Heavenly Bodies Ola Sigurdson, 2016-07-30 Deep and wide study of 2,000 years of Christian thought on the human body Does Christianity scorn our bodies? Friedrich Nietzsche thought so, and many others since him have thought the same. Ola Sigurdson contends, to the contrary, that Christianity — understood properly — in fact affirms human embodiment. Presenting his constructive contributions to theology in relation to both historical and contemporary conceptions of the body, Sigurdson begins by investigating the anthropological implications of the doctrine of the incarnation. He then delves into the concept of the gaze and discusses a specifically Christian gaze of faith that focuses on God embodied in Jesus. Finally, he weaves these strands into a contemporary Christian theology of embodiment. Sigurdson's profound engagement with the whole history of Christian life and thought not only elucidates the spectrum of Christian perspectives on the body but also models a way of thinking historically and systematically that other theologians will find stimulating and challenging.

The Cambridge Handbook of Cognitive Aging Ayanna K. Thomas, Angela Gutchess, 2020-05-28 Decades of research have demonstrated that normal aging is accompanied by cognitive change. Much of this change has been conceptualized as a decline in function. However, age-related changes are not universal, and decrements in older adult performance may be moderated by experience, genetics, and environmental factors. Cognitive aging research to date has also largely emphasized biological changes in the brain, with less evaluation of the range of external contributors to behavioral manifestations of age-related decrements in performance. This handbook provides a comprehensive overview of cutting-edge cognitive aging research through the lens of a life course perspective that takes into account both behavioral and neural changes. Focusing on the fundamental principles that characterize a life course approach - genetics, early life experiences, motivation, emotion, social contexts, and lifestyle interventions - this handbook is an essential resource for researchers in cognition, aging, and gerontology.

Noetics Lawrence Krader,Cyril Levitt,2010 Noetics is Lawrence Krader's magnum opus, which he began while still an undergraduate philosophy major at the City College of New York in the 1930s. By examining the architectonics of some of the greatest thinkers in history - Aristotle, Plato, Descartes, Leibniz, Spinoza, Kant, Hegel, and Husserl among others - as works of art combining myth, speculation and empirical science, Krader tackles one of the central problems of the philosophy of science: what is science and how does it relate to human thinking and knowing more generally. Building on his theories concerning the different orders of nature adumbrated in his *Labor and Value* (2003), he follows not only the lines of development of the three fields of science corresponding to three orders of nature (material, quantum, and human) but also examines the development of all three as human processes and products. Krader takes up the relations of thinking and knowing in conjunction with emotions, feelings and judgment and examines the processes of abstraction as one of the key and unique features of human being and knowing. He proposes noetics as a science of thinking and knowing and establishes its relation to the natural sciences, the human sciences, and the arts. The breadth and depth of Krader's scholarship is stunning and evokes Spinoza's thought that «all things excellent are as difficult as they are rare.»

Revisiting the Contracts Scholarship of Stewart Macaulay Jean Braucher, John Kidwell, William C. Whitford, 2013-01-14 This book contains the papers prepared for a conference held at the Wisconsin Law School in 2011 to honour the work of Stewart Macaulay, one of the most famous contracts scholars of his generation. Macaulay has been writing about contracts and contract law for over 50 years; the 1960s were particularly productive years for him, when he introduced many novel ideas into the scholarly world. Macaulay's foundational work for what is now called relational contract theory was published during this period. Macaulay is also known for his use of empirical research and interdisciplinary theories to illuminate our knowledge of contracting practices. The papers in this volume reflect, in diverse ways, on the subsequent influence and the contemporary relevance of Macaulay's work. All the contributors are important contracts scholars in their own right: David Campbell and John Wightman from the UK, Brian Bix, Jay Feinman, Robert Gordon, Claire Hill, Charles Knapp, Ethan Leib, Deborah Post, Edward Rubin, Carol Sanger, Robert Scott, Gordon Smith, Josh Whitford (with Li-Wen Lin) and William Woodward from the USA. The volume also reproduces Macaulay's most cited paper, 'Non-Contractual Relations in Business', and excerpts from two other important papers of his, 'Private Legislation and the Duty to Read-Business Run by IBM Machine, the Law of Contracts and Credit Cards', and 'The Real and The Paper Deal: Empirical Pictures of Relationships, Complexity and the Urge for Transparent Simple Rules'.

