Joaquin Trujillo

The History of Superior, Wisconsin to 1900 Helen Marie Wolner,1939

Living Superior, Arizona, from 1930 to 1950 Joaquin Trujillo, This book tells the history of Superior, Arizona, from the years 1930 to 1950. Superior is located in the central part of the state just inside the southern boundary of the Tonto National Forest. The town was the home of the Magma mine, which was owned by the Magma Copper Company. The Magma mine was an underground, or "hard rock," copper mine. It operated continuously from 1910 to 1982, was one of the most productive mines in US history, and also included a smelter, mill, and railroad. The book hermeneutically (interpretively) merges into a single narrative the oral histories of 15 persons who were born between 1923 and 1934 and lived in Superior during all or most of 1930 through 1950. The purpose of combining the contributions into a single story was to yield a thicker, more corroborated history of the town than otherwise would have been possible by presenting them separately. Supplementing the narrative are a (1) historiographical description of the town and mine, (2) sociological analysis of their relationship, the community's solidarity, and the segregation experienced among Mexican, Caucasian, Native American, and African American residents, (3) description of the personal meaning of underground mining, and (4) review of methods.

Superior Angela Saini,2019-05-21 2019 Best-Of Lists: 10 Best Science Books of the Year (Smithsonian Magazine) · Best Science Books of the Year (NPR's Science Friday) · Best Science and Technology Books from 2019" (Library Journal) An astute and timely examination of the re-emergence of scientific research into racial differences. Superior tells the disturbing story of the persistent thread of belief in biological racial differences in the world of science. After the horrors of the Nazi regime in World War II, the mainstream scientific world turned its back on eugenics and the study of racial difference. But a worldwide network of intellectual racists and segregationists quietly founded journals and funded research, providing the kind of shoddy studies that were ultimately cited in Richard Herrnstein and Charles Murray's 1994 title *The Bell Curve*, which purported to show differences in intelligence among races. If the vast majority of scientists and scholars disavowed these ideas and considered race a social construct, it was an idea that still managed to somehow survive in the way scientists thought about human variation and genetics. Dissecting the statements and work of contemporary scientists studying human biodiversity, most of whom claim to be just following the data, Angela Saini shows us how, again and again, even mainstream scientists cling to the idea that race is biologically real. As our understanding of complex traits like intelligence, and the effects of environmental and cultural influences on human beings, from the molecular level on up, grows, the hope of finding simple genetic differences between "races"—to explain differing rates of disease, to explain poverty or test scores, or to justify cultural assumptions—stubbornly persists. At a time when racialized nationalisms are a resurgent threat throughout the world, Superior is a rigorous, much-needed examination of the insidious and destructive nature of race science—and a powerful reminder that, biologically, we are all far more alike than different.

Superior Tapestry Deborah K. Frontiera,2021 Like any tapestry, the threads of history cross over and under each other in different points of view and places in time. Award-winning author Deborah K. Frontiera mixes natural science and geology into history where those aspects intersect with the lives of people or are the reason Michigan's Upper Peninsula developed the way it did. Enjoy this work's unique perspective, the point of view of trees, rocks, rivers and artifacts—among them a ship's bell, a lighthouse, a cross-cut saw, beads and rings given in trade, a bent propeller and many more. Students, adults and families will enjoy experiencing history in this unique way. Deborah K. Frontiera takes U.P. history and turns it into a fun story, told by its least appreciated players. Here, we have the perspective of the St. Mary's River, the bell on the Edmund Fitzgerald, an early iron forge, a sauna, the Bishop Baraga statue and many, many more. Together, they make Superior Tapestry a diverse and refreshing alternative to more straightforward historical narratives, while educating us in entertaining ways and, once again, displaying the creativity of Yooper culture. -- Tyler R. Tichelaar, Ph.D. in literature and award-winning author of *Haunted Marquette* and *Kawbawgam: The Chief, The Legend, The Man* Frontiera has a knack for bringing inanimate objects to life and imbuing them with observational skills that let the reader see the world around the objects through their eyes. Human time is dwarfed when compared to the span of time experienced by some of the objects Frontiera describes. This book is such an interesting read; I'll be using it as my guide when exploring the nooks and crannies of the Upper Peninsula in Michigan. -- Linda Martin-Rust, Ph.D. What a fun way to learn about our Upper Peninsula history; a great book for all ages. Superior Tapestry will become one of your favorite UP books. -- Tony Bausano, president of Copper World Gift Shop, Calumet, Michigan Deborah Kay Olson Frontiera grew up in Lake Linden, Michigan. She taught in Houston public schools from 1985 until 2008 and then taught creative writing part-time for Houston's WITS (Writers In The Schools) program. Superior and Queen Valley Carol A. Schumacher,Danielle M. Tomerlin,2011 Superior and Queen Valley share a rich history. Superior began with the establishment of Generals Stoneman and Crook's military installation to ward off Apache raids in the 1870s. Soon thereafter, while digging for a new road, a soldier named Sullivan discovered Arizona's richest silver deposit, later known as the Silver King Mine. Then with the help of Col. Boyce Thompson, who developed the Magma Copper Company, Superior also became Arizona's biggest copper operation. In 1915, Queen Valley began with Hart Mullins, the area's first official homesteader. Hart worked as a Superior Route stagecoach hand and helped develop a route from Phoenix through Superior and Queen Valley. Today both Superior and Queen Valley remain two towns where the rich history and close-knit community culture of the Old West are alive and well.

