Modernism's Second Act: A Cultural Narrative I. Nadel, 2012-12-17 European modernism underwent a massive change from 1930 to 1960, as war altered the cultural landscape. This account of artists and writers in France and England explores how modernism survived under authoritarianism, whether Fascism, National Socialism, or Stalinism, and how these artists endured by balancing complicity and resistance.

Self-Organisation Shapes Travel Behaviours and Social Exclusion in Deprived Urban Neighbourhoods of China Joseph Cho-yam Lau, 2020-03-19 This book investigates the influence of self-organisation processes on the commuting of the poor workers in urban China. It suggests a new approach to investigate and measure individual access, and it argues that dynamic interactions between individual action and social structure influence individual's access to transport, which cannot be measured using other traditional accessibility approaches. The overwhelming majority of models in transport research assume that socio-economic factors and the built-environment influence the accessibility of transport for individuals. This book provides evidence that

individual decision-makings and actions are also vital factors to bring out changes in accessibility. Further, the study adopts a self-organisation process and structuration theory to illustrate that a significant proportion of travel problems of migrants are rooted in the interaction between actions and social structures. Any change in migrants' actions or social structures in the self-organisation process would result in the production of complex and spontaneous travel behaviour. The self-organisation approach presented provides a new approach for urban transport planning in the future, particularly on the investigation of the accessibility of disadvantaged social groups. By using the social theories, transport research can have an effect on commuting behaviour and to improve poor workers' quality of life.

Shanghai, a dynamic world metropolis, is home to a multitude of religions, from Buddhism and Islam, to Christianity and Baha'ism, to Hinduism and Daoism, and many more. In this city of 24 million inhabitants, new religious groups and older faiths together claim and reclaim spiritual space. Shanghai Sacred explores the spaces, rituals, and daily practices that make up the religious landscape of the city, offering a new paradigm for the study of Chinese spirituality that reflects the global trends shaping Chinese culture and civil society. Based on years of fieldwork, incorporating both comparative and methodological perspectives, Shanghai Sacred demonstrates how religions are lived, constructed, and thus inscribed into the social imaginary of the metropolis. Evocative photographs by Liz Hingley enrich and interact with the narrative, making the book an innovative contribution to religious visual ethnography.
