*Revitalizing Entrepreneurship Education* Karin Berglund,Karen Verduyn,2018-01-19 Within mainstream scholarship, it's assumed without question that entrepreneurship and entrepreneurship education are desirable and positive economic activities. Drawing on a wide range of theoretical approaches and political-philosophical perspectives, critical entrepreneurship studies has emerged to ask the questions which this assumption obscures. Students of entrepreneurship need to understand why and how entrepreneurship is seen as a moral force which can solve social problems or protect the environment, or even to tackle political problems. It is time to evaluate how such contributions and insights have entered our classrooms. How much – if any – critical discussion and insight enters our classrooms? How do we change when students demand to be taught how to do it, not to be critical or reflexive? If educators are to bring alternative perspectives into the classroom, it will entail a new way of thinking. There is a need to share ideas and practical approaches, and that is what the contributions to this volume aim to do and to illuminate new ways forward in entrepreneurship education.

**Understanding Entrepreneurship** Bjerke, B.,2007-03-27 The importance of the entrepreneur as a human being is strongly expressed, as is the idea that entrepreneurship is closer to art and aesthetics than science and mathematics. Language, argues the author, plays a decisive role and philosophy provides a s

*Teaching and Learning at Business Schools* Pär Mårtensson,Magnus Bild,2016-04-01 Business schools are facing ever increasing internationalization: students are far less homogenous than before, faculty members come from different countries, and teaching is carried out in second (or even third) languages. As a result business schools and their teachers wrestle with new challenges as these changes accelerate. *Teaching and Learning at Business Schools* brings together contributions from business school managers and educators involved in the International Teachers Programme; a faculty development programme started by Harvard Business School more than 30 years ago and now run by a consortium of the London Business School, Manchester Business School, Kellogg, Stern School of Business, INSEAD, HEC Paris, IAE Aix-en-Provence, IMD, SDA Bocconi Milan and Stockholm School of Economics. The book tackles themes both within the classroom - teaching across different contexts and cultures - and outside the classroom - leading and developing business schools, designing and running programmes, developing faculty members. The authors provide direction, ideas and techniques for transforming business education that are accessible to everyone.

**Collaborative Research in Organizations** Niclas Adler,Alexander Styhre,2004 'Collaborative Research in Organizations' leverages and sustains the role of management research while increasing the theoretical development of complex organizational and management issues.

Elite Business Schools Mikael Holmqvist,2021-12-20 Social scientists are paying increasing attention to the business and financial elites: There's a great need to understand who these elites are, what they do, and what makes them tick, as individuals but also as a class. By examining elite business schools, the institutions that train and prepare people to assume important leadership and decision-making positions in business, finance and related sectors, we may also learn how the economic elites are made. A key argument in this book is that elite schools are known to create powerful groups in society, offering them the intellectual and analytical means to act as leaders, but, most importantly, the social, moral and aesthetic skills that are deemed necessary to exercise power; in all essential respects elite schools consecrate people. By dominating much of higher education today, and by doing so in a way that creates and reproduces a market-based organization and control of society, elite business schools represent certain interests and ideologies that affect the lives of

most people. In understanding how the modern economy is run, elite business schools, therefore, represent critical study objects. This book, based on an in-depth study of the Stockholm School of Economics (SSE), offers a sociological analysis of the world of elite business schools. Specifically, this book examines the consecration of SSE's students from a number of perspectives and in a number of situations, focusing on student union activities, school culture, faculty behavior, teaching, courses and alumni events, noting the symbolic importance of economics and particularly the school's unique relation among the world's business schools to the Nobel Prize. The book addresses the topics with regards to the sociology of elites, management education and organizational studies and will be of interest to researchers, academics, and students also interested in business history, higher education studies, and sociology of education.

**Inside the "Knowledge Factory"** Heinke Röbbken, 2013-06-29 Heinke Röbbken analyses how American, German and Swedish universities - and particularly business schools - deal with the various expectations they are confronted with. On the basis of neo-institutional theory she argues that a form of institutional schizophrenia can help institutions to comply with external demands without compromising the pursuit of academic reputation which is essential for their inner stability.

**The Entrepreneurial Rise in Southeast Asia** Stavros Sindakis, 2015-01-21 The Entrepreneurial Rise in Southeast Asia examines the start-up scene environments in Singapore, Malaysia, Vietnam, Thailand, and Indonesia. The contributors to this volume explore government strategies to support start-up communities, local challenges, and unique strengths of each country. They answer key questions framing policy and strategic decision-making at the firm, industry, national, and regional levels, such as: How does technological advance occur, and what are the process and institutions involved? Which cultural characteristics serve to promote or impede innovation? And, in what ways is wealth distributed or concentrated?