Brough Superior Peter Miller,2009-10-15 George Brough started building motorcycles shortly after the First World War. The machines were named Brough Superior both to distinguish them from his father's Brough machines and to denote the highest levels of performance and quality of manufacture. Throughout the 1920s and 1930s, the name Brough Superior was synonymous with the very best in motorcycle design. The machines gained fame in the hands of riders such as Bert le Vack, Eric Fernihough, Noel Pope and, of course, T. E. Lawrence 'Lawrence of Arabia'. This book documents the full story of Brough and Brough Superior from the early years of the twentieth century through to the end of production in the Second World War, and post-war attempts at revival.

A Brief History of the Pittsburgh and Lake Superior Iron Company ,1883

North Shore Chel Anderson,Adelheid Fischer,2015 Propelled by wings, fins, legs, and the wind, life has found a way to Minnesota's North Shore for more than twelve thousand years. Some plants and animals have taken up residence in the region's ancient mountains, others in its lakes and flowing rivers. Together, they weave a living fabric of sublime and fascinating beauty. These organisms come to life in North Shore, a comprehensive environmental history of one of Minnesota's most beloved places. The story of this region unfolds through the five interconnected areas of Minnesota's North Shore watershed--the meandering rivers of the Headwaters, the deep and dense forest of the Highlands, the rocky Nearshore, the drama of Lake Superior, and its mysterious islands, including Isle Royale and Susie Island archipelagos. Each section begins with an overview of the forces that have shaped the area, then the focus turns to a wide range of inhabitants, such as chorus frogs and star-nosed moles, butterworts and coaster brook trout, jeweled diatoms and pitcher plants, black bears and blue-spotted salamanders. Each chapter links to the region's broader history, from the sculpting of the land by mile-high glaciers to the role of scientific exploration, the advent of logging, the development of tourism, and the changing global climate. North Shore reminds us that the natural history of this extraordinary region is still being created and that each of us--individually and collectively--are the authors of this ongoing narrative. Compelling and accessible, the book will provide readers with a science-based knowledge of the Minnesota North Shore watershed so that together we can write a new, hopeful chapter for its inhabitants, both human and wild.

Around the Shores of Lake Superior Margaret Beattie Bogue,2007 With its rugged shoreline and deep, cold waters, Lake Superior offers exciting opportunities for travel, exploration, and enjoyment. From the Grand Sable Dunes and Apostle Islands of the south shore to mountain-studded St. Ignace Island and majestic Thunder Cape on the north, the lake is deeply ingrained in North America's cultural and environmental heritage. *Around the Shores of Lake Superior* is an ideal trip planner and a unique guide to the region. As author Margaret Beattie Bogue follows the Lake Superior shoreline clockwise through Minnesota, Ontario, Michigan, and Wisconsin, she evokes the richness of local history and highlights hundreds of landmarks and points of interest that surround the lake. Grand Portage, Fort William Historical Park, the Agawa Canyon Pictographs, Isle Royale, the Pictured Rocks, and the Apostle Islands National Lakeshores are just a few of the many sites featured, each with a short descriptive history, directions, and contact information. In keeping with the guide's easy-to-follow organization, all sites are keyed to a foldout map pocketed in the book's back cover. This book also includes illuminating essays that give context to the natural and human history of the region--the Ojibwe presence, French exploration, industry on and around the lake, and the impact of this history on the natural environment. With more than 200 color and black-and-white images, this updated and greatly expanded Second Edition will enrich the appreciation of the region for both visitors and residents of the upper Great Lakes. Cradle to Grave : Life, Work, and Death at the Lake Superior Copper Mines Larry Lankton Associate Professor of History Michigan Technological University,1991-03-07 Concentrating on technology, economics, labor, and social history, *Cradle to Grave* documents the full life cycle of one of America's great mineral ranges from the 1840s to the 1960s. Lankton examines the workers' world underground, but is equally concerned with the mining communities on the surface. For the first fifty years of development, these mining communities remained remarkably harmonious, even while new, large companies obliterated traditional forms of organization and work within the industry. By 1890, however, the Lake Superior copper industry of upper Michigan started facing many challenges, including strong economic competition and a declining profit margin; growing worker dissatisfaction with both living and working conditions; and erosion of the companies' hegemony in a district they once controlled. Lankton traces technological changes within the mines and provides a thorough investigation of mine accidents and safety. He then focuses on social and labor history, dealing especially with the issue of how company paternalism exerted social control over the work force. A social history of technology, *Cradle to Grave* will appeal to labor, social and business historians.
