Black Swan Start-ups Sami Mahroum, 2016-05-11 This book explores startups that have thrived against the odds in places where startup success was deemed to be unlikely. Discussing a number of technology startups from around the world that have succeeded without state backing nor local venture and seed capital, Black Swan Start Ups provides unique insights into unsung models of success beyond the two dominant narratives of Asia's 'Tiger Economies' and America's Silicon Valley miracle. The author describes these stories of success as 'black swan events' and ascribes their achievements to the ability of entrepreneurs to leverage the 'place surplus' of their locations, while building connections to support networks outside their immediate geographies. Including case studies such as Skype in Estonia, SoundCloud in Germany and Bayt.Com in Dubai, this insightful book gives a holistic and wide-ranging view of how technology startups have, and can, succeed in less likely places.

Using Web 2.0 and Social Networking Tools in the K-12 Classroom Beverley Crane, 2012-04-30 Here's a book that describes Web 2.0 tools in-depth, models Web 2.0 tools through classroom examples, explains how to get started with each tool, presents practical unit plans illustrating the use of Web 2.0 in the K-12 content-area curricula, and identifies and describes what tools are most useful to educators for networking, productivity and insight into the technologies. Part 1 of each chapter answers many questions you will have about Web 2.0 and social networking tools: What is the tool? Why use it with students? How are K-12 classrooms using the tool? Can you provide me with specific examples for my science, history, or language arts curriculum? Part 2 describes specific tools and the steps to get started. Part 3 contains a detailed sample unit plan, teacher exercises and a summary following. Screen shots of websites are used to make the advice straightforward and easy to understand. You'll find an entire chapter on special instruction for ESL students with objectives, tools, and K-12 classroom examples. To help you implement Web 2.0 tools beyond the curriculum, there's even a chapter devoted to technology tools specifically designed for teachers and librarians to use for personal productivity, communication, and collaboration. The conclusion offers ideas for integrating Web 2.0 in art, music, and health. Exciting examples of the book's contents include: Collaborating and Communicating with

Blogs Creating Multidisciplinary Wikis Google Tools: Enhancing Instruction in the Science Curriculum K-12 Classrooms Join the Social Networking Revolution Using VoiceThread and Video to Improve Language Development Creating Community In addition to the great content you'll find in the book, *Using Web 2.0 and Social Networking Tools in the K-12 Classroom* features a companion Web site that provides the most current curriculum examples from pioneering educators around the world, as well as up-to-date exercises and lessons in subject areas and grade levels.

Skype: Bodies, Screens, Space Robyn Longhurst, 2016-09-13 Despite the popularity of Skype with video many of us are still figuring out how to 'do' it. Interviews reveal that we can now run the programme but we are less certain about how to 'perform' in front of the webcam. Seeing ourselves in the box on the side can feel strange. We are not quite sure which bits of our bodies to display on the screen, how much to move around the room, or move the device around the room. Is it acceptable to use Skype with video at a funeral, in crowded spaces or while in bed? This book addresses how people are emotionally and affectually connecting with others audio-synchronously on the screen in a variety of different spatial contexts. Topics include Skype with video being used by grandparents to connect with grandchildren, friends and family using it for special occasions, and partners using it for romance and sex. Theories addressing bodies, gender, queerness, phenomenology and orientation inform the research. It concludes that while Skype does not offer some kind of utopian future, it does open up possibilities for existing power relations to be filtered through new lines of sight/site which are shaping what bodies can do and where.

"Race to the Bottom" ,2006 This report documents the different ways in which companies such as Yahoo!, Microsoft, Google, and Skype are assisting and reinforcing the Chinese government's system of political censorship.

The Wiley Handbook of Collaborative Online Learning and Global Engagement Deirdre Johnston, Irene López, 2022-07-13 Presents best practices for faculty and administrators developing globally-connected courses, including learning objectives, collaborative assignments, and logistical planning As political instability, pandemic risks, rising costs, new requirements for experiential learning, and other factors make it increasingly difficult for students to study abroad, there is growing interest in globalizing and internationalizing the curricula of colleges and universities worldwide. The Wiley Handbook of Collaborative Online Learning and Global Engagement is designed to help educators develop and conduct high-impact, globally-connected courses across the humanities, the fine arts, and the social and natural sciences. This comprehensive guide covers collaborative practices, course design variables, student learning approaches, logistical planning, and more. An international team of contributors from diverse geographic, cultural, and academic backgrounds offer insight into enhancing pedagogical practice, coordinating study abroad experiences, and promoting both students' and faculty's global competencies. Throughout the text, numerous real-world case studies, interactive and experiential assignments, sample syllabi, course bibliographies, and links to web and media resources reinforce best practices for course design, learning objectives, and pedagogy development. Based on a detailed assessment of 500 students in collaborative courses across 14 countries, this innovative guide: Covers co-development of learning objectives across different courses, disciplines and cultural contexts, co-

