Marketing and Promoting Electronic Resources Eleonora I. Dubicki,2013-10-18 Technological advances allow libraries to more readily serve patrons' needs. But how can a librarian effectively communicate what services libraries offer? Marketing and Promoting Electronic Resources: Creating the E-Buzz! explains the foundations of marketing and promotion, focusing on practical and creative techniques that have worked in academic, public, and special libraries. Respected authorities from various libraries offer their insights and advice for effective marketing strategies for electronic resources such as e-serials, databases, and e-books, helping library patrons to better understand the resources now available to them. This book provides librarians with practical suggestions on how to best let their patrons know about the available e-resources and instruct them on how to use them effectively. Librarians in any type of library setting, even if previously unschooled in marketing campaigns, can find fresh ideas to apply in their own setting. This invaluable tool discusses in detail how to develop a marketing plan, create and finance a promotional campaign, and how to use new technologies to reach out to your library patrons in the most effective way to promote your e-resources. This material was published as a special issue of The Serials Librarian.

 New Avenues for Electronic Publishing in the Age of Infinite Collections and Citizen Science: Scale, Openness and Trust B. Schmidt,M. Dobreva,2015-09-03 Research and scholarly communication is increasingly seen in the light of open science, making research processes and results more accessible and collaborative. This brings with it the chance to better connect research and society by introducing new avenues for engagement with citizens. This book presents the proceedings of the 19th International Conference on Electronic Publishing (Elpub), held in Valetta, Malta, in September 2015. This year's conference explores the interplay of two dimensions of electronic publishing – the ever growing volume of digital collections and the improved understanding of the widest user group, citizens. This exciting theme encompasses human, cultural, economic, social, technological, legal, policy-related, commercial, and other relevant aspects. Echoing the conference agenda, the book covers a wide range of topics, including engagement with citizens and professionals, enhanced publishing and new paradigms, discovery and digital libraries, open access and open science, as well as the use and reuse of data. Addressing the most recent developments in these areas, the book will be of interest to practitioners, researchers and students in information science, as well as users of electronic publishing.

 Machine Learning for Indoor Localization and Navigation Saideep Tiku,Sudeep Pasricha,2023-06-29 While GPS is the de-facto solution for outdoor positioning with a clear sky view, there is no prevailing technology for GPS-deprived areas, including dense city centers, urban canyons, buildings and other covered structures, and subterranean facilities such as underground mines, where GPS signals are severely attenuated or totally blocked. As an alternative to GPS for the outdoors, indoor localization using machine learning is an emerging embedded and Internet of Things (IoT) application domain that is poised to reinvent the way we navigate in various indoor environments. This book discusses advances in the applications of machine learning that enable the localization and navigation of humans, robots, and vehicles in GPS-deficient environments. The book explores key challenges in the domain, such as mobile device resource limitations, device heterogeneity, environmental uncertainties, wireless signal variations, and security vulnerabilities. Countering these challenges can improve the accuracy, reliability, predictability, and energy-efficiency of indoor localization and navigation. The book identifies severalnovel energy-efficient, real-time, and robust indoor localization techniques that utilize emerging deep machine learning and statistical techniques to address the challenges for indoor localization and navigation. In particular, the book: Provides comprehensive coverage of the application of machine learning to the domain of indoor localization; Presents techniques to adapt and optimize machine learning models for fast, energy-efficient indoor localization; Covers design and deployment of indoor localization frameworks on mobile, IoT, and embedded devices in real conditions.

 Advances in Geoscience and Remote Sensing Gary Jedlovec,2009-10-01 Remote sensing is the acquisition of information of an object or phenomenon, by the use of either recording or real-time sensing device(s), that is not in physical or intimate contact with the object (such as by way of aircraft, spacecraft, satellite, buoy, or ship). In practice, remote sensing is the stand-off collection through the use of a variety of devices for gathering information on a given object or area. Human existence is dependent on our ability to understand, utilize, manage and maintain the environment we live in - Geoscience is the science that seeks to achieve these goals. This book is a collection of contributions from world-class scientists, engineers and educators engaged in the fields of geoscience and remote sensing.

 Marketing and Managing Electronic Reserves Trevor A. Dawes,2013-05-13 Get practical solutions to the problems faced when implementing an electronic reserve service! Academic libraries that provide electronic reserve services offer convenient access to information to their students and faculty while gaining numerous other advantages, such as reducing both loss and staff workload. Marketing and Managing Electronic Reserves presents leading authorities with practical solutions to the challenges in effectively integrating electronic reserves services and marketing them to users. This book provides positive approaches that any academic library considering the implementation of an electronic reserve operation can use. All factors are considered, including size of institution, the relationship between the library

and academic departments, and the budget and plan for marketing the service. More and more colleges and universities are implementing distance education programs, highlighting the increasing need for remote access to information in the library, including reserve material. But executing monumental change is always difficult. Marketing and Managing Electronic Reserves tackles the difficult issues, discussing various libraries' journeys in bringing about the changes needed to remain the central information source for students and faculty. Problems inherent in the evolution from traditional reserve services to electronic reserves are examined, offering effective strategies for smooth transition. Whatever type of system you are considering, from homegrown to commercial to hybrid electronic reserves service, this book can help. Marketing and Managing Electronic Reserves explains how others tackled challenges, such as: implementing Endeavor's Voyager Integrated Library System and the software used for authenticating users handling copyright compliance integration of electronic reserves into course management systems moving from a paper-based to a Web-based course reserve system offering and marketing one-stop teaching support to faculty a large institution's shift to a collaborative approach with electronic reserves and course management software establishing a suite of electronic utilities that fulfills teaching and essential learning activities implementing the Blackboard Content System marketing for a smooth transition from traditional to electronic reserves marketing to the faculty process improvement technique applied to electronic reserves integration of electronic reserve with a Library Management System and Course Management System trends for the future Marketing and Managing Electronic Reserves is crucial reading for access services librarians, circulation and reserve librarians, public service librarians, library school faculty who teach public services courses, integrated library systems managers, and university course management software specialists.

