Paul Blaisdell, Monster Maker Randy Palmer,2015-07-11 Paul Blaisdell was the man behind the monsters in such movies as The She Creature, Invasion of the Saucer Men, Not of This Earth, It! Terror from Beyond Space and many others. Working in primarily low-budget films, Blaisdell was forced to rely on greasepaint, guts and, most importantly, an unbounded imagination for his creations. From his inauspicious beginning through The Ghost of Dragstrip Hollow (1959), the construction of Blaisdell’s monsters and the making of the movies in which they appeared are fully detailed here. Blaisdell’s work in the early monster magazines of the 1960s is also covered.

Modern Sci-Fi Films FAQ Tom DeMichael,2014-09-01 MODERN SCI-FI FILMS FAQ: ALL THAT’S LEFT TO KNOW ABOUT TIME TRAVEL ALIEN ROBOT AND OUT-O

Alien Zone Annette Kuhn,1990 This is especially true of the science fiction film--a genre as old as cinema itself--which has rarely received the serious attention devoted to such genres as the western, the film noir and recently, under the aegis of feminist film theory, the so-called woman's film. Alien Zone aims to bring science fiction cinema fully into the ambit of cultural theory in general and of film theory in particular. The essays in this book--some newly written, others gathered from scattered sources--look at the ways in which contemporary science fiction films draw on, rework, and transform established themes and conventions of the genre: the mise-en-scene of future worlds; the myth of masculine mastery of nature; power and authority and their relation to technology. This material is ordered and contextualized by the editor with a view to exploring how science fiction cinema has been approached critically and theoretically by commentators on the genre: as a mirror of society, as bearing or producing ideology; as caught up in an intertext of media productions, or as expressing unconscious desires. Contributors include Giuliana Bruno, Scott Bukatman, Thomas B. Byers, Barbara Creed, Anne Cranny-Francis, Daniel Dervin, H. Bruce Franklin, James H. Kavanagh, Douglas Kelner, Steve Neale, Judith Newton, Constance Penley, Hugh Ruppersberg, Michael Ryan, Vivian Sobchack, Michael Stern, J. P. Telotte, and Paul Virilio.

Machines for Making Gods Jon Bialecki,2022-03-01 The Mormon faith may seem so different from aspirations to transcend the human through technological means that it is hard to imagine how these two concerns could even exist alongside one another, let alone serve together as the joint impetus for a social movement. Machines for Making Gods investigates the tensions between science and religion through which an imaginative group of young Mormons and ex-Mormons have found new ways of understanding the world. The Mormon Transhumanist Association (MTA) believes that God intended humanity to achieve Mormonism’s promise of theosis through imminent technological advances. Drawing on a nineteenth-century Mormon tradition of religious speculation to reimagine Mormon eschatological hopes as near-future technological possibilities, they envision such current and possible advances as cryonic preservation, computer simulation, and quantum archeology as paving the way for the resurrection of the dead, the creation of worlds without end, and promise of undergoing theosis—of becoming a god. Addressing the role of speculation in the anthropology of religion, Machines for Making Gods undoes debates about secular transhumanism’s relation to religion by highlighting the differences an explicitly religious transhumanism makes. Charting the conflicts and resonances between secular transhumanism and Mormonism, Bialecki shows how religious speculation has opened up imaginative horizons to give birth to new forms of Mormonism, including a particular progressive branch of the faith and even such formations as queer polygamy. The book also reveals how the MTA’s speculative account of God and technology together has helped to forestall some of the social pressure that comes with apostasy in much of the Mormon Intermountain West. A fascinating ethnography of a group with much to say about crucial junctures of modern culture, Machines for Making Gods illustrates how the scientific imagination can be better understood when viewed through anthropological accounts of myth.

The Greatest Sci-fi Movies Never Made David Hughes,2001 Steven Spielberg's sci-fi horror movie Night Skies. David Lynch's Ronnie Rocket. Terry Gilliam's Watchmen. Philip Kaufman's Star Trek: Planet of the Titans. Ridley Scott's I Am Legend. Tim Burton's Superman Lives. These are just some of the legendary unmade films covered by this groundbreaking book. Drawing on dozens of exclusive new interviews with the writers, designers, and directors involved, David Hughes charts the tortuous stories of these films and reveals the fascinating details of what might have been.

