They are organized in the following topical sections: learning-ensemble learning; social media and mobile applications of AI; hybrid-changing environments; agent (AGE); classification pattern recognition; genetic algorithms; image and video processing; feature extraction; environmental AI; simulations and fuzzy modeling; and data mining forecasting.

**Trade Secret** Sharon Lee,Steve Miller,2013-11-05 Star-spanning galactic trader Jethri Gobelyn's story continues in the seventeenth entry in the Liaden Universe® series by master storytellers Sharon Lee and Steve Miller. In a universe full of interstellar intrigue and burgeoning commerce novice Terran trader Jethri Gobelyn, adopted by a Liaden clan after an ill-directed bow of honor insulted the scion of a major Liaden house, is alive and whole to tell the tale. Convinced that the adoption has saved his life and made his future he settles into a comfortable and even elite routine, a Trader's Ring his goal. Even as Jethri's initiation into the mysteries and joys of Liaden Festival bring him to manhood he's forced to face Necessity and the facts of life: his adoption has also invigorated a net of unfinished Balance far more complex and potentially deadly than a simple Terran blood feud. He must embrace his Terran birthright as well as his Liaden connections while leaving behind the safety of the great Liaden trade ship Elthoria to defend his honor and that of shipmates past and present. Forced to sit Second Board as a back-up pilot on a Liaden Scout ship, Jethri's convinced he's already at wit's end¼when several familiar faces threaten all that he knows of himself, and all that he wishes to do. Celebrating 25 Years of the Liaden Universe® At the publisher's request, this title is sold without DRM (Digital Rights Management). About Trade Secret prequel Necessity's Child: Compelling and wondrous, as sharp and graceful as Damascus steel, Necessity's Child is a terrific addition to Lee & Miller's addictive series.¼#1 New York Times best seller, Patricia Briggs About the Liaden Universe series: "Every now and then you come across an author, or in this case, a pair, who write exactly what you want to read, the characters and personalities that make you enjoy meeting them. . . . I rarely rave on and on about stories, but I am devoted to Lee and Miller novels and stories."¼Anne McCaffrey "These authors consistently deliver stories with a rich, textured setting, intricate plotting, and vivid, interesting characters from fully-realized cultures, both human and alien, and each book gets better."¼Elizabeth Moon "[A] recommended, powerful pick . . . a fast-paced military and political thriller."¼Midwest Book Review on Ghost Ship "[D]elightful stories of adventure and romance set in a far future. . . space opera milieu. It's all a rather heady mix of Gordon R. Dickson, the Forsythe Saga, and Victoria Holt, with Lee and Miller's own unique touches making it all sparkle and sizzle. Anyone whose taste runs toward SF in the true romantic tradition can't help but like the Liaden Universe."¼Analog "[T]he many fans of the Liad universe will welcome the latest . . . continuing young pilot Theo Waitley's adventures."¼Booklist on Saltation "[A]ficionados of intelligent space opera will be thoroughly entertained . . . [T]he authors' craftsmanship is top-notch."¼Publishers Weekly on Lee and Miller's popular Liaden thriller, I Dare

**Fair Trade** Sharon Lee,Steve Miller,2022-05-03 Jethri Gobelyn has risen far: from despised youngest on a Terran family Loop ship to second trader on premier Liaden tradeship Elthoria under the guidance of his unlikely foster-mother Norn ven'Deelin Clan Ixin. Master Trader ven'Deelin has taught Jethri much, and she expects great things from him. Indeed, one might say she demands them. Jethri has inherited a mission from his father, a plan that will allow family Loop ships like the one he grew up on to survive the encroachment of Rostov's Dust. In this, he's backed by several prominent Looper families who are scheduled to meet and plan at the South Axis Trade Fair. In what seems to be a fortunate pairing of missions, Master Trader ven'Deelin sees Jethri become lead trader on his own small ship, which is scheduled to arrive at the South Axis Fair. Unfortunately, that "fortunate coincidence" may instead be a test of Jethri's loyalties, as he's thrust into a tangle of gray-trading, mistaken identity, misinformation, and galactic politics . . . At the publisher's request, this book is sold without DRM (Digital Rights Management). About Dragon in Exile: ". . . sprawling and satisfying. . . . Space opera mixes with social engineering, influenced by Regency-era manners and delicate notions of honor. . . . it's like spending time with old friends."—Publishers Weekly About Necessity's Child: "Compelling and wondrous, as sharp and graceful as Damascus steel, Necessity's Child is a terrific addition to Lee & Miller's addictive series."—Patricia Briggs About the Liaden Universe® series: "Every now and then you come across an author, or in this case, a pair, who write exactly what you want to read, the characters and personalities that make you enjoy meeting them. . . . **Balance of Trade** Sharon Lee,Steve Miller,2007-03-01 Assistant Trader Jethri Gobelyn is an honest, hardworking young Terran who knows a lot about living onboard his family's space going trade ship 'Gobelyn's Market', something about trade, finance, and risk taking and a little bit about Liadens. Oddly enough, it's the little bit he knows about Liadens that seems likely to make his family's fortune¼and his own. In short order, however, Jethri Gobelyn is about to learn a lot more about Liadens . . . like how far they might go to protect their name and reputation. Like the myriad of things one might say¼intentionally or not¼with a single bow. Like how hard it is to say I'm sorry! in Liaden. Like how difficult it is to deal with a beguiling set of Liaden twins who may very well know exactly what he's thinking . . . . Soon it became clear that as little as he knew about Liadens, he knew far less about himself. With his very existence a threat to the balance of trade, Jethri needs to learn fast, or become a pawn in a game that will destroy all he has come to hold dear. At the publisher's request, this title is sold without DRM (Digital Rights Management).