coordination of course content, technology, and resources, and intercultural learning assessment Explores new and innovative ways to engage students in distant locations in collaborative learning Provides advice for overcoming logistical challenges, managing group dynamics, controlling costs, and implementing connected courses with limited resources Discusses the impact globally-connected courses have on cultural curiosity, knowledge, strategy, and behavior Offers approaches for addressing cultural transgressions and miscommunication, and for collaborating with other faculty members across cultures and educational systems Featuring multiple cultural perspectives and international contexts, *The Wiley Handbook of Collaborative Online Learning and Global Engagement* is a valuable guide and reference for faculty and administrators involved in teaching, planning, implementing, or assessing courses with global learning outcomes.

Blogs, Wikis, and Podcasts, Oh, My! Jeffrey Piontek, Blane Cocklin, 2009 Offers teachers and school administrators practical suggestions for using blogs, wikis, and podcasts to organize and manage classrooms, aid in professional development, and help students achieve.

Technology Entrepreneurship Natasha Evers, James Cunningham, Thomas Hoholm, 2020-12-12 This second edition of the critically acclaimed core textbook provides students from technology and science based backgrounds with the theoretical knowledge and practical skills required to transform innovative ideas into commercially viable businesses for profit or social ends. Blending theory, policy and practice in a manner that is accessible to readers with little prior knowledge of business commercialisation, it offers a framework for understanding the entrepreneurial process for technological ideas. The book provides students with comprehensive guidance on the specialized field of 'technopreneurship'. It provides the tools and frameworks required for managing, commercialising and marketing technological innovation. With real life examples and case studies from a range of countries and industries, it will equip students with the understanding required to successfully launch their product. This text caters for undergraduate and postgraduate students studying technology entrepreneurship modules on engineering, science and computing technology programmes. New to this edition: -All chapters updated to reflect the evolution of theory and practice in the field -New cases on digital entrepreneurship, growth and scaling -Extended geographical coverage of case studies -Entrepreneurial practices updated to include recent research -Strategic context of business models, business growth and scaling, digital entrepreneurship, entrepreneurial marketing, organization design and crowdfunding developed and updated.

Publish and Prosper DL Byron, Steve Broback, 2006-06-01 While personal blogs take up much of the blogosphere, blogs are quickly gaining popularity in business as an inexpensive and amazingly effective marketing tool. It's time for a practical book about business blogging: this is the first book to demonstrate how businesses are blogging and how you can use blogging technology to converse with your customers to build your brand and sell your products. Written from the business person/designer's perspectives, this book shows how businesses can leverage current, real-world blogging techniques, tools, and platforms to promote and enhance their ventures. The key idea is that the conversation with your market is stronger and more meaningful with a blog. Filled with practical information and a how-to approach, this book

provides case studies of companies as large as Boeing or General Motors and as small as Clip-'n-seal. Readers will learn about the types of business blogs, how companies use blogs, how to sell blogs to management and IT, effective blog design, content, and conversation, pitfalls to avoid, how to develop Web presence, and more.

Emerging Trends in ICT Security Diogo A.B. Fernandes, Liliana F.B. Soares, João V. Gomes, Mário M. Freire, Pedro R.M. Inácio, 2013-11-06 Nowadays, cybersecurity makes headlines across the media and in companies, blogs, social networks, among other places. The Internet is a wild cyberspace, an arena for commercialization, consumerism, business, and leisure, to name a few activities. Networks, populations, and nations around the world, now interconnected through the Internet, rely on it for their daily lives. But some Internet users have learned to take advantage of vulnerable systems and of Internet technologies for their own good, sending out spam, phishing, data breaches, botnets, and other threats. An underground criminal network has emerged, creating complex malware kits for several purposes. "Hacktivism" has become a popular term with many supporters worldwide, but cyberwarfare is now on the rise, gaining more and more attention from nation-states. This chapter provides a quick overview of these topics, discussing them in a timely manner, referencing key events from the past while focusing on the present day.

The Routledge Handbook of Audiovisual Translation Luis Pérez-González, 2018-10-10 The Routledge Handbook of Audiovisual Translation provides an accessible, authoritative and comprehensive overview of the key modalities of audiovisual translation and the main theoretical frameworks, research methods and themes that are driving research in this rapidly developing field. Divided in four parts, this reference work consists of 32 state-of-the-art chapters from leading international scholars. The first part focuses on established and emerging audiovisual translation modalities, explores the changing contexts in which they have been and continue to be used, and examines how cultural and technological changes are directing their future trajectories. The second part delves into the interface between audiovisual translation and a range of theoretical models that have proved particularly productive in steering research in audiovisual translation studies. The third part surveys a selection of methodological approaches supporting traditional and innovative ways of interrogating audiovisual translation data. The final part addresses an array of themes pertaining to the place of audiovisual translation in society. This Handbook gives audiovisual translation studies the platform it needs to raise its profile within the Humanities research landscape and is key reading for all those engaged in the study and research of Audiovisual Translation within Translation studies.