Hollywood in China Ying Zhu,2022-07-02 China surpassed North America to become the world ’s largest movie market in 2020. Formerly the focus of exotic fascination in the golden age of Hollywood, today the Chinese are a make-or-break audience for Hollywood’s biggest blockbusters. And movies are now an essential part of China’s global “soft power” strategy: a Chinese real estate tycoon, who until recently was the major shareholder of the AMC theater chain, built the world’s largest film production facility. Behind the curtains, as this brilliant new book reveals, movies have become one of the biggest areas of competition between the world’s two remaining superpowers. Will Hollywood be eclipsed by its Chinese counterpart? No author is better positioned to untangle this riddle than Ying Zhu, a leading expert on Chinese film and media. In fascinating vignettes, Hollywood in China unravels the century-long relationship between Hollywood and China for the first time. Blending cultural history, business, and international relations, Hollywood in China charts multiple power dynamics and teases out how competing political and economic interests as well as cultural values are manifested in the art and artifice of filmmaking on a global scale, and with global ramifications. The book is an inside look at the intense business and political maneuvering that is shaping the movies and the U.S.-China relationship itself—revealing a headlines-grabbing conflict that is playing out not only on the high seas, but on the silver screen.

Selling Science Fiction Cinema J. P. Telotte,2023-07-18 How science fiction films in the 1950s were marketed and helped create the broader genre itself. For Hollywood, the golden age of science fiction was also an age of anxiety. Amid rising competition, fluid audience habits, and increasing government regulation, studios of the 1950s struggled to make and sell the kinds of films that once were surefire winners. These conditions, the leading media scholar J. P. Telotte argues, catalyzed the incredible rise of science fiction. Though science fiction films had existed since the earliest days of cinema, the SF genre as a whole continued to resist easy definition through the 1950s. In grappling with this developing genre, the industry began to consider new marketing approaches that viewed films as fluid texts and audiences as ever-changing. Drawing on trade reports, film reviews, pressbooks, trailers, and other archival materials, Selling Science Fiction Cinema reconstructs studio efforts to market a promising new genre and, in the process, shows how salesmanship influenced what that genre would become. Telotte uses such films as The Thing from Another World, Forbidden Planet, and The Blob, as well as the influx of Japanese monster movies, to explore the shifting ways in which the industry reframed the SF genre to market to no-longer static audience expectations. Science fiction transformed the way Hollywood does business, just as Hollywood transformed the meaning of science fiction.

100 Science Fiction Films Barry Keith Grant,2017-10-12 A comprehensive guide to science fiction films, which analyzes and contextualizes the most important examples of the genre, from Un voyage dans la lune (1902), to The Road (2009).

Typeset in the Future Dave Addey,2018-12-11 A designer’s deep dive into seven science fiction films, filled with “gloriously esoteric nerdery [and] observations as witty as they are keen” (Wired). In Typeset in the Future, blogger and designer Dave Addey invites sci-fi movie fans on a journey through seven genre-defining classics, discovering how they create compelling visions of the future through typography and design. The book delves deep into 2001: A Space Odyssey, Star Trek: The Motion Picture, Alien, Blade Runner, Total Recall, WALL·E, and Moon, studying the design tricks and inspirations that make each film transcend mere celluloid and become a believable reality. These studies are illustrated by film stills, concept art, type specimens, and ephemera,

plus original interviews with Mike Okuda (Star Trek), Paul Verhoeven (Total Recall), and Ralph Eggleston and Craig Foster (Pixar). Typeset in the Future is an obsessively geeky study of how classic sci-fi movies draw us in to their imagined worlds.

Science Fiction and Speculative Fiction P. L. Thomas,2013-09-03 Why did Kurt Vonnegut shun being labeled a writer of science fiction (SF)? How did Margaret Atwood and Ursula K. Le Guin find themselves in a public argument about the nature of SF? This volume explores the broad category of SF as a genre, as one that challenges readers, viewers, teachers, and scholars, and then as one that is often itself challenged (as the authors in the collection do). SF, this volume acknowledges, is an enduring argument. The collected chapters include work from teachers, scholars, artists, and a wide range of SF fans, offering a powerful and unique blend of voices to scholarship about SF as well as examinations of the place for SF in the classroom. Among the chapters, discussions focus on SF within debates for and against SF, the history of SF, the tensions related to SF and other genres, the relationship between SF and science, SF novels, SF short fiction, SF film and visual forms (including TV), SF young adult fiction, SF comic books and graphic novels, and the place of SF in contemporary public discourse. The unifying thread running through the volume, as with the series, is the role of critical literacy and pedagogy, and how SF informs both as essential elements of liberatory and democratic education.

