The Book of Nature Myths Florence Holbrook,1902

A collection of stories from around the world that are meant to explain such things as Why the cat always falls upon her feet, How fire was brought to the Indians, and Why there is a hare in the moon.

The Book of Nature Myths Florence

Holbrook,2009-02 Over fifty short myths about animals, birds, and natural subjects, suitable for the child's own reading in the second grade. These naive explanations of the phenomena of nature given by early peoples are told in a simple, yet interesting fashion and appeal to the child's sense of wonder about the same phenomena. Most of the myths are drawn from Native American sources, but a few Greek and Japanese myths are also included. Written as a sequel to The Hiawatha Primer with a gradual increase in both vocabulary and complexity of expression. Numerous black and white illustrations complement the text. Suitable for ages 7 and up.

(2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact.

Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.

The Book of Nature Myths (Classic Reprint)
Florence Holbrook, 2017-09-15 Excerpt from The Book of Nature Myths The subject-matter is of permanent value, culled from the folk-lore of the primitive races; the vocabulary, based upon that of the Hiawatha Primer, is increased gradually, and the new words and phrases will add to the child's power of expression. The naive explanations of the phenomena of nature given by the primitive races appeal to the child's wonder about the same phenomena, and he is pleased and interested. These myths will gratify the child's desire for complete stories, and their intrinsic merit makes them valuable for oral reproduction. The BOOK of NATURE MYTHS (Annotated) Florence HOLBROOK, 2021-06-30 Long, long ago, when the earth was very young, two hunters were traveling through the forest. They had been on the track of a deer for many days, and they were now far away from the village where they lived. The sun went down and night came on. The Book of Nature Myths Florence Holbrook, 2020-03-09 Long, long ago, when the earth was very young, two hunters were traveling through the forest. They had been on the track of a deer for many days, and they were now far away from the village where they lived. The sun went down and night came on. It was dark and gloomy, but over in the western sky there came a bright light. It is the moon, said one. No, said the other. We have watched many and many a night to see the great, round moon rise above the trees. That is not the moon. Is it the northern lights? No, the northern lights are not like this, and it is not a comet. What can it be? It is no wonder that the hunters

were afraid, for the flames flared red over the sky like a wigwam on fire. Thick, blue smoke floated above the flames and hid the shining stars. Do the flames and smoke come from the wigwam of the Great Spirit? asked one. I fear that he is angry with his children, and that the flames are his fiery war-clubs, whispered the other. No sleep came to their eyes. All night long they watched and wondered, and waited in terror for the morning. When morning came, the two hunters were still watching the sky. Little by little they saw that there was a high mountain in the west where the light had been, and above the mountain floated a dark blue smoke. Come, said one, we will go and see what it is.

Nature Myths and Stories for Little Children

Flora J. Cooke, 2011-06 FEELING the great need of stories founded upon good literature, which are within the comprehension of little children, I have written the following stories, hoping that they may suggest to primary teachers the great wealth of material within our reach. Many teachers, who firmly believe that reading should be something more than mere word-getting while the child's reading habit is forming, are practically helpless without the use of a printing press. We will all agree that myths and fables are usually beautiful truths clothed in fancy, and the dress is almost always simple and transparent. Who can study these myths and not feel that nature has a new language for him, and that though the tales may be thousands of years old, they are quite as

true as they were in the days of Homer. If the trees and the flowers, the clouds and the wind, all tell wonderful stories to the child he has sources of happiness of which no power can deprive him. And when we consider that here, too, is the key which unlocks so much of the best in art and literature, we feel that we cannot rank too highly the importance of the myth in the primary schoolroom.

The Stories Mother Nature Told Her Children Jane Andrews, 1888 How still it is! Nobody in the village street, the children all at school, and the very dogs sleeping lazily in the sunshine. Only a south wind blows lightly through the trees, lifting the great fans of the horse-chestnut, tossing the slight branches of the elm against the sky like single feathers of a great plume, and swinging out fragrance from the heavy-hanging linden-blossoms.

Indian Nature Myths Julia Darrow Cowles, 2023-03-25 Indian Nature Myths is a classic collection of Native American nature stories by Julia Darrow Cowles. The stories of this book have been chosen for the purpose of showing how the early Red Men accounted for the phenomena of nature-the presence of the birds, the moaning of

the wind, the whispering of the leaves. The nature myths of the North American Indian are full of poetry, and occasionally of a rich humor. In retelling the stories for children the author has sought to retain the original spirit of the tales, and through them to give to the reader a better understanding of the inner life and thought of the primitive Red Man at his best. The tales have been gathered from many sources, and are representative of many tribes. It is well known that the same tale in varying form is told among many different tribes, just as the folk tales have been carried in early times from one nation to another and are variously accredited. It is not always possible to determine the original source.
