Inclusive FinTech Lee David Kuo Chuen,Low Linda,2018-06-21 Cryptocurrency market has been growing fast since its emergence in recent years. Moreover, digital finance has forged the convergence of profit motives with social objectives creating a class of large FinTech companies. In addition, the underlying technology innovation may be applied to a wide range of industries, not limited to financial sector. Yet, few researches have been done to study these phenomena. Hence, it is the task of this book to shed light on the introduction and trends in FinTech, blockchain and token sales. Richly illustrated with original lecture slides taught by the authors, Inclusive FinTech: Blockchain, Cryptocurrency and ICO hopes to dispel the many misconceptions about blockchain and cryptocurrencies (especially bitcoin, Initial Crypto-Token Offering or ICO), as well as the idea that businesses can be sustainable without a social dimension going forward. With comprehensive coverage given to the FinTech scene in Asia, it is targeted at those who are searching for business opportunities. Most important of all, this book seeks to change the mindset of a whole new generation that is familiar with digital economy and yearns for a more just and equitable world.

New Dimensions of Economic Globalization Ramkishan S Rajan,Rajiv Kumar,Nicola Virgill,2008-05-27 The phenomenon of South-South FDI flows, particularly those arising from multinational companies from China and India, has generated considerable interest among policymakers, academics and the popular press in recent times. This phenomenon raises several questions such as: What is behind the rise of such intra-regional investment flows? What is the magnitude of such flows, and can they be expected to persist/accelerate over time? What are the challenges faced by emerging market multinationals and the future prospects of intra-Asian FDI flows? This book, written by top scholars from academia, international organizations as well as think tanks, consists of a set of papers focusing on these issues. The book is unique in its coverage — focusing on China, India and Southeast Asia rather than limiting itself to a sub-regional or country-specific focus. The chapters in this book highlight important policy issues but are supported with relevant data and empirics, with rigorous empirical analysis being applied to important practical policy issues. The book also provides pertinent overviews of recent research on the questions explored. While the chapters have been crafted to be able to stand up to academic scrutiny, they are also written in a manner that makes them easily accessible to all policymakers, students and business/financial journalists who are interested in Asia and in the emergence of South-South FDI flows.

Regionalization and Labour Market Interdependence in East and Southeast Asia Duncan Campbell,Asma Lateef,Aurelio Parisotto,Anil Verma,2016-01-06 How can we account for the dynamic growth of East and Southeast Asian countries? Much of the debate has turned on the question of the 'state' versus the 'market' as exclusive (and often competing) explanations of the successful performance of individual countries. This book explores the distinctively interdependent nature of the East and Southeast Asian experience. As firms create a regional organization of production, the growing interdependence of national labour markets is one major outcome.

The Economics of Fintech Sahoko Kaji,Teruo Nakatsuma,Masahiro Fukuhara,2021-02-20 This book is a collection of academic lectures given on fintech, a topic that has been written about extensively but only from a business or technological point of view. In contrast to other publications on the subject, this book shows the reader how fintech should be understood in relation to economics, financial theory, policy, and law. It provides introductory explanations on fintech-related concepts and instruments such as blockchains, crypto assets, machine learning, high-frequency trading, and AI. The collected lectures also point to surrounding issues including start-ups, monetary policy, asset management, cyber and other security, and stability of financial systems.