Producing Management Knowledge Jan Löwstedt, Torbjörn Stjernberg, 2014-06-03 Providing readers with a unique insight into conducting research, this exciting book describes the thought and work processes of researchers as they complete their projects. Engaging and accessible it investigates all the key aspects of this topic and advice on how to conduct interviews, study the everyday life of an organization, and many other standard methods of conducting research. This is not a prescriptive methodology textbook, rather it explores how to approach, think and act in interaction with the empirical field. Comprehensive and accessible, this thought-provoking text shows readers how to develop management investigations skills, and will be invaluable for final year undergraduates, masters and PhD students.

**Creativity and Innovation** Kjell Skogen, Jarle Sjøvoll, 2010 Innovation is the successful realization of new ideas. Creativity is the sine qua non of innovation. This book presents different challenges and opportunities using educational entrepreneurship as a strategy for promoting creativity and innovation in education. It contains selected contributions from the Nordic Entrepreneurship Conference 2008. The book sees educational entrepreneurship as a key factor in the development of personal, occupational, entrepreneurial, and social competences. The topics reviewed include: strategies for innovation in schools \* user-oriented designs for innovative methods in an educational context \* educational entrepreneurship as an ideal and philosophy for learning \* teachers' ideas about educational entrepreneurship \* the status and perception of educational entrepreneurship in the political arena \* entrepreneurial identity among young people in sparsely populated areas \* entrepreneurship in the perspective of a post-modern paradigm \* young enterprises as a learning arena \* the growth of the entrepreneurial school \* management of entrepreneurship.

*The Dynamics Between Entrepreneurship, Environment and Education* Alain Fayolle, 2008-01-01 The book. . . does exactly what the editors say it does, it delivers a rich variety of European research. . . it comprehensively inspires important and worthwhile dialogue. Anne M.J. Smith, International Journal of Entrepreneurship & Innovation This overview of the current research in the field will provide

academics, researchers and policy makers with new insights through which to understand the contextual dimensions and the broadening aspects of the current state-of-the-art in European research. International Journal of Sustainability in Higher Education The authors of the chapters offer a broad variety of topics and approaches that significantly contribute to the understanding of changes in society, and the diversity of the contexts in which entrepreneurship occurs. I am convinced that the book will inspire a dialogue, not only among researchers, but also between research and policy-makers in order that the changes and dynamics of society be better understood. From the foreword by Hans Landström, Lund University, Sweden This book introduces the expanding European dialogue between entrepreneurship, environment and education. It considers the shape, dimensions and horizon of this multidisciplinary landscape in entrepreneurship research. The striking differences and contradictions in entrepreneurial activities, readiness and innovativeness within European countries and the proactive attitude and activities of European competitors impose a demand for a better understanding of the complex dynamics. The Dynamics between Entrepreneurship, Environment and Education reflects how the European landscape of entrepreneurship research is now more complex than ever. It presents an overview of the current state of entrepreneurship research in Europe and also reflects on the future directions of research in this field. The dynamics between entrepreneurship and society are evaluated, and the discussion is then continued from an education perspective. The authors also focus on the ability and capability of different kinds of ventures to compete in different contexts. This comprehensive overview of the current research in the field will provide academics, researchers and policy-makers with new insights through which to understand the contextual dimensions and the broadening aspects of the current state-of-the-art in European research.

**Local Economic and Employment Development (LEED) Entrepreneurship and Higher Education** OECD, 2008-10-10 This book examines the role that higher education institutions are currently playing through teaching entrepreneurship and transferring knowledge and innovation to enterprises and discusses how they should develop this role in the future.

*The Entrepreneurship Research Challenge* Per Davidsson, 2009-01-01 . . . this is a single-authored book; a series of academic papers (some original, some fairly recently published), neatly set around a unifying theme and tied into a comprehensive argument. . . once you have shared Davidsson's insights, stumblings, joys, and humor over some 240 pages, it feels as if he were part of your family. The book sets off with a very clear and helpful introduction that lays out the entrepreneurship phenomenon . . . This book is value adding for a fairly wide academic audience: essentially all those interested in diverse areas of entrepreneurship and innovation, or in questions of methodology, research design and interpretation of, ultimately, any complex, fast paced behavioural and social realities. It does not give us all the answers, thank heavens, but it certainly asks some excellent questions. . . the novice scholar, will find some welcome foothold and guidance. . . this book is simply fun to read; when could you last say that of a research methodology book? Jacqueline Fendt, International Journal of Entrepreneurial Behaviour and Research Unquestionably, Per Davidsson can be considered a leading voice of authority on the study of entrepreneurship as an academic discipline. . . From the initial introduction through to the latter discussions, one aspect of this textbook that immediately makes itself apparent to the reader is Davidsson's markedly personal and deeply engaging writing style. The Entrepreneurship Research Challenge is notably distinct from many of the generic business research methods texts in that it does not attempt to portray an objective toolbox of methodological choices. Instead, the style is such that the reader feels that Davidsson truly wishes for his audience to learn from his unique experiences, opinions and even mistakes. . . the practical advice provided is both insightful and useful. . . this text is not simply about how to go through the motions of the research process. Instead, it makes a very well reasoned attempt to form a basis for the discipline as a whole as well as to address methods to overcome unique challenges while promoting research output that is useful. For these reasons it should be considered essential reading for any entrepreneurship scholar, and in particular, for those at the early stages of their research career. Russell Matthews, International Small Business Journal Entrepreneurship is an emerging, dynamic and