*Highlights on Practical Applications of Agents and Multi-Agent Systems* Javier Bajo Pérez,Juan M. Corchado Rodríguez,Emmanuel Adam,Alfonso Ortega,María N. Moreno,Elena Navarro,Benjamin Hirsch,Henrique Lopes-Cardoso,Vicente Julián,Miguel A. Sánchez,Philippe Mathieu,2012-03-08 Research on Agents and Multi-Agent Systems has matured during the last decade and many effective applications of this technology are now deployed. PAAMS provides an international forum to present and discuss the latest scientific developments and their effective applications, to assess the impact of the approach, and to facilitate technology transfer. PAAMS started as a local initiative, but has since grown to become THE international yearly platform to present, to discuss, and to disseminate the latest developments and the most important outcomes related to real-world applications. It provides a unique opportunity to bring multi-disciplinary experts, academics and practitioners together to exchange their experience in the development and deployment of Agents and Multi-Agent Systems. PAAMS intends to bring together researchers and developers from industry and the academic world to report on the latest scientific and technical advances on the application of multi-agent systems, to discuss and debate the major issues, and to showcase the latest systems using agent based technology. It will promote a forum for discussion on how agent-based techniques, methods, and tools help system designers to accomplish the mapping between available agent technology and application needs.

Other stakeholders should be rewarded with a better understanding of the potential and challenges of the agent-oriented approach. This edition of PAAMS special sessions. This symposium is organized by the Bioinformatics, Intelligent System and Educational Technology Research Group (<http://bisite.usal.es/http://bisite.usal.es/>) of the University of Salamanca. The present edition will be held in Salamanca, Spain, from 28th to 30th March 2012. This edition of PAAMS special sessions. *How to Day Trade: The Plain Truth* Ross Cameron,2023-11-24 How to Day Trade: The Plain Truth is a book of straight talk about what it really takes to become a day trader, and how to learn what you need to know. Do you think you know what day trading is really about? If so, where did you get your information? Social media is full of people claiming that they made a killing on a stock. Just as many people will warn you to stay away from day trading because they lost everything on some sure thing that went bad in a hurry. So what should you believe? How to Day Trade: The Plain Truth is the first book to talk candidly and in detail about how to become a day trader. It's written by me, Ross Cameron, the guy who turned \$583 into more than \$10 million. Though my results are not typical, they are fully verified and audited. I also have over one million subscribers who tune into my YouTube channel to watch me trade. They see both my winning trades and my losing ones. Yes, even I have days where I lose money. That's just the reality, and that's what I want to share with you. This book is unique among day trading books in three ways: First, it's written by someone with documented success from more than 20,000 trades. Sure there are lots of people on social media calling themselves day traders who will try to impress you with one amazing trade. Insider tip: You should only be impressed if they offer you an independently audited record of ALL their trades: the winning ones AND the losing ones. Second, of all the books for day traders, this one is unique: I clear away a lot of head trash that comes from social media, friends, and family who may have opinions but no real facts or deep experience with day trading. It addresses questions and opinions that most people have about day trading, like: If it is possible to day trade profitably, why haven't the giant trading firms taken it over and monopolized it by this point? If it's possible for regular people to make consistent money by day trading, then why isn't everyone doing it? Day trading is gambling. Nothing more, nothing less. What role does luck have in day trading? I have a hard time believing that you will tell me exactly the methods you use to trade. If you did that, wouldn't you lose your competitive edge? I'm a gamer who's incredibly fast with the keyboard. Why can't I skip all the concepts and learning, and simply follow you as you trade? You will get specific, honest answers to all of these questions and more. The third thing that makes this book unique is I have identified 20 specific guardrails over my many years of trading. These are rules I follow, plus some I wish I knew when I was starting out. They are incredibly useful to keep in mind during the heat of trading-and it does get hot. If you're looking for day trading books for beginners, this is the book to get. Plus if you feel like you're not a beginner but your day trading is going nowhere, this could be the book to have in order to get you back on track. As important as charts and financial ratios are, those things come later. If you're thinking about day trading for a living, what you need to know first is whether day trading fits your personality, and how to avoid the biggest myths and mistakes that will cost you time and money. Real day trading is not anything like what you see on social media. After you read this book, you'll know why. You'll also have a solid roadmap of day trading strategies to take, if you decide to explore this amazing profession.