Music and Digital Media Georgina Born, 2022-09-12 Anthropology has neglected the study of music and this needs to be redressed. This book sets out to show how and why. It does so by bringing music to the subfield of digital anthropology, arguing that digital anthropology has much to gain by expanding its horizons to music – becoming more interdisciplinary by reference to digital/media studies, music and sound studies. Music and Digital Media is the first comparative ethnographic study of the impact of digital media on music worldwide. It offers a radical and lucid new theoretical framework for understanding digital media through music, showing that music is today where the promises and problems of the 'digital' assume clamouring audibility – while acting as a testing ground for innovations in the digital-cultural industries. The book contains ten chapters, eight of which present comprehensive original ethnographies. The chapters between them address popular, folk and art musics in the global South and North, including Kenya, Argentina, India, Canada and the UK/Europe, with each chapter providing a different regional or digital focus. The book is unique in bringing ethnographic research on popular, folk and art musics from the global North and South into a comparative framework on a large scale, and creates an innovative new paradigm for comparative anthropology. Praise for Music and Digital Media 'This exciting volume forges new ground in the study of local conditions, institutions, and sounds of digital music in the Global South and North. The book's planetary scope and its commitment to the "messiness" of ethnographic sites and concepts amplifies emergent configurations and meanings of music, the digital, and the aesthetic.' Marina Peterson, University of Texas, Austin 'The global drama of music's digitisation elicits extreme responses – from catastrophe to piratical opportunism – but between them lie more nuanced perspectives. This timely, absolutely necessary collection applies anthropological understanding to a deliriously immersive field, bringing welcome clarity to complex processes whose impact is felt far beyond what we call music.' David Toop, London College of Communication 'Spanning continents and academic disciplines, the rich ethnographies contained in Music and Digital Media makes it obligatory reading for anyone wishing to understand the complex, contradictory, and momentous effects that digitization is having on

musical cultures.' Eric Drott, University of Texas, Austin 'This superb collection, with an authoritative overview as its introduction, represents the state of the art in studies of the digitalisation of music. It is also a testament to what anthropology at its reflexive best can offer the rest of the social sciences and humanities.' David Hesmondhalgh, University of Leeds 'Music and Digital Media is a groundbreaking update to our understandings of sound, media, digitization, and music. Truly transdisciplinary and transnational in scope, it innovates methodologically through new models for collaboration, multi-sited ethnography, and comparative work. It also offers an important defense of—and advancement of—theories of mediation.' Jonathan Sterne, McGill University 'Music and Digital Media is a nuanced exploration of the burgeoning digital music scene across both the global North and the global South. Ethnographically rich and theoretically sophisticated, this collection will become the new standard for this field.' Anna Tsing, co-editor of *Feral Atlas: The More-than-Human Anthropocene*

A Companion to Adorno Peter E. Gordon, Espen Hammer, Max Pensky, 2020-02-25 A definitive contribution to scholarship on Adorno, bringing together the foremost experts in the field As one of the leading continental philosophers of the last century, and one of the pioneering members of the Frankfurt School, Theodor W. Adorno is the author of numerous influential—and at times quite radical—works on diverse topics in aesthetics, social theory, moral philosophy, and the history of modern philosophy, all of which concern the contradictions of modern society and its relation to human suffering and the human condition. Having authored substantial contributions to critical theory which contain searching critiques of the 'culture industry' and the 'identity thinking' of modern Western society, Adorno helped establish an interdisciplinary but philosophically rigorous study of culture and provided some of the most startling and revolutionary critiques of Western society to date. The Blackwell Companion to Adorno is the largest collection of essays by Adorno specialists ever gathered in a single volume. Part of the acclaimed Blackwell Companions to Philosophy series, this important contribution to the field explores Adorno's lasting impact on many sub-fields of philosophy. Seven sections, encompassing a diverse range of topics and perspectives, explore Adorno's intellectual foundations, his critiques of culture, his views on ethics and politics, and his analyses of history and domination. Provides new research and fresh perspectives on Adorno's views and writings Offers an authoritative, single-volume resource for Adorno scholarship Addresses renewed interest in Adorno's significance to contemporary questions in philosophy Presents over 40 essays written by international-recognized experts in the field A singular advancement in Adorno scholarship, the Companion to Adorno is an indispensable resource for Adorno specialists and anyone working in modern European philosophy, contemporary cultural criticism, social theory, German history, and aesthetics.
