Alice and the Golden Egg C J Persson,2021-06-16 A high-frying adventure into a weird and wonderful ramshackle civilization. A grumbly teen who'd be digging it... if her dad weren't dying. Fiskelycka, the Swedish coast. Alice Andersson keeps her feelings buried. Having never quite gotten over her mother leaving, the cynical fourteen-year-old masks her boiling anger and heartbreak with a thick veneer of sarcasm. But her protective façade cracks when a fairy dissolves into fireflies in her garden, depositing a shining egg that attracts a shadowy evil's vicious attack... With the assault putting her father into a coma, Alice desperately searches for a cure deep within a world of myth. Her only hope of avoiding orphanhood is a shrunken giant with questionable ethics and a cat named Lucifer to guide her through the land of troll bureaucracy and winged nightmares to find Yggdrasil - the tree of life - before the egg hatches. Can Alice unscramble a fix and save her dad from doom?' Alice and the Golden Egg is the rollicking first book in the Alice Andersson YA urban fantasy series. If you like quirky characters, zingy dialogue, and shocking twists, then you'll love C.J. Persson's yoke of two realms. Buy Alice and the Golden Egg for a sizzling serving of mythology today! This book was previously published as Alice's Anger.

Physical (A)Causality Karl Svozil,2020-10-08 This book addresses the physical phenomenon of events that seem to occur spontaneously and without any known cause. These are to be contrasted with events that happen in a (pre-)determined, predictable, lawful, and causal way. All our knowledge is based on self-reflexive theorizing, as well as on operational means of empirical perception. Some of the questions that arise are the following: are these limitations reflected by our models? Under

what circumstances does chance kick in? Is chance in physics merely epistemic? In other words, do we simply not know enough, or use too crude levels of description for our predictions? Or are certain events truly, that is, irreducibly, random? The book tries to answer some of these questions by introducing intrinsic, embedded observers and provable unknowns; that is, observables and procedures which are certified (relative to the assumptions) to be unknowable or undoable. A (somewhat iconoclastic) review of quantum mechanics is presented which is inspired by quantum logic. Postulated quantum (un-)knowables are reviewed. More exotic unknowns originate in the assumption of classical continua, and in finite automata and generalized urn models, which mimic complementarity and yet maintain value definiteness. Traditional conceptions of free will, miracles and dualistic interfaces are based on gaps in an otherwise deterministic universe. Digital Audio Broadcasting Wolfgang Hoeg, Thomas Lauterbach, 2004-01-09 Now the standardisation work of DAB (Digital Audio Broadcasting) system is finished many broadcast

organisations, network providers and receiver manufacturers in European countries and outside of Europe (for example Canada and the Far East) will be installing DAB broadcast services as pilot projects or public services. In addition some value added services (data and video services) are under development or have already started as pilot projects. The new digital broadcast system DAB distinguishes itself from existing conventional broadcast systems, and the various new international standards and related documents (from ITU-R, ISO/IEC, ETSI, EBU, EUREKA147, and others) are not readily available and are difficult to read for users. Therefore it is essential that a well structured technical handbook should be available. The Second Edition of Digital Audio Broadcasting has been fully updated with new sections and chapters added to reflect all the latest developments and advances. Digital Audio Broadcasting: Provides a fully updated comprehensive overview of DAB Covers international standards, applications and other technical issues Combines the expertise of leading researchers in the field of DAB Now covers such new areas as: IP-Tunneling via DAB; Electronic Programme Guide for DAB; and Metadata A comprehensive overview of DAB specifically written for planning and system engineers, developers for professional and domestic equipment manufacturers, service providers, as well as postgraduate students and lecturers in communication technology.

Soil pollution: a hidden reality Food and Agriculture Organization of the United Nations, 2018-04-30 This document presents key messages and the state-of-the-art of soil pollution, its implications on food safety and human health. It aims to set the basis for further discussion during the forthcoming Global Symposium on Soil Pollution (GSOP18), to be held at FAO HQ from May 2nd to 4th 2018. The publication has been reviewed by the Intergovernmental Technical Panel on Soil (ITPS) and contributing authors. It addresses scientific evidences on soil pollution and

highlights the need to assess the extent of soil pollution globally in order to achieve food safety and sustainable development. This is linked to FAO's strategic objectives, especially SO1, SO2, SO4 and SO5 because of the crucial role of soils to ensure effective nutrient cycling to produce nutritious and safe food, reduce atmospheric CO₂ and N₂O concentrations and thus mitigate climate change, develop sustainable soil management practices that enhance agricultural resilience to extreme climate events by reducing soil degradation processes. This document will be a reference material for those interested in learning more about sources and effects of soil pollution.

