Shelter in a Time of Storm Jelani M. Favors,2019-02-08 2020 Museum of African American History Stone Book Award 2020 Lillian Smith Book Award Finalist, 2020 Pauli Murray Book Prize For generations, historically Black colleges and universities (HBCUs) have been essential institutions for the African American community. Their nurturing environments not only provided educational advancement but also catalyzed the Black freedom struggle, forever altering the political destiny of the United States. In this book, Jelani M. Favors offers a history of HBCUs from the 1837 founding of Cheyney State University to the present, told through the lens of how they fostered student activism. Favors chronicles the development and significance of HBCUs through stories from institutions such as Cheyney State University, Tougaloo College, Bennett College, Alabama State University, Jackson State University, Southern University, and North Carolina A&T. He demonstrates how HBCUs became a refuge during the oppression of the Jim Crow era and illustrates the central role their campus communities played during the civil rights and Black Power movements. Throughout this definitive history of how HBCUs became a vital seedbed for politicians, community leaders, reformers, and activists, Favors emphasizes what he calls an unwritten second curriculum at HBCUs, one that offered students a grounding in idealism, racial consciousness, and cultural nationalism.

Isaac's Storm Erik Larson,2011-10-19 At the dawn of the twentieth century, a great confidence suffused America. Isaac Cline was one of the era's new men, a scientist who believed he knew all there was to know about the motion of clouds and the behavior of storms. The idea that a hurricane could damage the city of Galveston, Texas, where he was based, was to him preposterous, an absurd delusion. It was 1900, a year when America felt bigger and stronger than ever before. Nothing in nature could hobble the gleaming city of Galveston, then a magical place that seemed destined to become the New York of the Gulf. That August, a strange, prolonged heat wave gripped the nation and killed scores of people in New York and Chicago. Odd things seemed to happen everywhere: A plague of crickets engulfed Waco. The Bering Glacier began to shrink. Rain fell on Galveston with greater intensity than anyone could remember. Far away, in Africa, immense thunderstorms blossomed over the city of Dakar, and great currents of wind converged. A wave of atmospheric turbulence slipped from the coast of western Africa. Most such waves faded quickly. This one did not. In Cuba, America's overconfidence was made all too obvious by the Weather Bureau's obsession with controlling hurricane forecasts, even though Cuba's indigenous weathermen had pioneered hurricane science. As the bureau's forecasters assured the nation that all was calm in the Caribbean, Cuba's own weathermen fretted about ominous signs in the sky. A curious stillness gripped Antigua. Only a few unlucky sea captains discovered that the storm had achieved an intensity no man alive had ever experienced. In Galveston, reassured by Cline's belief that no hurricane could seriously damage the city, there was celebration. Children played in the rising water. Hundreds of people gathered at the beach to marvel at the fantastically tall waves and gorgeous pink sky, until the surf began ripping the city's beloved beachfront apart. Within the next few hours Galveston would endure a hurricane that to this day remains the nation's deadliest natural disaster. In Galveston alone at least 6,000 people, possibly as many as 10,000, would lose their lives, a number far greater than the combined death toll of the Johnstown Flood and 1906 San Francisco Earthquake. And Isaac Cline would experience his own unbearable loss. Meticulously researched and vividly written, Isaac's Storm is based on Cline's own letters, telegrams, and reports, the testimony of scores of survivors, and our latest understanding of the hows and whys of great storms. Ultimately, however, it is the story of what can happen when human arrogance meets nature's last great uncontrollable force. As such, Isaac's Storm carries a warning for our time.

The Silent Storm Sherry Garland,1995 Thirteen-year-old Alyssa has not spoken since seeing her parents die in a hurricane, and now, three years later, another storm threatens the home she shares with her grandfather on Galveston Island.

Storm George R. Stewart,2021-08-17 A thrilling, innovative novel about the interplay between nature and humankind by the author of Names on the Land. With Storm, first published in 1941, George R. Stewart invented a new genre of fiction: the eco-novel. California

has been plunged into drought throughout the summer and fall when a ship reports an unusual barometric reading from the far western Pacific. In San Francisco, a junior meteorologist in the Weather Bureau takes note of the anomaly and plots “an incipient little whorl” on the weather map, a developing storm, he suspects, that he privately dubs Maria. Stewart’s novel tracks Maria’s progress to and beyond the shores of the United States through the eyes of meteorologists, linemen, snowplow operators, a general, a couple of decamping lovebirds, and an unlucky owl, and the storm, surging and ebbing, will bring long-needed rain, flooded roads, deep snows, accidents, and death. Storm is an epic account of humanity’s relationship to and dependence on the natural world.

Dreaming the Storm Kari Kilgore,2018-09-21 The Storm Begins. Seeing the future: blessing or curse? For Anne Fincastle, only the number of survivors changes. Few or none. Anne knows the truth. In her heart, her mind, her bones. Only Evan Griffith believes. Can they make a difference for humanity, together? Book One of the Storms of Future Past Series. An excerpt from Dreaming the Storm: Prophets have risen up many times through the ages, claiming to have the gift of seeing the future. Whether certain ones could or not is a debate for another day. What’s not debatable is the most common response by society: to condemn them as insane, with often horrific results. The screen went blank for a second, and Anne wiped her eyes, hoping the horrible movie was over. She didn’t ever want to come back to this library again. Then she saw dots slowly lighting up and glowing, coming to life scattered around the screen. There weren’t very many, not even twenty of them. Lines formed on the screen, and after a second Anne realized those were the lines of the continents. The dots were on the land. She could see a few on each continent, and only five in all of North America. Her fear drew back a little as her curiosity started to recover. What was she looking at? They weren’t near any of the cities she knew. “What is it?” she whispered. The lines of the continents faded in the middle, right around the Atlantic ocean, and words floated to the surface. Pale blue words. Remaining Human Population.
