Acute Stroke Nursing Jane Williams, Lin Perry, Caroline Watkins, 2013-05-07 Stroke is a medical emergency that requires immediate medical attention. With active and efficient nursing management in the initial hours after stroke onset and throughout subsequent care, effective recovery and rehabilitation is increased. Acute Stroke Nursing provides an evidence-based, practical text facilitating the provision of optimal stroke care during the primary prevention, acute and continuing care phases. This timely and comprehensive text is structured to follow the acute stroke pathway experienced by patients. It explores the causes, symptoms and effects of stroke, and provides guidance on issues such as nutrition, continence, positioning, mobility and carer support. The text also considers rehabilitation, discharge planning, palliative care and the role of the nurse within the multi-professional team. Acute Stroke Nursing is the definitive reference on acute stroke for all nurses and healthcare professionals wishing to extend their knowledge of stroke nursing. Evidence-based and practical in style, with case studies and practice examples throughout Edited and authored by recognised stroke nursing experts, clinicians and leaders in the field of nursing practice, research and education The first text to explore stroke management from UK and international perspectives, and with a nursing focus

Ischemic Stroke Bernhard Schaller, 2016-10-19 This book covers all aspects and the most vibrant topics of ischemic stroke research: from basic sciences to latest methods of clinical applications. The authors give an overview of what has importance today in stroke research and also strike future ideas. The diversity of origin of the internationally known authors underlines not only that ischemic stroke research is nowadays global but also that this diversity gives new and valuable inputs to treat our patients.

Stronger After Stroke Peter G Levine, 2008-10-01 Billions of dollars are spent on stroke-related rehabilitation research and treatment techniques but most are not well communicated to the patient or caregiver. As a result, many stroke survivors are treated with outdated or ineffective therapies. Stronger After Stroke puts the power of recovery in the reader's hands by providing simple to follow instructions for reaching the highest possible level of healing. Written for stroke survivors, their caregivers, and loved ones, Stronger After Stroke presents a new and more effective treatment philosophy that is startling in its simplicity: stroke survivors recover by using the same learning techniques that anyone uses to master anything. Basic concepts are covered, including: Repetition of task-specific movements Proper scheduling of practice Challenges at each stage of recovery Setting goals and recognizing when they have been achieved The book covers the basic techniques that can catapult stroke survivors toward maximum recovery. Stronger After Stroke bridges the gap between stroke survivors and what they desperately need: easily understandable and scientifically accurate information on how to achieve optimal rehabilitation.

Highs, Lows, and Plateaus Anne Burleigh Jacobs, PT, PhD, 2014-03 Stroke survivors, health care professionals working in rehabilitation, and anyone whose life has been affected by a stroke, will find critical information in Highs, Lows, and Plateaus. Anne Burleigh Jacobs, PT, PhD, a neuroscientist and a physical therapist with a successful track record of helping patients recover from stroke, explores complex topics in an easy-to-understand and conversational tone. Using real examples and powerful analogies, she leads readers along a path of recovery. From the initial injury, to mechanisms of recovery, to the future of rehabilitation, you will get guidance on: ? recognizing the initial signs of a stroke and the importance of emergency treatment; ? understanding the physical and neural processes associated with rehabilitation; ? understanding the concepts of neuroplasticity that drive recovery of the brain; ? providing

useful resources and ideas to progress one through the stages of recovery from stroke. Dismissing the negative connotations of ?plateau?, this book provides hope and inspiration along the continuum of recovery. Each step along the path is supported by basic science, concepts of neuroplasticity, and the resilience of the human spirit. Filled with illustrations, this guidebook to recovery from stroke also includes information that can be helpful to those who have suffered a traumatic brain or spinal cord injury. Dr. Jacobs is innovative and displays initiative in developing new ideas to help people with neurological disabilities. In her private practice, she was among the first in applying the concepts of neuroplasticity in therapy. Jack and Cyndy Bradley, stroke survivors

Healing the Broken Brain Mike Dow, Dr.,David Dow,2017-05-02 Dr. Mike Dow is a best-selling author, psychotherapist, and relationship expert. So why is he writing a book about stroke? Well, what you probably don't know about Dr. Mike is that his younger brother, David, is a stroke survivor. What's more, David's stroke happened when he only 10 years old. This means most of Dr. Mike's teenage years were spent witnessing what his family was dealing with trying to find the best treatments for David. He struggled to know what to do to help his brother. He watched helplessly as his brother wrestled with depression, trying to find the motivation to recover on top of the challenges of adolescence. He mourned the loss of what could have been —and he was angry. How his family would have loved to sit down with top experts in stroke to find out what they should be doing and have their questions answered. Now Dr. Mike has the ability to do just that, and he's doing it so that others in his family's position don't have the same struggle. Armed with questions from stroke survivors and their loved ones, Dr. Mike talks with the best clinicians across the country to get over 100 answers you need to know to maximize your recovery.

