Spy Camera Michael Pritchard,Douglas St. Denny,1993 Spy, subminiature and detective cameras have long held a fascination for collectors and the general public alike, who often associate these cameras with the Cold War period of the 1950s. The desire to make small and disguised cameras, however, goes back much further, as far as the 1860s - although it was not until the more sensitive plates of the 1880s and, later, rollfilms were developed that subminiature cameras began to appear in all sorts of shapes and sizes. Many such cameras are still being made for covert use and industrial espionage -- Dust jacket.

Serengeti Spy Anup Shah,2012-09-19 In these terrific action photos of wildlife on the African savannah in the Serengeti and the Massai Mara, Anup Shah reveals these creatures as never seen before, using remote hidden cameras that have been planted across the plains. This is life on the plains in all its dynamism, cruelty and vitality, the circle of life in action. Readers will find themselves literally face to face with hyenas as they feed on a kill, with elephants communing in a watering hold, playful lion cubs, wildebeests leaping across a ravine, inquisitive monkeys who have discovered the camera and gaze directly into the lens and cheetahs peering back under their tails towards the camera. Many of these animals have actually noticed the camera, mostly by the sound of it clicking away and their interest is clearly piqued; they're certainly not accustomed to encounters with a camera on the ground of their home turf. This is primarily a visual journey through the African plains, but captions written by the author will impart interesting facts about the animals, as well as any activity of interest that may have occurred while the photo was being taken.

The Billion Dollar Spy David E. Hoffman, 2016-05-10 NATIONAL BESTSELLER • A Washington Post Notable Book of the Year • Drawing on previously classified CIA documents and on interviews with firsthand participants, *The Billion Dollar Spy* is a brilliant feat of reporting and a riveting true story of intrigue in the final years of the Cold War. It was the height of the Cold War, and a dangerous time to be stationed in the Soviet Union. One evening, while the chief of the CIA's Moscow station was filling his gas tank, a stranger approached and dropped a note into the car. The chief, suspicious of a KGB trap, ignored the overture. But the man had made up his mind. His attempts to establish contact with the CIA would be rebuffed four times before he thrust upon them an envelope whose contents would stun U.S. intelligence. In the years that followed, that man, Adolf Tolkachev, became one of the most valuable spies ever for the U.S. But these activities posed an enormous personal threat to Tolkachev and his American handlers. They had clandestine meetings in parks and on street corners, and used spy cameras, props, and private codes, eluding the ever-present KGB in its own backyard—until a shocking betrayal put them all at risk.

Spy Capitalism Jonathan E. Lewis, 2008-10-01 What happens when the world of venture capital collides with the world of espionage? To find the answer, Jonathan E. Lewis takes us inside the executive suite at Itek Corporation during the Cold War years from 1957 to 1965. Itek was manufacturing the world's most sophisticated satellite reconnaissance cameras, and the information these cameras provided about Soviet missiles and military activity was critical to U.S.

security. So was Itek. This intriguing book examines in unprecedented detail the challenges Itek faced not only as a contractor for the most important national security program of the time—the CIA's Project CORONA spy satellite—but also as a start-up company competing with established industrial giants. In telling the story of Itek Corporation, Lewis fills important gaps in the history of American intelligence, business history, and management studies. In addition, he addresses a variety of important themes such as the compatibility of secrecy and capitalism, the struggle between profits and patriotism, and the workings of power and connections in America. Lewis explores how Itek executives contended with myriad business problems that were compounded by the need to raise capital without revealing the complete truth about the company's highly secret business. He also presents for the first time information about Laurance Rockefeller's venture capital operations and his role in financing Itek, based on the financier's private Itek papers. The book is both a remarkable case study of a company at the heart of the American intelligence-industrial complex during the Cold War and a thought-provoking examination of the impact of the CIA on the capitalist system it was created to defend.

Peter Weir's "The Truman Show": The Ultimate Hidden Camera Special Nadine Klemens, 2007-07-16 Seminar paper from the year 2002 in the subject Communications - Movies and Television, grade: 1,0 (A), Technical University of Braunschweig (English Seminar), course: HS Documentary Film, 16 entries in the bibliography, language: English, abstract: Through a spy hole in a bathroom cabinet we see a man in pajamas talking to himself in the mirror. Or is he talking to us? After a while, we hear a voice of a woman, telling him that he will be late. With a sigh, the man turns around and leaves the bathroom. On a black screen, we read Day 10, 909- then we see the man through another spy hole, dressed in a business suit, leaving his house for work. He greets his

neighbors with a wide grin, and the neighbors enthusiastically greet back. As he adds Oh, and in case I don't see ye: Good afternoon, good evening and good night , they react as though they think this was extremely funny. When the dog of his next-door neighbor comes to greet him, the man freezes, on his face an expression of terror. He waits till the dog moves back and is about to get in his car when the camera suddenly pans and we see a theatrical light falling out of the sunny sky. Suspiciously, the man goes to examine what has crashed down on the street in front of his house. He does not know what to think of the light, which has a tag on it, designating it as Sirius. In disbelief, he gazes into the sky- is this how stars look like? The man is called Truman Burbank, and we are watching Peter Weir's movie The Truman Show (1998). The movie is not a typical feature film as it mixes feature film elements and docu-soap elements. By confronting his audience with elements of its daily TV-programming, the docu-soap, Peter Weir establishes a satire of the media that leaves its viewers with the uneasy feeling that reality is not always what it appears to be. This work gives a short summary of the movie, as well as it depicts its style and structure. Furthermore, Peter Weir's thematic concerns are explained. The