Celebrating Writers Ruth Ayres, 2023-10-10 Writing begins before students even pick up a pencil, but there are many reasons to stop and rejoice between the idea and the finished project. By helping students celebrate each stage of the writing process and applauding success, we help our students persevere through what can be an extended and challenging process. In their innovative new book, *Celebrating Writers*, Ruth Ayres and Christi Overman discuss dozens of ways to respond, reflect, and rejoice along the journey to a finished project. This type of celebration nurtures students, makes them better writers, and helps them recognize that writing is a process filled with

notable moments, not simply a result where publication is the only marker of success. From traveling notebooks to lunch-table writing, from author interviews with a writing partner to silent reflection, from swapping stories around a campfire to tweeting favorite lines, Ruth and Christi share dozens of fun and effective ways for you and your students to commemorate their progress as writers. As the authors write, It's time to expand the idea of celebration to include the process of writers and the products they create. Let's build an approach that weaves celebration into the heart of all writers. Be ready to learn to refuel the writers in your classroom, even on the tough days.

Using Technology to Support Learning and Teaching Andy Fisher,Kate

Exley,Dragos Ciobanu,2014-01-03 The climate of Higher Education is changing rapidly. The students are more likely to see themselves as consumers and have increasingly high expectations regarding teaching and learning. Universities are in part aiming to meet this need by increasing the use of technology; for example, whether to increase access to teaching materials outside the classroom or to make lectures more interactive. Although there is no illusion amongst Higher Education intuitions that technology is a panacea, it is clear that technology is a vital tool in meeting expectations and one that will be used more and more. Consequently the context of this book is one in which technology needs to be understood as part of an overall teaching practice. Technology continues to move on a pace and is used increasingly within Higher Education to support and enhance teaching and learning. There are books which are steeped in technical detail and books which are steeped in theoretical pedagogy with little discussion about the impact on learning and student/teacher behaviour. Using Technology to Support Learning and Teaching fills a gap in the market by providing a jargon free (but pedagogically informed) set of guidance for teaching practitioners who wish to consider a variety of ways in which technology can enrich their practice and the learning of their students. It integrates a wide range of example cases from different kinds of HE institutions and different academic disciplines, illustrating practicable pedagogies to a wide range of readers. It is full of advice, hints and tips for practitioners wanting to use technology to support a style of teaching and learning that is also built on sound pedagogical principles. It will provide a quick user-friendly reference for practitioners wanting to incorporate technology into Higher Education in a way that adheres to their learning principles and values . This book is primarily for teaching practitioners, particularly those who are new to the industry.This book would also prove useful on training courses for practitioners; such as the Postgraduate Certificate for Higher Education. The authors also intend that

the book be of value to newer teachers (perhaps taking teacher training programmes) who wish to see where recommended approaches link to pedagogy.

Teaching EFL Online Andrew R. Webster, 2012-10 This work explores the role of the e-moderator, taking account of the skills required and the processes involved in creating and teaching an online English as a Foreign Language (EFL) course. It also details those theories which are applicable to online learning and how they are represented through various models, thus creating a framework to assist the e-moderation process. In particular, Salmon's five-stage model (2004) is analysed to assess its effectiveness in helping to prepare a new e-moderator to teach in an online environment. Qualitative self-study research is conducted involving an analysis of the e-moderator's reflective journal. This method can be particularly insightful, uncovering the e-moderator's beliefs, perceptions and challenges encountered throughout the process. Thus, in-depth data is collected and used in evaluating an approach to e-moderation. It reveals how Salmon's five-stage model and others can be considerably helpful, although not sufficient in themselves, for successful online teaching and learning. In this regard, a critical appraisal and detailed analysis of Salmon's model relating to this research is conducted to assess the skills required to become a successful e-moderator. This research reveals not only the complexities, problems, responsibilities and challenges encountered but also the tremendous rewards that can be reaped from the e-moderation process. Such research can encouragingly provide other practitioners with a valuable insight into the process and leads to recommendations for further research. In conclusion, it is apparent that systematic frameworks such as Salmon's five-stage model can be extremely useful for effective scaffolding but on their own they are not sufficient to produce a successful e-moderation process. It is suggested, therefore, that additional support and continual encouragement should be provided to motivate and engage students in both synchronous and asynchronous interactions. Moreover, consideration
