Light Defense - Practical Guide On How To Use A Tactical Flashlight For Self Defense Haim Zeherman,2021-05-08 We live in a world of violence, where crime has become a national disaster for many countries. To survive in modern society, one cannot be passive and must be prepared for everything, in order to protect themselves and their loved ones. Carrying a self-defense weapon as an EDC tool could be the difference between life and death. But finding the right weapon means striking the balance between effectiveness, dealing with restricting laws, and practical real-life applications. When used effectively, the tactical flashlight is a fantastic self-defense weapon that you can carry everywhere, especially where weapons like guns, knives, and mac spray are illegal. It combines the power to blind an attacker with the ability to hit hard and cause significant but non-lethal damage, that will stop any assault. Law enforcement officers, military, and security professionals alike appreciate this small, legal, and discreet self-defense tool. Unfortunately, however, very little has been written about the tactical flashlight as a standalone self-defense weapon, leaving it shrouded in mystery. The purpose of this one-of-a-kind book is to provide ordinary people - men, women, and children - regardless of their gender, size, or skill, with easy, straight-forward, and practical self-defense knowledge, to be able to defend themselves efficiently against any attacker and violent situation on the street, work, or home, in a relatively short period of time. Contents include: Principles of self-defense Psychological preparation Awareness & Avoidance Human body vital points & Natural weapons Why should you consider a flashlight How to choose the best tactical flashlight Carrying & Using the flashlight effectively Functional training methods And much more!

Defensive Tactics with Flashlights John G. Peters,1982-01-01

Flashlight Fighting Phil Elmore,2006-04-01 A simple 6-inch flashlight is an extremely potent self-defense weapon if wielded properly and is among the few useful items one may carry that has yet to be legislated into liability. Guns are strictly controlled in some areas; knives are subject to as many if not more laws, some of them so vague that they defy interpretation. Collapsible batons, billy clubs, mace and pepper sprays are often illegal, but few, if any, regulations concern the possession of the common pocket torch. About now you're probably thinking that you're in deep trouble if the only weapon you've got is a battery-powered flashlight, but anyone who knows how to use a palm stick knows just how effective even a short length of rigid material can be. Thrust into the body's soft targets, joints and other vital areas, it can debilitate and even kill an attacker.

THE POLICE OFFICER'S GUIDE TO OPERATING AND SURVIVING IN LOW-LIGHT AND NO-LIGHT CONDITIONS Tony L. Jones,2002-01-01 The majority of crimes occur during the hours of darkness, and fully two-thirds of all shooting incidents in which police officers on duty are killed take place during hours of diminished light. The goal of this unique book is to increase officers' awareness that training in low-light and no-light conditions is necessary in order for them to prevail in such situations, to help facilitate correct decision making under these conditions, and to help them understand the use of a myriad of illumination tools available for professional use today. Major topics include: (1) dim-light and no-light doctrine, including navigation techniques, threat location, threat acquisition, and threat identification; (2) flashlight doctrine, including many examples of engaging a threat using a flashlight; (3) low-light weapon sighting systems; (4) techniques used for signalling during dim-light and no-light conditions; and (5) illumination technologies supporting tactical and emergency operations, including infrared systems, thermal imagers, night vision systems, strobe lights, and lasers. Through the use of the techniques described throughout this unique and comprehensive book, the skill, professionalism, and ability of police officers to operate and survive in dim-light, no-light, and artificial light conditions will be enhanced

Survival Weapons Sammy Franco,

Dirty Knife Tactics Matei Florin, This manual has the goal to make you understand how criminal minded individuals are operating and what kind of tactics are using, in such a way that you can identify how you can apply the right methods and tactics to increase your chances of survival. The manual contain illustrations and drawings created by me in a brutal and violent style with explanations and teachings regarding various topics. This type of information cannot be found in any materials on the market regarding the knife combat. The knowledge that I have and want to share with you comes from my direct experience with violence, from testing and training. From teaching TCS for the last 8 years, but the most important from other individuals very skilled at violence. Together with the manual comes also a Video Course in which I explain and show some of the methods and tactics. You can access the video course with a simple scan of a QR code. You will find at the end of this work also The Training Cards. A set of illustrations that will help you to memorize better some of the knife techniques that I teach. I want from the beginning to underline that all this knowledge that I share in this material is already known by criminals and my goal is to AWAKE as many people as possible, making them understand the reality behind violent ambushes. This manual is for the protectors that really want to prepare themselves for the worst, being able to protect their lives or the ones around. This material comes as a support in the process of learning and must not replace face to face training. In this manual I try to share some information's and instructions that I think can help you develop a good set of skills regarding the knife. Everything requires time, dedication and a lot of hard work to achieve a level of mastery. The illustrations that I draw is one of the elements that differentiate this manual from other knife combat materials. I wanted to create images that can help the student understand better this topic by giving them visual explicit content I share in this manual knife tactics, techniques and strategies, teaching you unorthodox methods, how criminals are ambushing and how to prepare for counter-ambush situations but also how to create improvised weapons.