A Brain's Battle Against a Stroke Robert Sussler,2007-05-15 A stroke because it is the blocking of blood flow to tissues within the brain can be life threatening , leave permanent damage, or require the patient to do daily battle with his own brain. The recovery of the stroke patient requires the specialist to treat , to understand and to involve the whole patient and not just the. physical damage and the cause. . Today , medicine concentrates on the physical damage and the cause as determined by the technology and the corrective treatment within each specialty Specialists lack the time to make patients part of the curing . My recovery from a stroke illustrates that the recovery was inadvertently set back and impeded .The failure to recognize my lack of knowledge about my medical problem and to devote the time necessary to make me fully understand the stroke damage left me feeling like medical garbage .Until a specialist took the time to explain the brain damage and its affect in language that I understood , I was my own worst enemy on the road to recovery An early period of medicine , fifty years ago , with more limited scientific knowledge , lacking technology and pharmaceuticals, had to focus on the whole patient , to motivate their recuperative natural will to recover .They understood the disease or injury but often knew the recovery was more dependent on the patient than the scientific advancements that did not exist. This book is the clinical history of the author , a stroke victim. The book by recounting his experiences on the road to partial recovery adds a unique additional insight , the authors knowledge of medicine practiced by his dad fifty years earlier.

Stroke Prevention, Treatment, and Rehabilitation David Spence, Henry JM Barnett,2012-05-13 ***IF YOU WANT TO UPDATE THE INFORMATION ON YOUR TITLE SHEET, THEN YOU MUST UPDATE COPY IN THE PRODUCT INFORMATION COPY FIELD. COPY IN THE TIPSHEET COPY FIELD DOES NOT APPEAR ON TITLE SHEETS.*** This book arms any physician with the evidence and tools they need to help patients who have had or at risk of having a stroke in preventing stroke. Market / Audience PRIMARY: Neurologists (18,000 in US) Cardiologists (30,000 in US) SECONDARY: Internists (200,00) About the Book Stroke is the third leading cause of death in the US (with cardiac disease and cancer being number one and two). Annually, 795,000 people in the US suffer a new or recurrent stroke. Approximately 140,000 people die from stroke each year, a figure that has been declining because of what we have learned about daily aspirin, smoking cessation, diet, and surgical procedures to prevent new or recurrent strokes. The 6 million patients alive today who've survived stroke are at the highest risk, yet anyone of a certain age or who has had a mini-stroke, is at higher risk. While more is known than ever about how to prevent stroke, there is still great variability in how stroke prevention is implemented regionally. Challenges in getting patients to comply with stroke prevention measures are also a concern. This book provides an evidence-based approach and practical tools to help any physician help their patients avoid a new or a recurrent stroke. Key Selling Features Makes stroke prevention easy to teach, and easy to comply with. About the Authors David Spence, MD Trained in Neurology with Dr. Barnett before going on to complete training in Internal Medicine, and then a fellowship in Clinical Pharmacology at San Francisco. Has focused on stroke prevention throughout his career. Professor of Neurology and Clinical Pharmacology at the Robarts Research Institute, London, Canada. Ran a hypertension clinic for 20 years; for the past 15 years has run a busy stroke prevention clinic. Pioneered ultrasound measurement of carotid plaque for patient management, genetic research and evaluation of new therapies. Published in 2006 a book for the public; How to prevent your stroke. Wife and first son are family physicians; has done a lot of continuing medical education to family physicians around the world. Selected by the World Congress of Neurology in 2009 to teach the course on stroke prevention. Henry JM Barnett, MD A giant in stroke prevention: first to show that Aspirin reduced the risk of stroke; led the study that showed that carotid endarterectomy reduced the risk of stroke in patients with symptomatic carotid stenosis, and the study that showed that extra-cranial to intracranial bypass was not effective. Founding chair of the department of Clinical Neurological Sciences at the University of Western Ontario, in

which Neurology and Neurosurgery joined to form a department separate from Medicine and Surgery. This model, which he pioneered with his neurosurgical colleague Charlie Drake, has been copied successfully the world over. Former editor of the journal Stroke, and internationally recognized as the father of stroke prevention.

Hemorrhagic Stroke Amit Agrawal,2017-10-04 The present book Hemorrhagic Stroke - An Update includes the updated information for professionals who are involved in the management of spontaneous intracerebral hemorrhage. This book contains detailed information about the pathophysiology of spontaneous intracerebral hemorrhage, neuroimaging approach in intracerebral hemorrhage, how to go about surgical intervention decision-making in these patients, and the rehabilitation issues in acute care and in long-term survivors. I hope that the collective contribution from the experts will make this book a valuable guide to further develop their understanding about spontaneous intracerebral hemorrhage. I am grateful to all the authors who have contributed their tremendous expertise to the present book and to my wife and daughter for their passionate support, and last but not least, I wish to acknowledge the outstanding support of Ms. Romina Skomersic, Publishing Process Manager, InTech Open Science, Croatia, who collaborated tirelessly in crafting this book.
