Myriam Szejer

Talking to Babies Myriam Szejer,2005-08-15 Myriam Szejer talks to newborns. For over a decade she has worked in the maternity ward of a hospital outside Paris. Called in by hospital staff when a baby or its parents are suffering, Szejer uses the psychoanalytic techniques of careful listening and talking to reach failure-to-thrive and other suffering newborns and reverse their conditions. Talking to Babies is the story of her important work. Having psychologists or psychiatrists available to new mothers on maternity wards is not unusual. But having a psychoanalyst available who also talks to newborns is completely revolutionary. Szejer has pioneered her unique approach to treating struggling infants through years of study and apprenticeship. And in Talking to Babies she describes in thoughtful and convincing detail the theory of her practice and how her interventions work, illustrating with the moving stories of the numerous infants she has helped. In the very first days of a baby's life, the newborn, still struggling between birth and its entry into our world, already needs words. By needing words, Szejer means that infants need to be talked to about the specific situations into which they are born. They need to hear about their mothers, fathers, siblings, and caretakers, but they also need to hear about problematic aspects of their histories, such as the death of a twin sibling or the death of a baby before them. These words must be spoken to the baby in the presence of his or her mother and father if at all possible. Such speech helps everyone-newborn and parents-to find their places in the altered world created by the birth. When such words are not present, physical symptoms and illness may emerge. Talking to Babies is the first book to show how the talking cure can help infants and their parents. Post-partum depression in mothers, failure-to-thrive in babies-these problems might be approached quite differently if maternity wards incorporated some of Szejer's practices. High-tech interventions are all too common in American maternity wards; Talking to Babies offers a more humane route for restoring health. Preface: Sometimes, as I am leaving the hospital late at night, I stop to look in on a patient who has recently given birth. And often, as I open the door, I catch a special moment: the new mother leaning over the crib, or more often face to face with the newborn on her lap, looking intently at him and murmuring motherly words . . . In a maternity ward, however, everything is not always so rosy. Birth is sometimes accompanied by suffering, a suffering too rarely perceived in our Western societies . . . When I met Myriam Szejer, an unknown field opened to me: the reality of the newborn's preverbal behavior. Szejer dares psychoanalyze newborns, dares talk to them, dares intervene before the symptom has taken root, particularly in dangerous situations . . . Her approach ought to become known to all who make perinatal medicine their career. Her approach is innovative. What woman has not been shaken to her very being by becoming a mother; what man has not trembled at becoming a father? Babies feel that profound apprehensiveness. They need to be listened to, which is a form of respect. --from the Preface by René Frydman, M.D.

How Babies Talk Roberta Michnick Golinkoff,Kathy Hirsh-Pasek,2000-07-01 In their first three years of life, babies face the most complex learning endeavor they will ever undertake as human beings: They learn to talk. Now, as researchers make new forays into the mystery of the development of the human brain, Golinkoff and Hirsh-Pasek, both developmental psychologists and language experts, offer parents a powerfully insightful guidebook to how infants—even while in the womb—begin to learn language. Along the way, the authors provide parents with the latest scientific findings, developmental milestones, and important advice on how to create the most effective learning environments for their children. This book takes readers on a fascinating, vitally important exploration of the dance between nature and nurture, and explains how parents can help their children learn more successfully.

Baby Talk Monica Beyer,2006-09-21 Jump-start language and learning skills with this simple and elegant guide to using sign language to communicate with your preverbal baby. Imagine averting a tantrum because your baby was able to communicate her desire for a favorite toy without tears, or simply sharing in your baby's wonderment at the sight of a bird on a tree-before he has even uttered his first word! Generally, children do not develop the motor skills necessary to speak until they are two, and yet they are able to communicate using sign language as early as six months. Written by an experienced signer and a mother of three, this illustrated step-by-step guide will allow readers to join the ranks of parents around the world who experience the rich rewards of communicating with their preverbal babies by using sign language. Studies have shown that babies who are taught to use signs to express themselves before they can actually speak are more contented because they can communicate their basic needs (and ideas!) and also are more skilled at speaking once they begin to acquire language. Full of practical tips, real anecdotes, and straightforward diagrams of more than sixty basic American Sign Language signs, Baby Talk is the essential baby-signing handbook for parents, relatives, and caregivers-and their babies, who are just a little too young to express themselves verbally.

Talking Baby Anne Buckley,Margaret Anne MacLagan,2020-02-03 In this fascinating and informative book, Margaret MacLagan and Anne Buckley - two specialists in children's language development - explain the subtle and extraordinary process in which children learn to talk and the very important role that parents and grandparents can play. Combining a comprehensive understanding of speech development with fascinating scientific facts - did you know that babies cry with an accent? - 'Talking Baby' offers numerous practical suggestions and real-life examples of how parents can best help their children to learn to talk. The authors also provide many ideas for 'talking' topics, as well as ways to use the everyday things in life to encourage children's comprehension and speech. Drawing on their combined 40 years' experience, the authors also address some of the more commonly asked questions by parents such as: -Why can my child imitate a word accurately but continues to use the wrong pronunciation in his speech? -Do second and other children talk later than first children? -My 18-month-old child isn't saying anything. Should I be

worried? -Is it better to use grown-up language to talk to young children than 'baby talk'? -How early can I start reading to my child? -English isn't my first language. How can I help my children to speak it well? -My child is repeating words a lot, especially when excited - does this mean she's stuttering?

Babies Don't Make Small Talk (So Why Should I?): The Introvert's Guide to Surviving Parenthood Julie Vick,2021-08-10 A baby can be a good excuse to skip a party, but . . . goodbye alone time, hello awkward new social obligations. All parents want the same things: to balance work and home life, to raise happy kids, to never attend a baby drumming class, and to build a secret room in their home where they can hide (preferably not the bathroom). Yes, an introverted parent would more keenly want to be free of the slew of attention and expectations that accompany both pregnancy and parenthood, but even the most outgoing person is sure to reach their limit eventually. Here, with laugh-out-loud humor and well-earned experience, Julie Vick offers coping mechanisms for everything from sharing the news that you are becoming a parent to the moment the baby is born (one way or another, it will happen), from managing doctor's visits to handling playdates. She offers advice on finding childcare and ignoring the nursing versus formula conversation with strangers. Witty yet valuable, her tips, checklists, and the occasional chart focus on the time from pregnancy through preschool.