Light Falling Like Water Ron McCraw,2022-07-29 He used his scope to eliminate the three hundred yards between himself and the picturesque two story cottage; every detail seemingly within arm's reach. He mused. Pretty little hideaway... Most people come to the redwoods to reconnect with the beauty and power of nature. Victor came for violence, if necessary. He felt no particular animosity toward the woman in question. She held a Ph.D. in statistics from Stanford and lived with her fifteen-year-old son, Troy, and his domesticated Siberian fox, Reggie. It never crossed Victor's mind how the boy might fare without a mother. It was simple. Ghosts don't leave marks or prints... Ghost was not his real name, but neither was Victor. The sky exploded, soaking him to the bone. He shoved the scope in his pocket and moved deeper into the woods. Suddenly, a shot rang out. He recoiled. What the hell?

Tscherne,2013-07-11 A SOLDIER'S GUIDE TO LEARNING THE TRICKS OF THE TRADE The original no bullshit soldier's handbooks, loaded with tips, tricks and ideas on how to live, thrive and stay comfortable in a military outdoor environment through field expedient know-how. From how to take a dump in the woods, improvise/modify or improve military and civilian outdoor gear, combat survival techniques, reducing field boredom, leadership tips, jokes and much more. NEWLY REVISED and UPDATED 2012 EDITION This is the first of two collections that compile all the original 9 volumes into a new 'Complete and Newly Revised Edition'. NOT your typical boring military field manual, these volumes contain info that will keep you one step ahead of your average soldier. Rangers lead the way! This newly revised edition of the first five of nine volumes, adds updated equipment info, new suppliers (now with web links) and much more. As a former US Army Ranger, Drill Instructor and Advisor/Trainer to the Bosnia & Herzegovina Army (1996-97) under the US State Department Train & Equip Program. I have always enjoyed sharing with soldiers my personal experiences, tips, tricks and ideas in how to survive & thrive in the outdoors. And although I've been retired from the United States Army since January 1993, I am still doing what I like best - teaching & training soldiers. But not in a class room but through a series of books called THE RANGER DIGESTS. Now before I decided to self-publish these books I use to forward all my tips, tricks and ideas to the Department of the Army. But the only thing I ever received back were letters saying, ...sorry, not feasible for military outdoor field conditions. Well since the Army wasn't interested in my ideas, I then decided to write a book about my tips & tricks and try to market them to the troops myself. After all, when it comes to common sense and field craft ingenuity the troops know more about this stuff than some chair-borne colonel or general sitting behind his nice cozy desk at the Pentagon.

Dignity of Life: Moral Philosophy, Organisational Theory, and Hostage Rescue Avichal,2023-08-09 Scholarly, multidisciplinary, and iconoclastic, this book provides a comprehensive study of human behaviour in organisational setting, discusses the theory and principles of self-organisation, elaborates the strengths of self-organisation over command organisation, and gives a complete roadmap to set up and sustain in any culture and society an exceptionally capable hostage rescue force specialising in mass hostage rescue. However, its numerous valuable insights, relying not on technology but people and employing the force of their intrinsic motivation, are not relevant to the niche of special forces and wider military context alone but can be employed across all occupational settings to build highly efficient organisations where people work voluntarily and deliver responsibly without the supervision and control of command element. Beyond formal organisations, all fields of human activities, including the private lives of individuals too can immensely benefit from radical ideas and useful information contained in it. Besides discussing the deeper questions of life as a whole, of organisational life in general, of mass hostage rescue in particular, and of character, culture, environment, leadership, and communication, it also elaborately explains how we make decisions in crisis, who is an expert and how one can become an expert, how do we learn and how we can learn better, what makes us commit errors and mistakes, what lies behind our failures, and how we can deal with errors and failures both as individuals and organisations. About Author: Avichal is an Indian police officer who has been associated with the world of special forces as a practitioner, instructor, designer, administrator, institution builder, and adviser for over two decades and has operated and trained in many countries of the world.
