the family of transportation services, the challenges providers face in meeting the assistance and support needs of senior passengers, and the transportation methods that do and do not currently meet the needs and wants of senior passengers. This textbook addresses the educational and

professional development needs of faculty, students, and practitioners working in the fields of aging, aging services, and transportation. The book has been class-tested and features innovative, practical learning tools that appeal to students and practitioners. It complements any introductory course in gerontology, human development and aging, or human factors, and will enhance the curriculum of programs in the social behavioral sciences as well as traffic safety, transit engineering, and community planning.

Exploring Data and Metrics of Value at the Intersection of Health Care and Transportation National Academies of Sciences, Engineering, and Medicine,Transportation Research Board,Health and Medicine Division,Board on Population Health and Public Health Practice,2016-11-28 Evidence from the public health sector demonstrates that health care is only one of the determinants of health, which also include genes, behavior, social factors, and the built environment. These contextual elements are key to understanding why health care organizations are motivated to focus beyond their walls and to consider and respond in unprecedented ways to the social needs of patients, including transportation needs. In June 2016 the National Academies of Sciences, Engineering, and Medicine held a joint workshop to explore partnerships, data, and measurement at the intersection of the health care and transportation sectors. This publication summarizes the presentations and discussions from the workshop.

Ride Andrea Lyn Taylor,2019 We all get a life and we all have a choice of how to ride that life. When her son Dylan decided to get off his ride via suicide it threw Andrea well off her own ride and she landed with a massive thud that took her fully into the now. Ride is the true story of understanding the feelings of loss and pain the suicide brought and the finding of peace, acceptance

and trust in Dylan's decision. It is a ride of connection to self, to spirit, to nature and how those connections can create peace. Not just in times like Andrea experienced but in anyone's life - anytime. Ride speaks of listening, hearing, being human, self-love, self-enquiry, of conscious grieving, stillness and being present in the moment even when those moments may threaten to overwhelm. There is a lot of power in grief and Ride is about recognising and using that power and allowing time to be aware as the defining of a new way of life unfolds. Ride is Andrea's ongoing connection with Dylan in spirit and the way he supports her in accepting his decision as well as riding with her on a host of magical and joyful adventures. Ride considers some of the possible reasons we have such high suicide rates in NZ - the highest in the world for males of Dylan's age--Back cover.

Improving Public Transit Options for Older Persons Jon E. Burkhardt, Adam T. McGavock, Charles A. Nelson, C. G. B. New Public Governance Douglas Morgan, Brian Cook, 2015-01-28 Written by scholars who have been at the forefront of the NPG debate as well as by scholar-practitioners, this book provides lessons learned from experience on how networked, contract-based and partnership-centered approaches

to government can be undertaken in ways that preserve the values at the center of the American constitutional and political system.

New Public Leadership Douglas F. Morgan, Marcus D. Ingle, Craig W. Shinn, 2018-09-03 Most leadership literature stems from and focuses on the private sector, emphasizing personal qualities that bind leaders and followers to a shared purpose. As the authors of *New Public Leadership* argue, if these shared purposes do not build trust and legitimacy in public institutions, such traditional leadership tropes fall short of the standard demanded by contemporary public servants.? For twenty years the authors have been developing a leadership education and training framework specifically designed to encourage public service professionals to 'lead from where they sit.' This book presents that comprehensive, integrated, and practical leadership framework, grounded in the uniqueness of public legal missions, culture, history and values. The authors explore three key elements of leadership success: 1) an understanding of our public service context, including the history, the values and the institutions that comprise our leadership setting, 2) a set of tools designed to help leaders initiate collective action in wicked challenge settings, and 3) tools to support sound judgment, enabling leaders to do the right thing in the right circumstances for the right reasons. The authors further provide readers with a basic understanding of democratic institutions, encouraging them to work within and across multiple vertical and horizontal systems of authority.? The book is organized into four sections, each of which is accompanied by a Master Case that provides the reader with an opportunity to apply the principles and leadership tools discussed in the text to practice. To further reinforce the practice-centered approach to leadership knowledge and skills, the authors have developed an accompanying EMERGE Leadership Handbook, complete with exercises, available online.? Written specifically with the practicing public manager in mind,

this book arms public servants with a large repertoire of leadership skills, designed to accommodate changing public values and conflicting priorities at all levels of our public organizations.

Connected Riding Peggy Cummings,Diana

Deterding,2013-12 Connected Riding: An Introduction can be your first step to dancing with your horse. Based on biomechanics of movement, Connected Riding teaches riders to synchronize their movements with those of their horses to create more ease and better performance. In this book, you'll learn how to influence the horse's movement through an effective position and an elastic connection, allowing you to let go of compressive, energy-draining techniques. If your riding has become stressful, painful, frustrating or stuck, Connected Riding can help you, because it will restore motion, life and partnership to your riding; a method for all disciplines and all levels of riding!

Public Roads ,2006

Connect with Your Horse from the Ground Up Peggy

Cummings,Bobbie Lieberman,2011 Introducing a new approach to specialized groundwork for horse training, this guide provides more than two dozen exercises to help horses and their handlers find a reciprocal connection on the ground before the rider takes a position in the saddle. These exercises--done both standing still and in motion--are shown to drastically change the way a rider sees and feels about the horse, and immediately improve how the horse moves, responds, and works. Aspiring to the ideals of lightness and ease promoted by top riding instructors and classical texts, the exercises found in this manual help handlers achieve the goals of discipline and joy that they have for their horses--leaving behind the mechanical, stiff movements that inhibit horses from expressing their innate curiosity, trust, and

freedom of motion.

Integration of Paratransit and Fixed-route Transit Services

Richard Weiner, Transit Cooperative Research Program, 2008
TRB's Transit Cooperative Research Program (TCRP) Synthesis 76: Integration of Paratransit and Fixed-Route Transit Services explores the experiences of transit agencies that have attempted to depart from the traditional binary model of separate fixed-route and paratransit services by seeking a variety of ways to integrate their services. Options examined in the report include the provision of paratransit feeder services, community bus or circulators, connectors, fixed-route fare incentives, and route deviation--Publisher's description

The New Anatomy of Rider Connection Mary Wanless, 2017-08

Modern rider biomechanics begins by explaining fascia--the Cinderella of body tissues. Until recently, fascia was ignored by science, consigned to its apparent role as the body's packing material. However, research now shows that, in reality, this biological fabric is what links muscles into functional chains. In this eye-opening book, rider biomechanics pioneer Mary Wanless explores the characteristics of the body's fascia and why understanding how it works not only improves a rider's balance and coordination, but also enhances feel, since fascia contains many more sensory nerves than muscles. These register the forces that pull on an area, and thus a fascial net under tension creates a wellspring of strength and sensation. By learning to access and rebalance your own fascial net, your stability, skill, and feel will be significantly improved, helping you become a quieter, more effective rider.--

The Relationship Ride Julia B Colwell, 2019-04-02 Dr. Julia

Colwell does not buy into the cultural belief that the initial bliss of falling in love will inevitably end. In *The Relationship Ride* she takes the reader on a voyage of exploration that debunks common myths of what couples should settle for, and gives us the maps, tools, and exercises to ride the initial bliss into a long-term

relationship of growth and mutual joy. Traveling this route, she tells us, is available to anyone who is willing to go there.
