The Big Book of Dashboards Steve Wexler, Jeffrey Shaffer, Andy Cotgreave, 2017-04-24 The definitive reference book with real-world solutions you won't find anywhere else The Big Book of Dashboards presents a comprehensive reference for those tasked with building or overseeing the development of business dashboards. Comprising dozens of examples that address different industries and departments (healthcare, transportation, finance, human resources, marketing, customer service, sports, etc.) and different platforms (print, desktop, tablet, smartphone, and conference room display) The Big Book of Dashboards is the only book that matches great dashboards with real-world business scenarios. By organizing the book based on these scenarios and offering practical and effective visualization examples, The Big Book of Dashboards will be the trusted resource that you open when you need to build an effective business dashboard. In addition to the scenarios there's an entire section of the book that is devoted to addressing many practical and psychological factors you will encounter in your work. It's great to have theory and evidenced-based research at your disposal, but

what will you do when somebody asks you to make your dashboard 'cooler' by adding packed bubbles and donut charts? The expert authors have a combined 30-plus years of hands-on experience helping people in hundreds of organizations build effective visualizations. They have fought many 'best practices' battles and having endured bring an uncommon empathy to help you, the reader of this book, survive and thrive in the data visualization world. A well-designed dashboard can point out risks, opportunities, and more; but common challenges and misconceptions can make your dashboard useless at best, and misleading at worst. The Big Book of Dashboards gives you the tools, guidance, and models you need to produce great dashboards that inform, enlighten, and engage.

The Xing Gary James, 2018-03-30 The Existence of God can be a challenging topic when brought up between theists and non-theists. Even so, there is much productive discussion to be had on the subject when people of differing perspectives meet. *The Xing* (The Crossing) paints a portrait of six

different encounters between persons of different professional backgrounds. In these chance meetings, the professionals will present their varying points of view. It seeks to highlight what most will think about, but few are willing to talk about: the question of Gods existence. This exploration occurs through a variety of scenarios. A professor, through unforeseen circumstances, meets a mechanic. A lawyer speaks to his client, who is a truck driver. A neurosurgeon talks with his IT, and so on. Throughout their exchanges, a wide range of topics will be brought up. The inspiration for this novel comes from the Book of Job, in which Job debates with his friends over Gods involvement in times of suffering, or lack thereof. This novel depicts a series of civil and friendly discussions between persons who do not agree, which is really intended to inspire readers.

TED TALKS: The Official TED Guide to Public Speaking Chris J. Anderson, 2017-05-09 From the head of TED and based on expertise drawn from the best TED Talks, an entertaining and practical guide to speaking, pitching and telling stories, filled with valuable insight for salespeople, leaders, teachers and writers Amid today's proliferating instant-communication channels, one form has

It's Hotter In Hawaii HelenKay Dimon, 2009-03-31 Aloha, Gorgeous. . . Cassie Montgomery was in no mood for messing around--until she got an eyeful of the sizzling-hot miscreant breaking into her half-brother Dan's Hawaii home. Turns out he's not a criminal, but a friend who's just as suspicious of Dan's accidental death as she is. Cassie's beyond tired of bashing heads with thick-skulled local law enforcement, so there's only one thing for it: team up with Caleb Wilson, and try to keep her secrets--and hands--to herself. . . Having a gun trained on him is nothing new for Cal. But when said gun is brandished by a goddess sporting short-shorts, a bad attitude, and a hidden agenda? A man should consider his choices very carefully. Option one: Seduce first, ask questions later. Option two: Find out why she's in his Air Force buddy's torn-up house, then seduce her. Option three: Let the islands do

their work and let the woman behind the weapon seduce him. . .

Story Dash David Hutchens, 2021-08-24 Storytelling is humanity's oldest way of connecting to others. But for businesses and managers, it can also be a powerful tool to help organizations grow and thrive. A leader's role is to create engagement and belief so that people will act. And there's no more powerful way to grab attention, be remembered, and engage action than by telling stories—about who you are, what you do, and why you do it. Today, “storytelling” is a hot topic in organizations... but most leaders still struggle to act upon it. How do we find and tell our stories quickly, in an environment of urgency where we can hardly pause to catch our breath? For more than a decade Hutchens has tested his method of rapid and strategic story development with innovation teams in Silicon Valley, across global Fortune 100 leadership teams, and more. Hutchens has honed a unique process that is active, potent, and strategically focused . . . and also a lot of fun. In Story Dash, Hutchens shares a repeatable process to find, develop, and deploy your “narrative assets”—that is, your urgent core stories that hold value. Even better, he will help you do it FAST; often in less than a day. Story Dash

will help you to: Access your natural capacity for storytelling Find your stories—and figure out which ones to tell Build your narrative so it lands with unforgettable impact Find your own voice of authentic leadership Bring more of who you are to your teams and your markets Fully illustrated and written in a clear, sharp voice, Story Dash shares the fastest way to find lots of stories that will create action around the work you care about most.

The Dash Between Richard Colyer,2017-03-27 When Mr. Colyer taught literature, he often told personal stories that had some bearing on what his students were studying. His students loved these stories as he often heard “Mr. Colyer, tell us another story!” So when he retired, he decided to record these stories so his progeny would know more about him than what was on a tombstone—name,

birthdate, death date, and the dash between. This book is his dash between. 1942–? Richard Colyer had three goals as a teacher: to entertain, to educate, and to inspire. He figured that if he entertained his students, he would get their attention; and if he got their attention, he could educate them; and if he educated them, perhaps he could inspire them as well. Those same three goals are attempted in this story-telling autobiography—to entertain, educate, and inspire the reader. Much twentieth-century history is revealed in this book, and Mr. Colyer has provided some commentary on the significance of some of these events as he has interpreted them. It is his hope that as people read this, they will be inspired to write their own “dash between.”

Street Data Shane Safir, Jamila Dugan, 2021-02-12 Radically reimagine our ways of being, learning, and doing Education can be transformed if we eradicate our fixation on big data like standardized test scores as the supreme measure of equity and learning. Instead of the focus being on fixing and filling academic gaps, we must envision and rebuild the system from the student up—with classrooms, schools and systems built around students' brilliance, cultural wealth, and intellectual potential. Street data reminds us that what is measurable is not the same as what is valuable and that

data can be humanizing, liberatory and healing. By breaking down street data fundamentals: what it is, how to gather it, and how it can complement other forms of data to guide a school or district's equity journey, Safir and Dugan offer an actionable framework for school transformation. Written for educators and policymakers, this book · Offers fresh ideas and innovative tools to apply immediately · Provides an asset-based model to help educators look for what's right in our students and communities instead of seeking what's wrong · Explores a different application of data, from its capacity to help us diagnose root causes of inequity, to its potential to transform learning, and its power to reshape adult culture Now is the time to take an antiracist stance, interrogate our assumptions about knowledge, measurement, and what really matters when it comes to educating young people.
