Fractured Scenes Damien Charrieras, François Mouillot, 2021-03-29 Fractured Scenes is the first extensive academic account of music and sound art practices that fall outside of the scope of 'mainstream music' in Hong Kong. It combines academic essays with original interviews conducted with prominent Hong Kong underground/independent musicians and sound artists as well as first hand-accounts by key local scene actors in order to survey genres such as experimental/noise music, deconstructed electronic music, indie-pop, punk, garage rock, sound art and DIY 'computer' music (among others). It examines these Hong Kong underground music practices in relief with specific case studies in Mainland China and Japan to begin re-defining the notion of a 'musical underground' in the context of contemporary Hong Kong.

Designing Sound Andy Farnell, 2010-08-20 A practitioner's guide to the basic principles of creating sound effects using easily accessed free software. Designing Sound teaches students and professional sound designers to understand and create sound effects

starting from nothing. Its thesis is that any sound can be generated from first principles, guided by analysis and synthesis. The text takes a practitioner's perspective, exploring the basic principles of making ordinary, everyday sounds using an easily accessed free software. Readers use the Pure Data (Pd) language to construct sound objects, which are more flexible and useful than recordings. Sound is considered as a process, rather than as data—an approach sometimes known as “procedural audio.” Procedural sound is a living sound effect that can run as computer code and be changed in real time according to unpredictable events. Applications include video games, film, animation, and media in which sound is part of an interactive process. The book takes a practical, systematic approach to the subject, teaching by example and providing background information that offers a firm theoretical context for its pragmatic stance. [Many of the examples follow a pattern, beginning with a discussion of the nature and physics of a sound, proceeding through the development of models and the implementation of examples, to the final step of producing a Pure Data program for the desired sound. Different synthesis methods are discussed, analyzed, and refined throughout.] After mastering the techniques presented in *Designing Sound*, students will be able to build their own sound objects for use in interactive applications and other projects

Women in the Studio Paula Wolfe, 2019-06-25 The field of popular music production is overwhelmingly male dominated. Here, Paula Wolfe discusses gendered notions of

creativity and examines the significant under-representation of women in studio production. Wolfe brings an invaluable perspective as both a working artist-producer and as a scholar, thereby offering a new body of research based on interviews and first-hand observation. Wolfe demonstrates that patriarchal frameworks continue to form the backbone of the music industry establishment but that women's work in the creation and control of sound presents a potent challenge to gender stereotyping, marginalisation and containment of women's achievements that is still in evidence in music marketing practices and media representation in the digital era.

Major Labels Kelefa Sanneh, 2022-10-04 One of Oprah Daily's 20 Favorite Books of 2021 • Selected as one of Pitchfork's Best Music Books of the Year “One of the best books of its kind in decades.” —The Wall Street Journal An epic achievement and a huge delight, the entire history of popular music over the past fifty years refracted through the big genres that have defined and dominated it: rock, R&B, country, punk, hip-hop, dance music, and pop Kelefa Sanneh, one of the essential voices of our time on music and culture, has made a deep study of how popular music unites and divides us, charting the way genres become communities. In *Major Labels*, Sanneh distills a career’s worth of knowledge about music and musicians into a brilliant and omnivorous reckoning with popular music—as an art form (actually, a bunch of art forms), as a cultural and economic force, and as a tool that we use to build our identities. He explains the history of slow jams, the genius of Shania Twain, and why rappers are always getting in trouble. Sanneh shows how these genres have been defined by the tension between mainstream and outsider, between authenticity and phoniness, between good and bad, right and wrong. Throughout, race is a powerful touchstone: just as there have always been Black audiences and white audiences, with more or less overlap depending on the moment, there has been Black music and white music, constantly mixing and separating. Sanneh debunks cherished myths, reappraises beloved heroes, and upends familiar ideas of musical greatness, arguing that sometimes, the best popular music isn’t transcendent. Songs express our grudges as well as our hopes, and they are motivated by greed as well

as idealism; music is a powerful tool for human connection, but also for human antagonism. This is a book about the music everyone loves, the music everyone hates, and the decades-long argument over which is which. The opposite of a modest proposal, Major Labels pays in full.

The Life, Death, and Afterlife of the Record Store Gina Arnold, John Dougan, Christine Feldman-Barrett, Matthew Worley, 2023-06-15 Once conduits to new

music, frequently bypassing the corporate music industry in ways now done more easily via the Internet, record stores championed the most local of economic enterprises, allowing social mobility to well up from them in unexpected ways. Record stores speak volumes about our relationship to shopping, capitalism, and art. This book takes a comprehensive look at what individual record stores meant to individual people, but also what they meant to communities, to musical genres, and to society in general. What was their role in shaping social practices, aesthetic tastes, and even, loosely put, ideologies? From women-owned and independent record stores, to Reggae record shops in London, to Rough Trade in Paris, this book takes on a global and interdisciplinary approach to evaluating record stores. It collects stories and memories, and facts about a variety of local stores that not only re-centers the record store as a marketplace of ideas, but also explore and celebrate a neglected personal history of many lives.
