GIS-based Studies in the Humanities and Social Sciences

Atsuyuki Okabe, 2016-04-19 Studies in the humanities and the social sciences can be enhanced through the use of geographic information systems (GIS). However, this computer-aided method of analysis is worthless unless researchers can devote the time necessary to learn what it is, what it can do, and how to use it. Resulting from a six-year project entitled Spatial Information Science for the Humanities and Social Sciences (SIS for HSS), GIS-Based Studies in the Humanities and Social Sciences details the tools and processes for deploying GIS in economic and social analyses. Through the use of this book, readers can understand how GIS technology can be utilized in advancing studies. This volume will also encourage professionals in humanities and the social sciences to employ new GIS-based methods in their own research.

Making A Photo Collage Canvas I Stephen

Peace, 2023-11-27 I show my process of using 4 by 6 printed photos and adding them to a used canvas. This makes a unique photo collage canvas. I can then sell the individual collage and the giclee image of the canvas. Many of my enhanced photos I have developed over years and like showcasing them in these photo collages. Every time I print them off I can select from thousands of my enhanced images. It makes the process new every time I do it.

Photography Mary Warner Marien, 2006 Each of the eight chapters takes a period of up to forty years and examines the medium through the lenses of art, science, social science, travel,

Visual Spatial Enquiry Robyn Creagh, Sarah McGann, 2018-12-07 Visual Spatial Enquiry explores visual and textual ways of working within spatial research. Architects and spatial thinkers from the arts, social sciences and humanities present rich case studies from remote and regional settings in Australia to the suburbs of Los Angeles, and from gallery and university settings to community collaborations in Mongolia. Through these case studies the authors reappraise and reconsider research approaches, methods and processes within and across their fields. In spatial research diagramming can be used as a method to synthesise complex concepts into a succinct picture, whereas metaphors can add the richness of lived experiences. Drawing on the editors' own architectural backgrounds, this volume is organised into three key themes: seeing, doing and making space. In seeing space chapters consider observational research enquiries where developing empathy for the context and topic is as important as gathering concrete data. Doing space explores generative opportunities that inform new and innovative propositions, and making space looks at ways to rethink and reshape spatial and relational settings. Through this volume Creagh and McGann invite readers to find their own understandings of the value and practices of neighbouring fields including planning, geography, ethnography, architecture and art. This exploration will be of value to researchers looking to develop their cross-disciplinary literacy, and to design practitioners looking to enhance and articulate their research skills.

Careers in Healthcare and Beyond Evelyn M.

Lee, 2021-07-28 According to the U.S. Bureau of Labor Statistics, some of the fastest projected job growth will occur in the healthcare, healthcare support and personal care fields which accounts for almost one third of the total employment growth by 2020. Analysts suggest that the healthcare field is growing because of the long-term trends of an aging population and improved diagnosing and treatment options. Additionally, technology advances in telemedicine and telehealth are allowing elderly patients to remain in their homes as they age even though their health needs are increasing. All these advances and changes to payment structures are fueling the employment growth opportunities in healthcare. This book is intended for someone curious to learn more about a career in healthcare, but not certain if it is right for them, or if the industry would be a good fit for them. For the person who is already interested in pursuing a career in healthcare, it provides added excitement to continue on this path. For the person who is less certain, it explores in a narrative format, the unique opportunities that are available in healthcare, and career options that are not obvious to the general public. It is designed to provide added insights and stories that will inspire one to learn more about the field of healthcare and the many opportunities to consider. It will encourage readers to explore ways to gain hands-on experience to determine what is the best approach for them to take to start this journey. This book is also intended for those who currently work in healthcare but may be considering a different job in the field.

Magazine Photo Collage: A Multicultural Assessment And Treatment Technique Helen B. Landgarten, 2017-07-05 In this volume, a noted art therapist describes the Magazine Photo Collage MPC projective test and demonstrates its value for therapists working with adults and children of all ages. A highly effective assessment and treatment technique, the MPC is simple to administer and easy for patients to produce, even if they are uncomfortable creating images through drawing, painting, or sculpture. Moreover, unlike most projective tests, the MPC is not culture-bound: by matching the photos provided with the patient's ethnicity, the therapist can enable the patient to reveal conflicts more easily.; The book includes 26 case studies of patients from various ethnic and age groups and 96 full-page examples of MPC, reproduced and analyzed. The cases cover obsessive-compulsive disorder, anorexia and bulimia nervosa, post-traumatic stress disorder, suicidal ideation, acting-out behaviour, attention deficit disorder, drug abuse, schizophrenia, sexual problems, and other difficulties.

Memory's Shadow Lindsay Holton, 2010

The Uses of Photography Jill Dawsey, Pamela M. Lee, Benjamin Young, Judith Rodenbeck, David Antin, 2016-09-21
The Uses of Photography examines a network of artists who were active in Southern California between the late 1960s and early 1980s and whose experiments with photography opened the medium to a profusion of new strategies and subjects. These artists introduced urgent social issues and themes of everyday life into the seemingly neutral territory of conceptual art, through photographic works that took on hybrid forms, from books and postcards to video and text-and-image installations. Tracing a crucial history of photoconceptual practice, The Uses of Photography focuses on an artistic community that formed in and around the young University of California San Diego, founded in 1960, and its visual arts department, founded in 1967. Artists such as Eleanor Antin, Allan Kaprow, Fred Lonidier, Martha Rosler, Allan Sekula, and Carrie Mae Weems employed photography and its expanded forms as a means to dismantle modernist autonomy, to contest notions of photographic truth, and to engage in political critique. The work of these artists shaped emergent accounts of postmodernism in the visual arts

and their influence is felt throughout the global contemporary art world today. Contributors include David Antin, Pamela M. Lee, Judith Rodenbeck, and Benjamin J. Young. Published in association with the Museum of Contemporary Art San Diego. Exhibition dates: Museum of Contemporary Art San Diego: September 24, 2016–January 2, 2017