The SNES Encyclopedia Chris Scullion,2020-10-19 “If you didn’t grow up with an SNES and are curious to know about games like Chrono Trigger, Super Metroid and more, then this is the book for you.” —Got Game Following on from the previously released NES Encyclopedia, The SNES Encyclopedia is the ultimate resource for fans of Nintendo’s second home video game console, the Super Nintendo Entertainment System. Containing detailed information on all 780 games released for the SNES in the west, this enormous book is full of screenshots, trivia and charmingly bad jokes. It also includes a bonus section covering the entire twenty-two-game library of the Virtual Boy, Nintendo’s ill-fated 3D system which was released at the end of the SNES’s life. “Without question, The SNES Encyclopedia: Every Game Released for the Super Nintendo Entertainment System makes for an excellent video game library addition. It’s an economical and well-crafted book of Nintendo’s 16-bit history, and it’s sure to leave you yearning for the days of Super Mario World’s vibrant colors, Super Metroid’s intoxicating atmosphere, and Super Punch Out!!’s incredible tension. If you already own The NES Encyclopedia, you’ll know what to expect, but if you’re just starting a collection of video game-themed books, you can’t go wrong with this condense and informative offering.” —Nintendo World Report

Invasion of the Body Snatchers: The Making of a Classic Mark Thomas McGee,2012-07-30 “They’re here already! “You’re next!” These were the last words spoken by Kevin McCarthy in the 1956 classic, Invasion of the Body Snatchers. He was looking right into the camera when he said it to an audience caught in the grip of Cold War paranoia. Studio executives forced director Don Siegel to shoot a new, less alarming ending. In spite of their tampering, this film remains one of the most terrifying and closely dissected motion pictures ever made, inspiring contradictory readings from both ends of the political spectrum. Invasion of the Body Snatchers: The Making of a Classic, by Mark Thomas McGee, is the result of a film fan’s obsession. In short, it’s everything you’ve ever wanted to know about Invasion of the Body Snatchers — the battles with the censors and the front office, the deleted sequences, the addresses of the locations, and much, much more.

The Sci-Fi Movie Guide Chris Barsanti,2014-09-22 Once upon a time, science fiction was only in the future. It was the stuff of drive-ins and cheap double-bills. Then, with the ever-increasing rush of new, society-altering technologies, science fiction pushed its way to the present, and it busted out of the genre ghetto of science fiction and barged its way into the mainstream. What used to be mere fantasy (trips to the moon? Wristwatch radios? Supercomputers capable of learning?) are now everyday reality. Whether nostalgic for the future or fast-forwarding to the present, The Sci-Fi Movie Guide: The Universe of Film from Alien to Zardoz covers the broad and widening range of science-fiction movies. From the trashy to the epic, from the classics to today's blockbusters, this cinefile’s guidebook reviews nearly 1,000 of the biggest, baddest, and brightest from every age and genre of cinematic and TV science fiction. You’ll find more than just Star Wars, Star Trek, and Transformers, with reviews on many overlooked and under-appreciated gems and genres, such as ... • Monsters! Pacific Rim, Godzilla, The Thing, Creature from the Black Lagoon • Superheroes: Thor, Iron Man, X-Men, The Amazing Spider-man, Superman • Avant-garde masterpieces: Solaris, 2001, Brazil • and many, many more categories and movies!!

American Silent Horror, Science Fiction and Fantasy Feature Films, 1913–1929 John T. Soister,Henry Nicolella,Steve Joyce,2014-01-10 During the Silent Era, when most films dealt with dramatic or comedic takes on the “boy meets girl, boy loses girl” theme, other motion pictures dared to tackle such topics as rejuvenation, revivication, mesmerism, the supernatural and the grotesque. A Daughter of the Gods (1916), The Phantom of the Opera (1925), The Magician (1926) and Seven Footprints to Satan (1929) were among the unusual and startling films containing story elements that went far beyond the realm of “highly unlikely.” Using surviving documentation and their combined expertise, the authors catalog and discuss these departures from the norm in this encyclopedic guide to American horror, science fiction and fantasy in the years from 1913 through 1929.

