The Adventure of the British Museum, Volume 2 Charles Phillips, Melanie Frances, 2021-03 This is the second title in a series of Sherlock Holmes Escape Books: a unique, new form of puzzle books, in which the reader must solve the puzzles to escape the pages. Inspired by the urban craze for escape rooms, where players tackle challenges while trapped in a locked room, this is an escape room in the form of a locked book: filled with codes, ciphers, riddles and red herrings, plus an ingenious Hieroglyphic Code Wheel set into the cover. Taking on the role of Sherlock Holmes, in this new adventure readers find themselves trapped with Watson in the Enlightenment Gallery of the British Museum after a curator collapses in the Egyptian Collection. With King George V due to arrive at the nearby tube station, and rumors of an anarchist plot, Holmes and Watson must find their way through the museum, and fathom the involvement of both Mycroft and Colonel Sebastian Moran, if they are to win their freedom and save the day.

Mastermind Maria Konnikova, 2013-01-03 The New York Times bestselling guide to thinking like literature's greatest detective. Steven Pinker meets Sir Arthur Conan Doyle (Boston Globe), by the author of *The Confidence Game*. No fictional character is more renowned for his powers of thought and observation than Sherlock Holmes. But is his extraordinary intellect merely a gift of fiction, or can we learn to cultivate these abilities ourselves, to improve our lives at work and at home? We can, says psychologist and journalist Maria Konnikova, and in *Mastermind* she shows us how. Beginning with the "brain attic"—Holmes's metaphor for how we store information and organize knowledge—Konnikova unpacks the mental strategies that lead to clearer thinking and deeper insights. Drawing on twenty-first-century neuroscience and psychology, *Mastermind* explores Holmes's unique methods of ever-present mindfulness, astute observation, and logical deduction. In doing so, it shows how each of us, with some self-awareness and a little practice, can employ these same methods to sharpen our perceptions, solve difficult problems, and enhance our creative powers. For Holmes aficionados and casual readers alike, Konnikova reveals how the world's most keen-eyed detective can serve as an unparalleled guide to upgrading the mind.

The World's Smartest Detectives Arthur Conan Doyle, Arthur Morrison, Baroness Orczy, Jacques Futrelle, 2016-06-14 A treasure trove of mysteries drawn from the case files of the world’s cleverest private investigators. The Adventures of Sherlock Holmes features many of the consulting detective’s best-known cases. “A Scandal in Bohemia” finds Holmes matching wits with—and being outfoxed by—a beautiful American opera singer. A struggling shop owner stumbles into a lucrative side job, and a criminal conspiracy, in “The Red-Headed League.” And in “The Adventure of the Speckled Band,” which Arthur Conan Doyle named as the best of his Sherlock Holmes stories, our brilliant hero and his loyal friend Dr. Watson pay a visit to a young heiress’s bedroom late one night, only to stumble across another, far deadlier visitor. Martin Hewitt, Investigator stars a former law clerk turned private investigator who is every bit the deductive equal of Sherlock Holmes. A true master of disguise with a mind as

sharp as a freshly stropped straight razor, Hewitt possess a familiarity with London's night streets and an easy rapport with members of the lower classes. From a troubling series of robberies that occurred at the same residence over several months to a locked-room suicide that was decidedly not self-inflicted, the great detective finds irrefutable solutions to the most unsolvable of mysteries. The Old Man in the Corner is a fascinating study in the art of logical deduction by the author of The Scarlet Pimpernel. The most brilliant sleuth in London sits in the corner of the A.B.C. café, a length of string in his fingers. As the afternoon winds down, he ties and unties intricate knots—in the string and in his mind. No matter how baffling the crime, the old man in the corner need only read the newspaper accounts to know the culprit. The Thinking Machine relates the most confounding cases solved by the brilliant criminologist Professor S. F. X. Van Dusen. Slender, stooped, his appearance dominated by his large forehead and perpetual squint, "The Thinking Machine" spends his days in the laboratory and his nights puzzling over the details of extraordinary crimes. Whether unraveling the perfect murder, investigating a case of corporate espionage, or reasoning his way out of an inescapable prison cell, Van Dusen knows that with the application of logic, all problems can be solved. This ebook features new introductions by Otto Penzler and has been professionally proofread to ensure accuracy and readability on all devices.
