The Psychology of Social Networking Vol.1 Giuseppe Riva, Brenda K. Wiederhold, Pietro Cipresso, 2015-01-01 Using a novel approach to consider the available literature and research, this book focuses on the psychology of social media based on the assumption that the experience of being in a social media has an impact on both our identity and social relationships. In order to 'be online',

an individual has to create an online presence – they have to share information about themselves online. This online self is presented in different ways, with diverse goals and aims in order to engage in different social media activities and to achieve desired outcomes. Whilst this may not be a real physical presence, that physicality is becoming increasingly replicated through photos, video, and ever-evolving ways of defining and describing the self online. Moreover, individuals are using both PC-based and mobile-based social media as well as increasingly making use of photo and video editing tools to carefully craft and manipulate their online self. This book therefore explores current debates in Cyberpsychology, drawing on the most up-to-date theories and research to explore four main aspects of the social media experience (communication, identity, presence and relationships). In doing so, it considers the interplay of different areas of psychological research with current technological and security insight into how individuals create, manipulate and maintain their online identity and relationships. The social media are therefore at the core of every chapter, with the common thread throughout being the very unique approach to considering diverse and varied online behaviours that may not have been thus far considered from this perspective. It covers a broad range of both positive and negative behaviours that have now become integrated into the daily lives of many westernised country's Internet users, giving it an appeal to both scholarly and industry readers alike.

Throwing Sheep in the Boardroom Matthew Fraser, Soumitra Dutta, 2010-02-16 If you want to understand why Wikipedia is changing the world, this book is a must read. –Jimmy Wales, Founder, Wikipedia This book is a must read for all - social activists, politicians or managers - who have an interest in understanding how our society is morphing. –Professor C.K. Prahalad, #1 Management Guru and author of Competing for the Future Synopsis The rise of social networks like Facebook, MySpace and Bebo is changing the way we see ourselves, how we interact with each other, how we work and how we do business on a daily basis. Throwing Sheep in the Boardroom explores the powerful forces driving the social networking revolution, the impact of these profound changes, and the far reaching consequences of social networking. Detailing the way social networks affects both individuals and societies as a whole, the book offers a detailed focus on the ways social networking affects the world of business and work. The generation entering the workforce today - and entering boardrooms everywhere - is fully engaged with social networking and its uses. Rather than feeling threatened and paranoid, today's business leaders need to understand this phenomenon, accept that it won't go away, and embrace its power in the world of business. Excerpts from Throwing Sheep in the Boardroom: Your next CEO's most impressive job credential might be status as an online gladiator, honing valuable leadership skills mercilessly slaying mortal enemies on World of Warcraft. Why not, the skills necessary to hack your way to the top levels of virtual games – especially a killer instinct – are excellent pre-requisites for managing complex organisations. Many senior managers mistakenly believe Enterprise 2.0 is a product, like the latest Microsoft office suite. They don't realise that Enterprise 2.0 is not a cost centre, but a “state of mind” – a revolutionary new way of managing companies and conducting business. Web 2.0 tools have no regard for “organisational boundaries, hierarchies, or job titles”. Try telling a senior executive that, henceforth, there will be no job titles, reporting lines, and organisational boundaries in the company – and watch the reaction closely. When someone calls a meeting, he or she is asserting authority over those who are invited to attend. Meetings are exclusive and closed. In most corporations, who gets invited to a meeting – and who does not – sends a signal about who's ‘in the loop’. Meetings are a form of social grooming inside organisations. Meetings impose vertical authority. They establish status hierarchies. The Enterprise 2.0 model is feared in corporations because it threatens status hierarchies. Harnessing the dynamism of horizontal networks, Web 2.0 social media are bypassing institutional forms of social organisation and directly empowering people. This book has attempted to tell that story with illustrations, which, we hope, have offered intriguing and instructive insights into the powerful transformations we described. What has interested us most, indeed, is the transformative impact – or “e-ruptions” – of Web 2.0 social media on the three dynamics that gave this book its structure: identity, status and power.

Viral Marketing Within Social Networking Sites: The Creation of an Effective Viral Marketing Campaign Sven Wilde,2013-06 Primarily, a review on theoretical foundations and the history of Viral Marketing is shown.