Computers in Libraries Katie Wilson,2006-05-25 Keep pace with the constant technological changes you face every day as a library technician Computers in Libraries examines the impact of integrated library management systems, digital resources, and the Internet on the functions and operations of library technicians and assistants. The book provides a practical understanding of library system software, networks, online information and access, portals, open URL linking, and the fusion of digital and print collections. Each chapter opens with definitions of the most commonly used terms and closes with review questions for classroom use, making it equally valuable as a textbook and as a professional resource for updating work skills. The roles of library technicians and assistants have changed dramatically in the past twenty years as computers have transformed every area of day-to-day library operations. And nowhere have those changes been more obvious than when dealing with online data that hasn't undergone the same quality control and selection processes traditionally used with library resources. As ordering and cataloging processes have been streamlined, and reference and research services have been turned into twenty-four hour help centers, Computers in Libraries is a practical guide to keeping pace with the changes you face—every day, in every aspect of your work. Computers in Libraries examines: how computers work Internet protocols and applications integrated management system structure and administration acquisitions financial management online cataloging standards circulation parameters and policies course reserves serials control the Online Public Access Catalog (OPAC) resource sharing standards searching online databases creating online content digital libraries and electronic publishing bibliographic standards and practices Computers in Libraries is an important resource for library professionals striving to stay a step ahead in their field and for students who will need to be up to speed on the technological aspects of

library work.

⊞ Geographical and Fingerprinting Data for Positioning and Navigation Systems Jordi Conesa,Antoni P⊠rez-Navarro,Joaquin Torres-Sospedra,Raul Montoliu,2018-10-06 Geographical and Fingerprinting Data for Positioning and Navigation Systems: Challenges, Experiences and Technology Roadmap explores the state-of-the-art software tools and innovative strategies to provide better understanding of positioning and navigation in indoor environments using fingerprinting techniques. The book provides the different problems and challenges of indoor positioning and navigation services and shows how fingerprinting can be used to address such necessities. This advanced publication provides the useful references educational institutions, industry, academic researchers, professionals, developers and practitioners need to apply, evaluate and reproduce this book's contributions. The readers will learn how to apply the necessary infrastructure to provide fingerprinting services and scalable environments to deal with fingerprint data. Provides the current state of fingerprinting for indoor positioning and navigation, along with its challenges and achievements Presents solutions for using WIFI signals to position and navigate in indoor environments Covers solutions for using the magnetic field to position and navigate in indoor environments Contains solutions of a modular positioning system as a solution for seamless positioning Analyzes geographical and fingerprint data in order to provide indoor/outdoor location and navigation systems

⊞ Electronic Government and the Information Systems Perspective Kim Normann Andersen,Enrico Francesconi,Ake Gr⊠nlund,Tom M van Engers,2010-08-17 In front of you are the proceedings of the First International Conference on Electronic Government and Information Systems Perspective, EGOVIS. This conference builts on the tradition of its predecessors, the Electronic Government Conferences (EGOV) under the DEXA umbrella, which have been ongoing for nine years, but it also - cluded some innovations. In view of the large number of electronic government c- ferences, we found it important to focus the scope of the conference a little and to increase the quality requirements. Hence this year's conference featured a tougher review process and a smaller set of accepted papers. As a result, these proceedings contain the very best papers of 2010 covering various important aspects of electronic government and information systems used in the public sector. With an acceptance rate of less than 20% EGOVIS belongs to the top ten conferences in the world. The Program Committee accepted 13 full papers and 11 short papers, covering the most recent research trends in electronic government implementations, such as ICT for eGovernment services and monitoring, knowledge and content management systems for temporal and geo-spatial applications, interoperability for electronic government integrated architectures, decision and support tools for eDemocracy and direct parti- pation of citizens in the policy-making strategies, and Web 2.0 and 3.0 approaches for collaborative and transparent public sector services.

⊞ The Kovacs Guide to Electronic Library Collection Development Diane Kaye Kovacs,Kara L. Robinson,2004 Covers how to build an electronic library and how to update and expand it. Each chapter addresses selecting and evaluating web-based resources in subject areas such as business, social science, health, medicine and law, and offers guidelines for an electronic library collection development plan.

⊞ Blogs, Wikis, and Podcasts, Oh My! Electronic Media in the Classroom Jeffrey Piontek,2009-05-12 Offers teachers and school administrators practical suggestions for using blogs, wikis, and podcasts to organize and manage classrooms, aid in professional development, and help students achieve.

⊞ Advances in Digital Technologies J. Mizera-Pietraszko,Y.-L. Chung,P. Pichappan,2016-04-13 The use of digital information and web technologies is now essential to all our lives on a daily basis. In particular, web technologies that enable easy access to digital information in all its forms and regardless of the user's purpose are extremely important. This book presents papers from the 7th International Conference on Applications of Digital Information and Web Technologies (ICADIWT 2016), held in Keelung City, Taiwan, in March 2016. The conference, which has been organized since 2008, is aimed at building the infrastructure necessary for the large-scale development of web technologies, and attracts participants from many countries who attend the conference to demonstrate and discuss their research findings. The 19 full papers presented at the conference have been arranged into 5 sections: networking; fuzzy systems; intelligent information systems; data communication and protection; and cloud computing. Subjects covered fall under areas such as Internet communication, technologies and software; digital communication software and networks; the Internet of things; databases and applications; and many more. The book will be of interest to all those whose work involves the application of digital information and web technologies.