**The Traders Series Books 1-3** Anna Jacobs,2020-07-09 The first three books in Anna Jacobs' beloved Traders Series *The Trader's Wife* Singapore in the 1860s is exotic and yet terrifying for Isabella Saunders, a penniless Englishwoman, alone and vulnerable after her mother's death. Too pretty to obtain a governess's job, she accepts an offer from Mr Lee, a Singapore merchant, to teach him English and live with his family. Two years later Bram Deagan arrives in the country, determined to make his fortune as a trader. Mr Lee sees a way to expand his business connections and persuades Isabella to marry Bram, and she bravely sets sail for a new land and life. But the past casts a long shadow and together they face unexpected dangers. Will they ever be able to achieve their dreams - and find happiness together along the way? *The Trader's Sister* Ismay Deagan has one wish in the world - to leave Ireland and join her brother, Bram, in Australia. But her father has other ideas and orders her to marry their vicious neighbour Rory Flynn - a man she loathes. One day, Rory brutally attacks her and Ismay realises she has no choice but to run away. Disguising herself as an impoverished young widow, she sets sail for Australia, hoping to be reunited with her brother. When she meets Adam Treagar on the ship, she finally starts to believe her dreams of future happiness may come true. But before they even reach their destination they are flung into adventures in Suez, Ceylon and Singapore . . . Can Ismay tell Adam the truth about who she really is? What secrets is Adam himself hiding? And will Ismay's past catch up with her and threaten her new life in Australia, before it has even begun? *The Trader's Dream* Bram Deagan dreams of bringing his family from Ireland to join him in Australia, where he now runs a successful trading business. But when a typhus epidemic strikes Ireland, it leaves the Deagan family decimated. And, with other family members scattered round the world, it is left to Maura Deagan to look after her orphaned nieces and nephew. Forced to abandon her own ambitions, and unsure whether she is ready to become a mother to three young children, Maura makes a drastic decision: to join Bram in far-away Australia. They set sail on the SS Delta, anxious for their futures. It is only when a storm throws Maura and fellow passenger Hugh Beaufort together that she realises this journey may also give her a chance to pursue a dream she set aside long ago: to have a family of her own. That is, until someone from Hugh's past threatens to jeopardise everything . . . \*\*\*\*\* What readers are saying about the Traders Series: 'Anna Jacobs is the best storyteller bar none!' - 5 stars 'A wonderful book . . . Very engaging and engrossing' - 5 stars 'Another must-read' - 5 stars 'Yet again couldn't put this book down' - 5 stars 'Excellent read from start to finish, couldn't put it down' - 5 stars

*Engineering Emergence* Larry B. Rainey,Mo Jamshidi,2018-09-03 This book examines the nature of emergence in context of man-made (i.e. engineered) systems, in general, and system of systems engineering applications, specifically. It investigates emergence to interrogate or explore the domain space from a modeling and simulation perspective to facilitate understanding, detection, classification, prediction, control, and visualization of the phenomenon. Written by leading international experts, the text is the first to address emergence from an engineering perspective. System engineering has a long and proud tradition of establishing the integrative view of systems. The field, however, has not always embraced and assimilated well the lessons and implications from research on complex adaptive systems. As the editors' note, there have been no texts on Engineering Emergence: Principles and Applications. It is therefore especially useful to have this new, edited book that pulls together so many of the key elements, ranging from the theoretical to the practical, and tapping into advances in methods, tools, and ways to study system complexity. Drs. Rainey and Jamshidi are to be congratulated both for their vision of the book and their success in recruiting contributors with so much to say. Most

notable, however, is that this is a book with engineering at its core. It uses modeling and simulation as the language in which to express principles and insights in ways that include tight thinking and rigor despite dealing with notably untidy and often surprising phenomena. — Paul K. Davis, RAND and Frederick S. Pardee RAND Graduate School The first chapter is an introduction and overview to the text. The book provides 12 chapters that have a theoretical foundation for this subject. Includes 7 specific example chapters of how various modeling and simulation paradigms/techniques can be used to investigate emergence in an engineering context to facilitate understanding, detection, classification, prediction, control and visualization of emergent behavior. The final chapter offers lessons learned and the proposed way-ahead for this discipline.

**Handbook of Portfolio Construction** John B. Guerard, Jr.,2009-12-12 Portfolio construction is fundamental to the investment management process. In the 1950s, Harry Markowitz demonstrated the benefits of efficient diversification by formulating a mathematical program for generating the efficient frontier to summarize optimal trade-offs between expected return and risk. The Markowitz framework continues to be used as a basis for both practical portfolio construction and emerging research in financial economics. Such concepts as the Capital Asset Pricing Model (CAPM) and the Arbitrage Pricing Theory (APT), for example, provide the foundation for setting benchmarks, for predicting returns and risk, and for performance measurement. This volume showcases original essays by some of today’s most prominent academics and practitioners in the field on the contemporary application of Markowitz techniques. Covering a wide spectrum of topics, including portfolio selection, data mining tests, and multi-factor risk models, the book presents a comprehensive approach to portfolio construction tools, models, frameworks, and analyses, with both practical and theoretical implications.