Jar Jar Binks Must Die Daniel M. Kimmel,2011 As the title Jar Jar Binks Must Die indicates, Daniel M. Kimmel is not only a film critic with strong opinions, he's also a fan. In this collection of essays, he covers movies from Metropolis (1927), answering the absurd claim that the restoration of this silent classic negated its status as a science fiction film, to how Star Trek, Avatar, Moon, and District 9 may have made 2009 a miracle year for the genre. Along the way he looks at neglected works like Things to Come (1936), explains why remakes aren't always bad, and how seeing E.T. in an empty screening room changed his mind about Steven Spielberg. Whether to rediscover old favorites or add new titles to your Netflix queue, this is a must-have for lovers of SF movies. Author Bio Daniel M. Kimmel is a past president of the Boston Society of Film Critics. When it was discovered he is also a science fiction fan he started getting invitations to participate at a number of SF conventions, which he continues to do. He reviewed for the Worcester Telegram and Gazette and now writes for Northshoremovies.net. He is a correspondent for Variety, the Movie Maven for the Jewish Advocate and teaches film--including a course on SF and horror--at Suffolk University. His essays on classic science films have appeared in several publications including

Clarkesworld, Space and Time, and the Internet Review of Science Fiction. He is the author of a history of FOX TV, The Fourth Network (2004) which received the Cable Center Book Award. His other books include a history of DreamWorks, The Dream Team (2006) and I'll Have What She's Having: Behind the Scenes of the Great Romantic Comedies (2008).

Space Pioneers Hank Davis,Christopher Ruocchio,2018-11-27 Final Frontiers: an anthology of stories from classic and contemporary masters that explores the wide-open frontier that may await humanity when we take to the stars. DON'T YOU KNOW YOUR FUTURE IS IN SPACE? Since the dawn of time, humankind has felt the urge to explore the four corners of our globe. To push at the boundaries of our world and discover what lies over the horizon. And since the dawn of science fiction, writers have wondered about the next frontier: the one that lies Out There. Here then, a generous collection of stories that reach out into the unknown void, finding awe, wonder, other minds—even terror. But always going beyond the world we know to explore a universe strange beyond the outermost limits of human imagination. Stories of brave men and women who risk all to explore, colonize, and settle the vast reaches of space. As e. e. cummings put it, “listen: there’s a hell of a good universe next door; let’s go.” Well said, but there’s a hell of a big, strange universe right here. And it’s waiting for us all! Great tales of space exploration and pioneering by David Drake, Sarah A. Hoyt, Theodore Sturgeon, Edmond Hamilton, and more. At the publisher's request, this title is sold without DRM (Digital Rights Management). Praise for previous anthologies edited by Hank Davis In Space No One Can Hear You Scream: “. . . the 13 tales in this collection blend sf with horror to demonstrate the resiliency of both genres . . . offers strong tales by the genre’s best storytellers.” —Library Journal “. . . first-rate science fiction, demonstrating how short stories can still entertain.” —Galveston County Daily News A Cosmic Christmas 2 You: “This creative and sprightly Christmas science fiction anthology spins in some surprising directions . . . A satisfying read for cold winter evenings . . . a great stocking stuffer for SF fans.” —Publishers Weekly As Time Goes By: “As Time Goes By . . . does an excellent job of exploring not only romance through time travel—relationships enabled or imperiled by voyaging through time—but the intrinsic romance of time travel itself . . . The range of styles and approaches is as wide as the authors' sensibilities and periods might suggest . . . full of entertaining and poignant stories . . .” —Alvaro Zinos-Amaro, IntergalacticMedicineShow.com

Keep Watching the Skies! Bill Warren,2009-11-16 Bill Warren's Keep Watching the Skies! was originally published in two volumes, in 1982 and 1986. It was then greatly expanded in what we called the 21st Century Edition, with new entries on several films and revisions and expansions of the commentary on every film. In addition to a detailed plot synopsis, full cast and credit listings, and an overview of the critical reception of each film, Warren delivers richly informative assessments of the films and a wealth of insights and anecdotes about their making. The book contains 273 photographs (many rare, 35 in color), has seven useful appendices, and concludes with an enormous index. This book is also available in softcover format (ISBN 978-1-4766-6618-1).
