Airport Marketing Nigel Halpern, Anne Graham, 2021-11-04

This accessible, up-to-date, comprehensive, and in-depth textbook introduces students and practitioners to the principles and practice of airport marketing as well as the major changes and future marketing challenges facing the airport sector. It applies principles of marketing within the airport industry, and examines airport marketing and its environment, how to define and measure the market for airport services, airport strategic marketing planning and individual elements of the airport marketing mix (product, price, distribution and promotion). The book integrates key elements of marketing theory with airport marketing in practice. Each chapter contains extensive industry examples for different types of airports from around the world to build on the theoretical base of the subject and show real-life applications. This new second edition has been updated to include: New and expanded content on branding and the passenger experience, marketing partnerships, engagement marketing and customer relationship management. Three brand new chapters on digital marketing, marketing for a more sustainable future, and crisis communications and marketing, in light of the Covid-19 pandemic. New, global case studies and examples throughout. This comprehensive textbook written by two airport marketing experts will be essential reading for air transport students and future managers.

A Philosopher of Scripture Raphael Dascalu, 2019-08-05 In *A Philosopher of Scripture: The Exegesis and Thought of Tanḥum ha-Yerushalmi*, Raphael Dascalu presents a detailed intellectual portrait of Tanḥum ha-Yerushalmi (d. 1291, Egypt) – a Jewish philosopher and mystic, linguist and philologist, and a biblical exegete of singular breadth.

Oceanography and Marine Biology: An Annual Review, Volume 59 S J Hawkins,2021-10-11 *Oceanography and Marine Biology: An Annual Review* remains one of the most cited sources in marine science and oceanography. The ever-increasing interest in work in oceanography and marine biology and its relevance to global environmental issues, especially global climate change and its impacts, creates a demand for authoritative refereed reviews summarizing and synthesizing the results of recent research. If you are interested in submitting a review for consideration for publication in OMBAR, please email the Editor in Chief, Stephen Hawkins, at S.J.Hawkins@soton.ac.uk. For nearly 60 years, OMBAR has been an essential reference for research workers and students in all fields of marine science. This volume considers such diverse topics as the Great Barrier Reef Expedition of 1928-29, Mediterranean marine caves, macromedusae in eastern boundary currents, marine biodiversity in Korea, and development of a geo-ecological carbonate reef system model to predict responses of reefs to climate change. Seven of the peer-reviewed contributions in Volume 59 are available to read Open Access on this webpage (1, 2, 3, 4, 5, 6 and 9). An international Editorial Board ensures global relevance and expert peer review, with editors from Australia, Canada, Hong Kong, Ireland, Singapore and the United Kingdom. The series volumes find a place in the libraries of not only marine laboratories and oceanographic institutes, but also universities worldwide.

Iran's Struggle for Economic Independence Evaleila Pesaran,2011-04-25 It is often assumed that Iran must necessarily submit to the forces of globalization and liberalize its economy, but the country's ruling elites have continued throughout the post-revolutionary era to resist these pressures for neo-liberal economic reform, seeking to survive in the battlefield of today's globalizing economy whilst remaining loyal to their own rules of engagement. This book analyzes the dynamics of economic reform in the Islamic Republic of Iran as they have played out in this post-revolutionary struggle for economic independence from 1979 up to the present day. It shows how, although some groups within the Iranian elite are in favor of opening up the economy to the inflow of foreign capital - believing that lasting independence requires economic growth powered in part by investment from abroad - others argue that such economic liberalization might endanger Iran's national interests and put the survival of the post-revolutionary regime at risk. By examining the political causes of the ongoing tug-of-war that has taken place between these two sides of reform and counter-reform, this book provides a new approach to understanding the complex process of economic policy-making in the Islamic Republic of Iran, which will be relevant to future examinations of the political economy of the Middle East.