Alice's Anger C. Persson, 2018-11-20 In two days Dad will be dead. To save him, Alice must travel to the northern tip of Sweden, a thousand miles through a dangerous hidden world that she had no idea existed. But bureaucratic trolls and bodybuilding minotaurs are the least of her worries. The mysterious monster that injured Dad could be right behind her. One wrong move might be Alice's last. Problem is, Alice isn't good at being careful. When Mom left, a red hot rage moved into Alice's chest, ready to boil over at any moment. Will she be able to overcome her anger in order to save Dad's life? This is a fast-moving and thrilling book of extraordinary imagination that creates an alternative mythic universe and at the same time has heart, humor, and profound meaning. - Alan

Rinzler, former editor of Hunter S. Thompson and Nobel laureate Toni Morrison. This is the best debut novel I've read in two years [...] I cannot recommend this book highly enough; I was delighted with it from start to finish and am eagerly looking forward to Mr. Persson's next release. - Amazon reviewer.

Coping with Negative Life Events C.R. Snyder, Carol E. Ford, 2013-06-29 Like a Bridge over Troubled Waters The surge of current interest in the interface between clinical and social psychology is well illustrated by the publication of a number of general texts and journals in this area, and the growing emphasis in graduate programs on providing training in both disciplines. Although the benefits of an integrated clinical-social approach have been recognized for a number of years, the recent work in this area has advanced from the theoretical extrapolations of social psychological models to clinical issues to theory and research that is based on social principles and conducted in clinical domains. It is becoming increasingly common to find social psychologists pursuing research with clinical populations and clinical psychologists investigating variables that have traditionally been in the realm of social psychology. A major area of interface between the two disciplines is in research and theory concerned with how individuals respond to negative events. In addition to the trend toward an integrated clinical-social approach, the growing body of literature in this area reflects the explosion of current interest in the area of health psychology; work by clinical and social psychologists on the topics of stress and coping has been one of the major facets of this burgeoning field. The purpose of the present volume is to provide a common forum for recent advances in the clinical and social literature on responses to negative life outcomes.

A History of Experimental Film and Video A.L. Rees, 2019-07-25 Avant-garde film is almost indefinable. It is in a constant state of change and redefinition. In his highly-acclaimed history of experimental film, A.L. Rees tracks the movement of the film avant-garde between the cinema and modern art (with its postmodern coda). But he also reconstitutes the film avant-garde as an independent form of art practice with its own internal logic and aesthetic discourse. In this revised and updated edition, Rees introduces experimental film and video to new readers interested in the wider cinema, as well as offering a guide to enthusiasts of avant-garde film and new media arts. Ranging from Cézanne and Dada, via Cocteau, Brakhage and Le Grice, to the new wave of British film and video artists from the 1990s to the present day, this expansive study situates avant-garde film between the cinema and the gallery, with many links to sonic as well as visual arts. The new edition includes a review of current scholarship in avant-garde film history and includes updated reading and viewing lists. It also features a new introduction and concluding chapter, which assess the rise of video projection in the gallery since the millennium, and describe new work by the latest generation of experimental film-makers. The new edition is richly illustrated with images of the art works discussed.

Building Europe Wilfried Loth, 2015-08-31 Relying on internal sources, Wilfried Loth analyses the birth and subsequent development of the European Union, from the launch of the Council of Europe and the Schuman Declaration until the Euro crisis and the contested European presidential election of Jean-Claude Juncker. This book shines a light on the crises of the European integration, such as the failure of the European Defence Community, De Gaulle's empty chair policy, or the rejection of the European Constitution in France and the Netherlands, but also highlights the indubitable successes that are the Franco-German reconciliation, the establishment of the European common market, and the establishment of an expanding common currency. What this study accomplishes, for the first time, is to illuminate the driving forces behind the European integration process and how it changed European politics and society. "An enlightening work. A required reading for all who doubt the unfinished history of Europe." - Rolf Steininger, Frankfurter Allgemeine Zeitung. "This book will become an indispensable standard work." - Jörg Himmelreich, Neue Zürcher Zeitung.

The Educated Mind Kieran Egan, 2007-12-01 The Educated Mind offers a bold and revitalizing new vision for today's uncertain educational system. Kieran Egan reconceives education, taking into account how we learn. He proposes the use of particular intellectual tools—such as language or literacy—that shape how we make sense of the world. These mediating tools generate successive

kinds of understanding: somatic, mythic, romantic, philosophical, and ironic. Egan's account concludes with practical proposals for how teaching and curriculum can be changed to reflect the way children learn. A carefully argued and readable book. . . . Egan proposes a radical change of approach for the whole process of education. . . . There is much in this book to interest and excite those who discuss, research or deliver education.—Ann Fullick, *New Scientist* A compelling vision for today's uncertain educational system.—*Library Journal* Almost anyone involved at any level or in any part of the education system will find this a fascinating book to read.—Dr. Richard Fox, *British Journal of Educational Psychology* A fascinating and provocative study of cultural and linguistic history, and of how various kinds of understanding that can be distinguished in that history are recapitulated in the developing minds of children.—Jonty Driver, *New York Times Book Review*
