Tapping the Source William Gladstone, Richard Greninger, John Selby, 2012 Tapping the Source combines the timeless wisdom of Charles F. Haanel with the benefits of a century of ground-breaking developments in the use of meditation, psychology and focused concentration to reach alpha states for peak performance. Tapping the Source teaches methods that enable you to manifest your dreams, becoming wholly connected with others and finding the means within yourself to live your life to its fullest. If life had an instruction manual with step-by-step instructions on how to achieve success and happiness, Tapping the Source would be that book.

The Master Game Graham Hancock, Robert Bauval, 2011-09-13 The Master Game is a rollercoaster intellectual journey through the back streets and rat runs of history to uncover the traces in architecture and monuments of a secret religion that has shaped the world. Pivotal historical events and processes, not least the Renaissance, the birth of scientific rationalism, and the French and American revolutions, are radically reevaluated in the light of new investigative evidence presented in The Master Game. Even the belief that the United States has a global mission, so obvious today, may ultimately prove to be less the result of a shortterm reaction to terrorism than the inevitable working out of a covert plan originally set in motion almost two thousand years ago. The Master Game refers to a scheme or game played on the world stage to bring about a world order governed by a lofty goal which, today, we term the Masonic Ideal. The Master Game traces the origins of this game of symbols and words and talismans from ancient Egypt all the way to modern times, and places it squarely on the elitist Scottish Rite Freemasonry, headquartered in Washington, DC, and ruled by a secretive and powerful brotherhood of men who have attained the thirtythird degree. The Master Game exposes this world order's true purpose and, more importantly, shows how it has affected the United States of America and badly backfired on 9/11. The book is adapted and expanded from the authors' earlier, outofprint book Talisman.

Overlooked Amisha Padnani, New York Times, 2023-11-14 An unforgettable collection of diverse, remarkable lives inspired by "Overlooked," the groundbreaking New York Times series that publishes the obituaries of extraordinary people whose deaths went unreported in the newspaper—filled with nearly 200 full-color photos and new, never-before-published content Since 1851, The New York Times has published thousands of obituaries—for heads of state, celebrities, scientists, and athletes. There's even one for the person who invented the sock puppet. But, until recently, only a fraction of the Times's obits chronicled the lives of women or people of color. The vast majority tell of the lives of men—mostly white men. Started in 2018 as a series in the Obituary section, "Overlooked" has sought to rectify this, revisiting the Times's 170-year history to celebrate people who were left out. It seeks to correct past mistakes, establish a new precedent for equitable coverage of lives lost, and refocus society's lens on who is considered worthy of remembrance. Now, in the first book connected to the trailblazing series, Overlooked shares 66 extraordinary stories of women, BIPOC and LGBTQIA figures, and people with disabilities who have broken rules and overcome obstacles. Some achieved a measure of fame in their lifetime but were surprisingly omitted from the paper, including Ida B. Wells, Sylvia Plath, Alan Turing, and Major Taylor. Others were lesser-known, but noteworthy nonetheless, such as Katherine McHale Slaughterback, a farmer who found fame as "Rattlesnake Kate"; Ángela Ruiz Robles, the inventor of an early e-reader; Terri Rogers, a transgender ventriloquist and magician; and Stella Young, a disabled comedian who rejected "inspiration porn." These overlooked figures might have lived in different times, and had different experiences, but they were all ambitious and creative, and used their imaginations to invent, innovate, and change the world. Featuring stunning photographs, exclusive content about the process of writing obituaries, and contributions by writers such as Veronica Chambers, Jon Pareles, Amanda Hess, and more, this visually arresting book compels us to revisit who and what we value as a society—and reminds us that some of our most important stories are hidden among the lives of those who have been overlooked.

Tap Roots Mark Knowles, 2002-06-03 Tracing the development of tap dancing from ancient India to the Broadway stage in 1903, when the word Tap was first used in publicity to describe this new American style of dance, this text separates the cultural, societal and historical events that influenced the development of Tap dancing. Section One covers primary influences such as Irish step dancing, English clog dancing and African dancing. Section Two covers theatrical influences (early theatrical developments, Daddy Rice, the Virginia Minstrels) and Section Three covers various other influences (Native American, German and Shaker). Also included are accounts of the people present at tap's inception and how various styles of dance were mixed to create a new art form.

What the Eye Hears Brian Seibert, 2015-11-17 Magisterial, revelatory, and-most suitably-entertaining, *What the Eye Hears* offers an authoritative account of the great American art of tap dancing. Brian Seibert, a dance critic for *The New York Times*, begins by exploring tap's origins as a hybrid of the jig and clog dancing from the British Isles and dances brought from Africa by slaves. He tracks tap's transfer to the stage through blackface minstrelsy and charts its growth as a cousin to jazz in the vaudeville circuits and nightclubs of the early twentieth century. Seibert chronicles tap's spread to ubiquity on Broadway and in Hollywood, analyzes its decline after World War II, and celebrates its rediscovery and reinvention by new generations of American and international performers. In the process, we discover how the history of tap dancing is central to any meaningful account of American popular culture. This is a story with a huge cast of characters, from Master Juba (it was probably a performance of his in a Five Points cellar that Charles Dickens described in *American Notes for General Circulation*) through Bill Robinson and Shirley Temple, Fred Astaire and Ginger Rogers, and Gene Kelly and Paul Draper to Gregory Hines and Savion Glover. Seibert traces the stylistic development of tap through individual practitioners, vividly depicting dancers both well remembered and now obscure. And he illuminates the cultural exchange between blacks and whites over centuries, the interplay of imitation and theft, as well as the moving story of African-Americans in show business, wielding enormous influence as they grapple with the pain and pride of a complicated legacy. *What the Eye Hears* teaches us to see and hear the entire history of tap in its every step.

19th IEEE VLSI Test Symposium, 2001 Collects 58 papers from the April/May 2001 symposium that explore new approaches in the testing of electronic circuits and systems. Key areas in testing are discussed, such as BIST, analog measurement, fault tolerance, diagnosis methods, scan chain design, memory test and diagnosis, and test data compression and compaction. Also on the program are sessions on emerging areas that are gaining prominence, including low power testing, testing high speed circuits on low cost testers, processor based self test techniques, and core- based system-on-chip testing. Some of the topics are robust and low cost BIST architectures

for sequential fault testing in datapath multipliers, a method for measuring the cycle-to-cycle period jitter of high-frequency clock signals, fault equivalence identification using redundancy information and static and dynamic extraction, and test scheduling for minimal energy consumption under power constraints.
