StarCraft: Evolution Timothy Zahn,2016-11-08 An action-packed novel that ushers in a new age of adventure in the critically acclaimed StarCraft series from Blizzard Entertainment The #1 New York Times bestselling author of Thrawn pens the latest chapter in the stunning StarCraft saga, building on the game's rich legacy to create an unforgettable new story. After nearly a decade of brutal warfare, three mighty factions—the enigmatic protoss, the savage zerg, and the terrans, humanity's descendants in the sector—have entered a cease-fire, but the peace is tenuous at best. When the sudden restoration of an incinerated planet is brought to light, tensions erupt. Neutrality swings back to hostility, and old enemies are accused of developing biological weapons to reignite the bitter conflict. An expedition of terran and protoss soldiers and researchers is deployed to investigate the mysterious zerg planet and its inhabitants' intentions. But the lush alien landscape is host to other denizens, creatures shrouded in shadow, and should they be unleashed, they will change the fate of the entire galaxy.

Technology as Magic Richard Stivers,Peter Stirk,2001-08-01 What gives the mass media, particularly advertising and television, their extraordinary power over our lives, so that even the most jaded and sophisticated among us are troubled and fascinated by their allure? The secret, according to Richard Stivers, in this brilliant new book, lies in the curious relationship between technology and magic. Stivers argues the two are now related to one another in such a way that each has taken on important characteristics of the other. His contention is that our expectations for technology have become magical to the point that they have generated a multitude of imitation technologies that function as magical practices. These imitation technologies flourish in the fields of psychology, management administration, and the mass media, and their paramount purpose in human adjustment and control. Advertising and television programs, in particular, contain the key magical rituals of our civilization. In a fascinating analysis of television programming, Stivers shows how various genres--news, sports, game shows, soap operas, sitcoms, etc.--have their distinct mythological symbols. Through dramatized information, they symbolically connect consumer goods and services to desired outcomes--the utopian goals of success, happiness, and health--thus enveloping technology, both real and imitation, in a magical cocoon.
