50 Years Of Transportation In Singapore: Achievements And Challenges Tien Fang Fwa, 2016-07-22 This unique volume presents the achievements of the land, sea and air transport industry of Singapore in the last 50 years after Singapore gained its independence in 1965. It provides a comprehensive overview of Singapore's progress in transportation from a typical third world system in the 1960s to one that is currently in the top league globally in all aspects of passenger and freight transportation. Singapore's successes in land transport planning, urban traffic management, and public transport systems provide valuable experience for major cities worldwide. The emergence of the Singapore Port as the most efficient container port in the world is another success story that inspires both established and up-and-coming port operators alike. The ambitious goal of Singapore to develop itself into a maritime knowledge hub of the future is a bold and exciting undertaking catching worldwide attention. In air transport, Singapore is well known for its efficiency as a major regional hub. This book examines in detail the important milestones and background developments that have led to the highly advanced state of transportation systems in the land, sea and air transport of Singapore today. Each chapter is written by professionals who are themselves part of the success stories presented. The chapter authors are specially invited to provide a professional account of the topics of their expertise. The authors have been able to draw on extensive amounts of published and unpublished documents and reports to present a comprehensive picture for the subject of interest in each chapter. As a whole, the book offers a hollistic and informative professional reference book on the major happenings and achievements of Singapore in the transportation sector.

<u>Rikisha to Rapid Transit</u> Peter J. Rimmer,2013-09-24 Rikisha to Rapid Transit: Urban Public Transport Systems and Policy in Southeast Asia examines the historical development of urban public transport systems and policy in Southeast Asia. The focus is on the passenger transport sector of the urban economy and the dilemmas facing decision-makers with regard to the choice of technology and organization. The prime target of the monograph is the development studies field in which urban public transport has been a neglected topic. The book is organized into three parts. Part 1 assesses Western, Japanese, and overseas Chinese models and their relevance to decision-making in Southeast Asia. Part 2 examines the evolution of transport systems and policy in five capitals (Singapore, Bangkok, Jakarta, Manila, and Kuala Lumpur) and several provincial cities (Penang, Surabaya, Davao City, Chiang Mai, Baguio and Metro Cebu). Part 3 brings out the implications of this study for theory and practice. The argument is structured in this way in order to preserve the historical sequence which will become progressively clearer as the study unfolds, particularly as there is a very positive indication...that the transport situation in cities results as much from historical development as from the interaction of forces currently at play.
