Mike Ashley

The Deepest Water Kate Wilhelm, 2000 Abby Connor's father, Jud, was a novelist whose career finally took off after three novels and years of hard work. Jud was also the most important man in Abby's life, to the chagrin of her husband, Brice. When Jud is murdered in his Oregon lakefront cabin, Abby's life is overturned. Was the killer someone she knew? Fortunately, it seems she has a guide to direct her through the maze that is her life: Jud's last novel. If only she can see through the fiction to perceive the truth.--BOOK JACKET. Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

Where Late The Sweet Birds Sang Kate Wilhelm, 1998-07-15 Before becoming one of today's most intriguing and innovative mystery writers, Kate Wilhelm was a leading writer of science fiction, acclaimed for classics like *The Infinity Box* and *The Clewiston Test*. Now one of her most famous novels returns to print, the spellbinding story of an isolated post-holocaust community determined to preserve itself, through a perilous experiment in cloning. Sweeping, dramatic, rich with humanity, and

rigorous in its science, *Where Later the Sweet Birds Sang* is widely regarded as a high point of both humanistic and hard SF, and won SF's Hugo Award and Locus Award on its first publication. It is as compelling today as it was then. *Where Late the Sweet Birds Sang* is the winner of the 1977 Hugo Award for Best Novel. Death of an Artist Kate Wilhelm, 2012-03-27 In Silver Bay, Oregon, Marnie and Van enlist the help of Tony, a former New York City police officer, when Dale Oliver claims he has the right to sell Stef's, Marnie's daughter and Van's mother, art after her death.

Fathoming the Ocean Helen M Rozwadowski, 2009-06-30 “[An] amiable, in-depth examination of the most critical era for the development of modern oceanography” (Publishers Weekly). In a history at once scientific and cultural, Helen Rozwadowski shows us how the Western imagination awoke to the ocean's possibilities?in maritime novels, in the popular hobby of marine biology, in the youthful sport of yachting, and in the laying of a trans-Atlantic telegraph cable. The ocean emerged as important new

territory, and scientific interests intersected with those of merchant-industrialists and politicians.

Rozwadowski documents the popular crazes that coincided with these interests—from children's sailor suits to the home aquarium and the surge in ocean travel. She describes how, beginning in the 1860s, oceanography moved from yachts onto the decks of oceangoing vessels, and landlubber naturalists found themselves navigating the routines of a working ship's physical and social structures. Fathoming the Ocean offers a rare and engaging look into our fascination with the deep sea and into the origins of oceanography—origins still visible in a science that focuses the efforts of physicists, chemists, geologists, biologists, and engineers on the common enterprise of understanding a vast, three-dimensional, alien space. “Rozwadowski greatly expands our own understanding, all while telling a story that is original, wide-ranging, and illuminating.” —Margaret Deacon, Southampton Oceanography Centre, author of *Science and the Sea: The Origins of Oceanography* “Required reading for anyone wanting to understand how the oceans have come to play the role that they do in Western knowledge.” —Eric L. Mills, Dalhousie University and author of *Biological Oceanography: An Early*

History, 1870-1960 “Chronicles the birth of deep-sea oceanography, from early observations by Benjamin Franklin to the voyage of HMS Challenger in the 1870s. [Rozwadowski] weaves a rich narrative from the world of renowned as well as lesser-known oceanographers.” —Nature

On Fire Carla Neggers,2010-02-01 First he's suspected of murder, then he disappears. But no matter what the evidence says—Riley St. Joe knows her grandfather is not capable of such a vile act. The famed explorer and oceanographer taught her all she knows. Now she'll pay him back by finding the real killer. Recovering from gunshot wounds received in the line of duty, FBI agent John Straker is the last man Riley would go to for help. As lifelong nemeses, bitter arguments are the only constant in their relationship. But knowing she's in danger—and about to get herself into more—Straker can't help but keep an eye on her, even if it means binding their fates with combustible ties.

Kate Wilhelm in Orbit - Volume One Kate Wilhelm,2014-12-20 From 1966 to 1980, Damon Knight

created the Orbit anthologies series of science fiction, representing the finest writing in the genre. Nineteen of Kate Wilhelm's stories were included in this series of 21 volumes. Among these are "Where Late the Sweet Birds Sang," an exploration of infertility and cloning in the aftermath of global environmental collapse. It won the Locus, Jupiter, and Hugo Awards for Best Novel in 1977. "The Planners" reaches into the moral conflicts of a primate researcher, which won the Nebula Award for Best Short Story in 1968. Other stories include: a road trip into a woman's psyche; primal fears through the eyes of a wise and empathetic alien; an encounter in a bus depot during a raging winter storm; the first "interactive" reality TV show. Ms. Wilhelm's stories are prophetic, yet as recognizable as a story in this morning's paper.

Defense for the Devil Kate Wilhelm, 1999 Barbara Holloway, Oregon's most dynamic lawyer, takes the case of a woman whose husband makes a most unwelcome return--and then gets himself murdered.

The Water That Falls on You from Nowhere John Chu, 2013-02-20 In the near future water falls

This makes life difficult for Matt as he maneuvers the marriage question with his lover and how best to come out to his traditional Chinese parents. The Mammoth Book of Extreme Science Fiction Mike Ashley,2010-07-31 Here are 25 stories of science fiction that push the envelope, by the biggest names in an emerging new crop of high-tech futuristic SF - including Charles Stross, Robert Reed, Alastair Reynolds, Peter Hamilton and Neal

Asher. High-tech SF has made a significant comeback in the last decade, as bestselling authors successfully blend the super-science of 'hard science fiction' with real characters in an understandable scenario. It is perhaps a reflection of how technologically controlled our world is that readers increasingly look for science fiction that considers the fates of mankind as a result of increasing scientific domination. This anthology brings together the most extreme examples of the new high-tech, far-future science fiction, pushing the limits way beyond normal boundaries. The stories include: A Perpetual War Fought Within a Cosmic String, A Weapon That Could Destroy the Universe, A Machine That Detects Alternate Worlds and Creates a Choice of Christs, An Immortal Dead Man Sent To The End of the Universe, Murder in Virtual Reality, A Spaceship So Large That There is An Entire Planetary System Within It, and An Analytical Engine At The End of Time, and Encountering the Untouchable.

Death Qualified Kate Wilhelm, 1992 Combines suspense of murder mystery with the inventive terrors of science fiction.
