The Report: Myanmar 2015 Oxford Business Group, 2015-03-03 The country's location within the region and population of more than 50m will help it achieve growth, with international analysts predicting Myanmar's economy to be worth up to \$200bn by 2030. With elections set to take place in late 2015, the world is eagerly watching to see how things will unfold. After spending decades as one of the most isolated and least-developed countries in Asia, Myanmar is emerging as one of the world's fastest-growing economies. Agriculture, manufacturing and mining are some of Myanmar's top contributors to GDP, which was forecast to reach 8.5% in FY2014/15 and FY2015/16. While foreign investment is accelerating, there are ways in which it remains blocked. As the country continues to reintegrate with the global economy, continued reforms as well as the opening of more economic sectors to foreign investors will help unlock the country's potential.

Reimagining India-thailand Relations: A Multilateral And Bilateral Perspective Reena Marwah, 2020-03-17 This book brings into focus India's relations with ASEAN and Thailand in particular. In the 1990s, India revived its relations with Southeast Asia. Yet, in comparison to China, India continued to be a distant neighbour. Hence, India has once again, through its 'Look and Act East' policies become intertwined with its immediate neighbours in the East, especially with Thailand. The objective of the book is to contextualise India's relations and influence in Southeast Asia over a period of nearly two thousand years, through culture and religion. The scope of the book extends beyond bilateral issues to include the multilateral, bringing in issues of trade negotiations under the Regional Comprehensive Economic Partnership (RCEP) and the Indo-Pacific construct. As ASEAN's importance grows in the regional and global landscape, there are ramifications for its relations with its traditional partners. The volatility and suspicion among the major powers, especially USA and China harbour the potential to disunite ASEAN. A rising India seeks a united and strong ASEAN both as a natural partner and in a bid to balance China's growing assertiveness and deep pockets. Based on interviews conducted with experts, diplomats and scholars in the field, this book encompasses a wide range of aspects that pertain to the historical, cultural, economic and strategic international relations of ASEAN and Thailand with India.

The Report: Thailand 2016 Oxford Business Group, 2016-04-15 According to the UN

Conference on Trade and Development, Thailand has been among eight priority destinations for foreign investment since 2012. Factors weighing on growth in 2016 will include an ongoing economic slowdown, weakening global demand for Thai exports and growing levels of consumer debt. The government's investment promotion agenda, while perhaps more complicated than in previous years, also addresses the dual challenge of labour shortages and the middle-income trap through promotion of both labour-intensive and high-tech industries, while potential membership in two major trade blocs could see regional and international exports soar in the coming years. Although the near-term forecast is dampened by global volatility, weakening demand and the impact of China's slowdown, trade in Thailand will remain on an upwards trajectory in 2016, and investment, though unlikely to meet government targets, is nonetheless expected to bounce back from a challenging 2015.

Asian Megatrends Rajiv Biswas, 2016-02-03 Asian Megatrends assesses the key drivers impacting Asia over the next two decades. The rise of China is transforming the Asia-Pacific, as China's economic and military might increasingly reverberates throughout the region. India and Indonesia are also rising Asian powers that are changing the shape of the Asian economic landscape. The rapid growth of emerging Asian consumer markets is becoming an increasingly important growth engine for the world economy and for global multinationals. However, Asia faces tremendous economic and social challenges over the long-term, including the rapid growth of Asian megacities and severe environmental problems due to climate change, water crises and pollution. Geopolitical tensions have also been escalating in the Asia-Pacific due to territorial disputes in the South China Sea and the East China Sea, increasing the risk of a regional arms race and military confrontation. Asian Megatrends is an essential read for government officials and corporate executives wishing to understand the rapidly changing risk landscape in Asia.

Architects of Buddhist Leisure Justin Thomas McDaniel, 2018-04-30 Buddhism, often described as an austere religion that condemns desire, promotes denial, and idealizes the contemplative life, actually has a thriving leisure culture in Asia. Creative religious improvisations designed by Buddhists have been produced both within and outside of monasteries across the region—in Nepal, Japan, Korea, Macau, Hong Kong, Singapore, Laos, Thailand, and Vietnam. Justin McDaniel looks at the growth of Asia's culture of Buddhist leisure—what he calls “socially disengaged Buddhism”—through a study of architects responsible for monuments, museums, amusement parks, and other sites. In conversation with noted theorists of material and visual culture and anthropologists of art, McDaniel argues that such sites highlight the importance of public, leisure, and spectacle culture from a Buddhist perspective and illustrate how “secular” and “religious,” “public” and “private,” are in many ways false binaries. Moreover, places like Lek Wiriyaphan's Sanctuary of Truth in Thailand, Suối Tiên Amusement Park in Saigon, and Shi Fa Zhao's multilevel museum/ritual space/tea house in Singapore reflect a growing Buddhist ecumenism built through repetitive affective encounters instead of didactic sermons and sectarian developments. They present different Buddhist traditions, images, and aesthetic expressions as united but not uniform, collected but not concise: Together they form a gathering, not a movement. Despite the ingenuity of lay and ordained visionaries like Wiriyaphan and Zhao and their colleagues Kenzo Tange, Chan-soo Park, Tadao Ando, and others discussed in this book, creators of Buddhist leisure sites often face problems along the way. Parks and museums are complex adaptive systems that are changed and influenced by budgets, available materials, local and global economic conditions, and visitors. Architects must often compromise and settle at local optima, and no matter what they intend, their buildings will develop lives of their own. Provocative and theoretically innovative, *Architects of Buddhist Leisure* asks readers to question the very category of “religious” architecture. It challenges current methodological approaches in religious studies and speaks to a broad audience interested in modern art, architecture, religion, anthropology, and material culture.