BIM Handbook Rafael Sacks,Chuck Eastman,Ghang Lee,Paul Teicholz,2018-07-03 Discover BIM: A better way to build better buildings Building Information Modeling (BIM) offers a novel approach to design, construction, and facility management in which a digital representation of the building product and

process is used to facilitate the exchange and interoperability of information in digital format. BIM is beginning to change the way buildings look, the way they function, and the ways in which they are designed and built. The BIM Handbook, Third Edition provides an in-depth understanding of BIM technologies, the business and organizational issues associated with its implementation, and the profound advantages that effective use of BIM can provide to all members of a project team. Updates to this edition include: Information on the ways in which professionals should use BIM to gain maximum value New topics such as collaborative working, national and major construction clients, BIM standards and guides A discussion on how various professional roles have expanded through the widespread use and the new avenues of BIM practices and services A wealth of new case studies that clearly illustrate exactly how BIM is applied in a wide variety of conditions Painting a colorful and thorough picture of the state of the art in building information modeling, the BIM Handbook, Third Edition guides readers to successful implementations, helping them to avoid needless frustration and costs and take full advantage of this paradigm-shifting approach to construct better buildings that consume fewer materials and require less time, labor, and capital resources.

Agricultural value chain finance innovations and lessons Food and Agriculture Organization of the United Nations,African Rural and Agricultural Credit Association,2021-07-22 Value chain finance arrangements and related innovations hold great potential for financial inclusion in agriculture and food systems, particularly in the context of tight value chains and for addressing the short term financial needs of

the various actors. These can also contribute to linking financially excluded actors with financial institutions in the formal sector. This publication makes an important contribution to the expanding literature on agricultural value chain financing approaches by providing an overview of innovations and best practices from across Sub-Saharan Africa through 22 case studies. The chosen cases are of varying length and complexity. The emphasis is on learning from the practices which are presented. The synthesis document included within the publication is designed to introduce the cases, provide comparisons and discuss lessons learned. It is hoped that this publication will become a useful reference material for trainers and practitioners interested in the diverse experiences and latest innovations in business models, approaches, instruments and arrangements that contribute to improving access to finance for a host of agrifood value chain actors including small farmers, women and youths in Africa.

Agricultural value chain finance innovations and lessons FAO and AFRACA, 2020-05-01 *Agricultural Value Chain Finance Innovations and Lessons: Case Studies in Africa* documents key aspects and lessons from selected best practice cases for training and learning. Using site visits to document the information, the 22 practical case studies and examples were developed across Africa to portray a diverse set of experiences that address different aspects of applying agricultural financing using a value chain approach. The cases are of varied length and complexity. Eighteen short case studies for use in time-constrained workshop settings are presented and together with four longer, highlight cases, which deal with more complex arrangements and business models. The longer ones are best for self-learning and for university and trainings when there is sufficient time for deeper analysis. The best practice cases presented represent a) diverse business models, b) risk mitigation tools and approaches for value chains and their financing, c) investment fund applications, d)

digital applications, e) women's value chain financing and f) policy issues along with three user-case scenarios. The document is organized with an introduction of the cases, a synthesis of the learning, presentation of each of the cases and summary tables for comparisons among them. Training facilitators can use the document as a whole or selectively use cases to fit their specific training needs. The document is meant to be a living document, with updates of cases and the expansion of the models and tools to fit the context of their application in diverse value chain and country settings.

Security and Routing in Wireless Networks Yang Xiao,Jie Li,Yi Pan,2005 With the advance of wireless networks, building reliable and secured network connections is becoming extremely important. On the other hand, ad hoc networks become especially important and have many useful applications. The primary focus of this book is to present these two hot and rapidly evolving areas in wireless networks. Security and scheduling/routing in wireless networks remain challenging research problems due to the complexity involved. How to develop more efficient and reliable wireless networks remains a hot research area. It is this realisation that has motivated the editing of this book. The goal of the book is to serve as a reference for both security in wireless networks and channel access, scheduling, and routing in ad hoc networks. In this book, the authors review important developments and new strategies for these topics. Important features and limitations of methods and models are identified. Consequently, this book can serve as a useful reference for researchers, educators, graduate students, and practitioners in the field of wireless networks. This book contains 14 invited

chapters from prominent researchers working in this area around the world. All of the cha