to a considerable extent, unpredictable phenomenon. Thus, it makes for a challenging research subject. In this book, one of the most experienced empiricists in the field has collected some of his most important ideas on how improved conceptualization and research design can make this challenge more manageable. Per Davidsson addresses questions such as: What precisely is entrepreneurship and entrepreneurship research? What unique contribution can it make compared with research in other fields? Conversely, how can scholars with different disciplinary backgrounds best contribute to the study of entrepreneurship? What does the emergent and highly diverse nature of entrepreneurship imply for research design? And what is required from entrepreneurship researchers and practitioners in order for the research to make strong contributions to business and policy practice? This comprehensive, in-depth account of how the emergence of new entrepreneurial activity can be studied will be warmly welcomed by researchers and academics in the areas of entrepreneurship, innovation and methodology and research design.

*How to Change the World* David Bornstein, 2007-09-17 Now published in more than twenty countries, David Bornstein's *How to Change the World* has become the bible for social entrepreneurship--in which men and women around the world are finding innovative solutions to a wide variety of social and economic problems. Whether delivering solar energy to Brazilian villagers, expanding work opportunities for disabled people across India, creating a network of home-care agencies to serve poor people with AIDS in South Africa, or bridging the college-access gap in the United States, social entrepreneurs are pioneering problem-solving models that will reshape the 21st century. *How to Change the World* provides vivid profiles of many such individuals and what they have in common. The book is an *In Search of Excellence* for social initiatives, intertwining personal stories, anecdotes, and analysis. Readers will discover how one person can make an astonishing difference in the world. The case studies in the book include Jody Williams, who won the Nobel Peace Prize for the international campaign against landmines she ran by e-mail from her Vermont home; Roberto Baggio, a 31-year old Brazilian who has established eighty computer schools in the slums of Brazil; and Diana Propper, who has used investment banking techniques to make American corporations responsive to environmental dangers. The paperback edition will offer a new foreword by the author that shows how the concept of social entrepreneurship has expanded and unfolded over the last few years, including the Gates-Buffetts charitable partnership, the rise of Google, and the increased mainstream coverage of the subject. The book will also update the stories of individual social entrepreneurs that appeared in the cloth edition.

**Handbook on the Entrepreneurial University** Alain Fayolle, Dana T. Redford, 2014-01-01 This insightful Handbook offers a lens through which to view entrepreneurship strategy for higher education institutions, as it becomes increasingly necessary for universities to consider changing their strategies, culture and practices to become more entrepreneurial. Is the idea of an entrepreneurial university a myth or a reality? Is the university model capable of adapting to new evolving trends and a more complex professional world? And, what is the impact of entrepreneurship in education? Through extensive research and case studies from some of the leading entrepreneurial thinkers around the world, Alain Fayolle and Dana Redford answer these questions and raise further issues for debate. Particular focus is given to developing university strategy, public policy and start-up support as a means to foster graduate entrepreneurship. Each contribution explores different perspectives related to the entrepreneurial university concept and its role in stimulating economic growth through cooperative relationships with business and government. As a comprehensive study of the entrepreneurial university, this Handbook will prove invaluable to business and entrepreneurship students and academics, as well as university administrators, researchers and others interested in the evolution of the university.

## Entrepreneurship Introduction

In the digital age, access to information has become easier than ever before. The ability to download Sses Stockholm School Of Entrepreneurship has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Sses Stockholm School Of Entrepreneurship has opened up a world of possibilities. Downloading Sses Stockholm School Of Entrepreneurship provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Sses Stockholm School Of Entrepreneurship has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are

numerous websites and platforms where individuals can download Sses Stockholm School Of Entrepreneurship. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Sses Stockholm School Of Entrepreneurship. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers.
