Norma L. Gentner

Like a Tree Jean Shinoda Bolen,2011-04-01 The internationally known author and speaker provides an insightful look into the fusion of ecological issues and global gender politics. This book on the importance of trees grew out of Bolen's experience mourning the loss of a Monterey pine that was cut down in her neighborhood. That, combined with her practice of walking among tall trees, led to her deep connection with trees and an understanding of their many complexities. She expertly explores the dynamics of ecological activism, spiritual activism, and sacred feminism. And, she invites us to join the movement to save trees. While there is still much work to be done to address environmental problems, there are many stories of individuals and organizations rising up to make a change and help save our planet. The words and stories that Bolen weaves throughout this book are both inspirational and down-to-earth, calling us to realize what is happening to not only our trees, but our people. In *Like a Tree* learn more about: The dynamic nature of trees — from their anatomy to their role as an archetypal symbol Pressing social issues such as deforestation, global warming, and overpopulation What it means to be a "tree person" "You will never again see [a tree] without knowing it has a novel inside, it's supporting your life, and it's more spiritual than any church, temple or mosque. *Like a Tree* is the rare book that not only informs, but offers a larger consciousness of life itself." —Gloria Steinem

The Global Forest Diana Beresford-Kroeger,2010-05-13 A pioneering scientist writes of the fascinating ecological and pharmaceutical properties of trees, and how mother trees nourish younger trees and help them defend themselves – the inspiration for the documentary *Call of the Forest: The Forgotten Wisdom of Trees* Renowned scientist Diana Beresford-Kroeger presents an unforgettable and highly original work of natural history with *The Global Forest*. She explores the fascinating and largely untapped ecological and pharmaceutical properties of trees: leaves that can comb the air of particulate pollution, fatty acids in the nuts of hickory and walnut trees that promote brain development, the compound in the water ash that helps prevent cancer, aerosols in pine trees that calm nerves. In precise, imaginative, and poetic prose, she describes the complexity and beauty of forests, as well as the environmental dangers they face. The author's indisputable passion for her subject matter will inspire readers to look at trees, and at their own connection to the natural world, with newfound awe.

On the bank of the river, in a house made of wood, Close to the place where the scared seedling stood, A hard-working mother and her kindhearted child, Lived freely together, eating food from the wild. Morton's Meanderings Alice Elizabeth Shoemake,Morton Mortimer Koala, Ph.D.,2022-05-03 Welcome. Here we meet Morton the koala. Morton is a light-blue orphaned koala who wears a colorful scarf. He explains he is blue to help him stand out to all the boys and girls. Morton is an adventurer and goes on many meanderings or missions to deliver his messages. Morton comes in sadness and fear to deliver his first message. He has already lost his parents in a wildfire and now his remaining family and their homes are dwindling. On this first mission, he comes to explain why koalas need trees and how humans can help save them both. He points out that humans and koalas value trees and why the trees are so very important to koalas. He expresses his profound sadness that his family along with the trees are being destroyed by many sources. Morton explains our common threats and needs in the natural world. Working together, we can care for Mother Earth properly and help Morton and his koala family survive. Morton is very concerned about the rest of his family and needs your help quick. With your help, farther down the road, Morton hopes to continue his missions. These next messages would teach boys and girls, just like you, about wildlife conservation (focusing on koalas), other animals on the vulnerable or endangered status list, ecology, reforestation, global warming, and so on. Also mixed in these messages will be lessons of kindness, patience, tolerance, and other character traits that children need to learn. Remember, you must hear Morton's first message and begin working so Morton will know you want to help. Then he can continue with his next message. Morton will strive to tap into the children's imagination, giving them ways, both creative and practical, they can help nonprofit organizations as well as creating their own new pathways. This connection, Morton hopes, will enrich children's hearts and minds, creating a better future for our world.

American Chestnut Susan Freinkel,2007-11-19 In *American Chestnut*, Susan Freinkel tells the dramatic story of the stubborn band of optimists who have refused to let this cultural icon go. In a compelling weave of history, science, and personal observation, Freinkel relates their quest to save the tree through methods that range from classical plant breeding to cutting-edge gene technology. But the heart of her story is the cast of unconventional characters who have fought for a century to bring the tree back, undeterred by setbacks or skeptics, fueled by their dreams of restored forests and their powerful affinity for a fellow species. Their efforts offer hope and inspiration in an era in which a plant or animal species passes into oblivion every twenty minutes.--BOOK JACKET.

The Power of Trees Peter Wohlleben,2023-05-02 Another love letter from Wohlleben to the green world... makes the case for how we should allow forests throughout the world to regrow and in the process help heal not only the climate but us, as well.—Lydia Millet, Oprah Daily An illuminating manifesto on ancient forests: how they adapt to climate change by passing their wisdom through generations, and why our future lies in protecting them. In his beloved book *The Hidden Life of Trees*, Peter Wohlleben revealed astonishing discoveries about the social networks of trees and how they communicate. Now, in *The Power of Trees*, he turns to their future, with a searing critique of forestry management, tree planting, and the exploitation of old growth forests. As human-caused climate change devastates the planet, forests play a critical role in keeping it habitable. While politicians and business leaders would have us believe that cutting down forests can be offset by mass tree planting, Wohlleben offers a warning: many tree planting campaigns lead to ecological disaster. Not only are these trees more susceptible to disease, flooding, fires, and landslides, we need to understand that forests are more than simply a collection of trees. Instead, they are ecosystems that consist of thousands of species, from animals to fungi and bacteria. The way to save trees, and ourselves? Step aside and let forests—which are naturally better equipped to face environmental challenges—heal themselves. With the warmth and wonder familiar to readers from his previous books, Wohlleben also shares emerging scientific research about how forests shape climates both locally and across continents; that trees adapt to changing environmental conditions through passing knowledge down to

their offspring; and how old growth may in fact have the most survival strategies for climate change. At the heart of The Power of Trees lies Wohlleben's passionate plea: that our survival is dependent on trusting ancient forests, and allowing them to thrive. Published in Partnership with the David Suzuki Institute.

Wilding Isabella Tree,2018-05-03 ‘A poignant, practical and moving story of how to fix our broken land, this should be conservation's salvation; this should be its future; this is a new hope’ – Chris Packham In *Wilding*, Isabella Tree tells the story of the ‘Knepp experiment’, a pioneering rewilding project in West Sussex, using free-roaming grazing animals to create new habitats for wildlife. Part gripping memoir, part fascinating account of the ecology of our countryside, *Wilding* is, above all, an inspiring story of hope. Winner of the Richard Jefferies Society and White Horse Book Shop Literary Prize. Forced to accept that intensive farming on the heavy clay of their land at Knepp was economically unsustainable, Isabella Tree and her husband Charlie Burrell made a spectacular leap of faith: they decided to step back and let nature take over. Thanks to the introduction of free-roaming cattle, ponies, pigs and deer – proxies of the large animals that once roamed Britain – the 3,500 acre project has seen extraordinary increases in wildlife numbers and diversity in little over a decade. Extremely rare species, including turtle doves, nightingales, peregrine falcons, lesser spotted woodpeckers and purple emperor butterflies, are now breeding at Knepp, and populations of other species are rocketing. The Burrells’ degraded agricultural land has become a functioning ecosystem again, heaving with life – all by itself. Personal and inspirational, *Wilding* is an astonishing account of the beauty and strength of nature, when it is given as much freedom as possible. Highly Commended by the Wainwright Golden Beer Book Prize.
