The Music Practitioner Jane W. Davidson, 2017-07-05 Useful work has been done in recent years in the areas of music psychology, philosophy and education, yet this is the first book to provide a wide assessment of what practical benefits this research can bring to the music practitioner. With 25 chapters by writers representing a broad range of perspectives, this volume is able to highlight many of the potential links between music research and practice. The chapters are divided into five main sections. Section one examines practitioners use of research to assist their practice and the ways in which they might train to become systematic researchers. Section two explores research centred on perception and cognition, while section three looks at how practitioners have explored their everyday work and what this reveals about the creative process. Section four focuses on how being a musician affects an individual's sense of self and how others perceive him or her. The essays in section five outline the new types of data that creative researchers can provide for analysis and interpretation. The concluding chapter discusses that key question - what makes music affect us in the way it does? The research findings in each chapter provide useful sources of data and raise questions that are applicable across the spectrum of music-related disciplines. Moreover, the research methodologies applied to a specific question may have broader application for readers wishing to take on research themselves.

Collaborative Learning in Higher Music Education Helena Gaunt, Heidi

Westerlund, 2016-05-23 In higher music education, learning in social settings (orchestras, choirs, bands, chamber music and so on) is prevalent, yet understanding of such learning rests heavily on the transmission of knowledge and skill from master to apprentice. This narrow view of learning trajectories pervades in both one-to-one and one-to-many contexts. This is surprising given the growing body of knowledge about the power of collaborative learning in general, underpinned by theoretical developments in educational psychology: the social dimensions of learning, situational learning and concepts of communities of learners. *Collaborative Learning in Higher Music Education* seeks to respond to the challenge of becoming more conscious of the creative and multiple dimensions of social interaction in learning music, in contexts ranging from interdisciplinary projects to one-to-one tuition, and not least in the contemporary context of rapid change in the cultural industries and higher education as a whole. It brings together theoretical papers and case studies of practice. Themes covered include collaborative creativity, communities of practice, peer-learning, co-teaching as co-learning, assessment and curriculum structures. Chapters illuminate reasons for enabling collaborative learning, and provide exemplars of innovative practice and designs for collaborative learning environments in higher music education. A central purpose of the book is to scaffold change, to help in meeting the rapid changes in society and to find constructive stepping stones or signposts for teachers and students.

Symphonies nos. 3 and 4 in full score Jean Sibelius, 2003-01-01 These revolutionary works brought a strikingly organic almost architectural unity to the symphony that music historians recognized as far in advance of anything in the classical masters. Planted with seeds of change already evident in the beautiful, dark third symphony, the fourth symphony presented the most individual work in this form that the 20th century had yet witnessed. Harmonically new, boldly innovative, and structured on a subtle continuity of line, this was a kind of music previously unheard

in the concert hall. Austere and intensely concentrated, Sibelius's symphonies of 1907 and 1911 are frequently performed around the world by major orchestras. It is hard to think of any music in which the composer is more spontaneous and masterful, and uncompromising in his thought. Olin Downes, Thompson's International Cyclopedia.

Interpreting Musical Gestures, Topics, and Tropes Robert S. Hatten,2017-09-04 Robert Hatten's new book is a worthy successor to his *Musical Meaning in Beethoven*, which established him as a front-rank scholar . . . in questions of musical meaning. . . . [B]oth how he approaches musical works and what he says about them are timely and to the point. Musical scholars in both musicology and theory will find much of value here, and will find their notions of musical meaning challenged and expanded. —Patrick McCreless This book continues to develop the semiotic theory of musical meaning presented in Robert S. Hatten's first book, *Musical Meaning in Beethoven* (IUP, 1994). In addition to expanding theories of markedness, topics, and tropes, Hatten offers a fresh contribution to the understanding of musical gestures, as grounded in biological, psychological, cultural, and music-stylistic competencies. By focusing on gestures, topics, tropes, and their interaction in the music of Mozart, Beethoven, and Schubert, Hatten demonstrates the power and elegance of synthetic structures and emergent meanings within a changing Viennese Classical style.
