*The Economic Imperative* John Zerilli,2011-10-10 The book explores the role of leisure in modern life. It was written in the belief that leisure sets us apart as a species, that what is “useless” by commercial standards is probably the best thing we have going for us, and that leisure is under attack, in high danger of being lost, and has been for some time (since at least the end of the Second World War). The source of the problem is the ascendancy of the economic imperative, the subordination of the science of means (philosophy) by the science of ends (economics). The book argues that our leisurely impulse has been so squandered that boredom is now a significant problem in modern life. The essays canvass the distinctive contributions of art, science and religion, and provide a synthetic account of these three forces driving human culture. Although the book covers the science/religion question, this book differs from others on the science/religion debate in that it connects the traditional discussion to questions of economics and social policy. It takes an innovative approach in weaving the fundamentals of human life (art, science, economics and so on) into one fabric, namely, leisure.

*Shakespeare and the Economic Imperative* Peter F. Grav,2008-04-25 Despite the volume of work Shakespeare produced, surprisingly few of his plays directly concern money and the economic mindset. Shakespeare and the Economic Imperative examines the five plays that do address monetary issues (The Comedy of Errors, The Merry Wives of Windsor, The Merchant of Venice, Measure for Measure and Timon of Athens), plays in which Shakespeare’s view of how economic determinants shape interpersonal relationships progressively darkens. In short, what thematically starts out in farce ends in nihilistic tragedy. Working within the critical stream of new economic criticism, this book uses formal analysis to interrogate how words are used — how words and metaphoric patterns from the quantifiable dealings of commerce transform into signifiers of qualitative values and how the endemic employment of discursive tropes based on mercantile principles debases human relationships. This examination is complemented by historical socio-economic contextualization, as it seems evident that the societies depicted in these plays reflect the changing world in which Shakespeare lived and wrote.

*The Market Imperative* Robert Zemsky,Susan Shaman,2017-12-22 Although there is no one-size-fits-allapproach for reforming higher education, this clearly written book will productively advance understanding of the challenges colleges and universities face by providing a mapping of the configuration of the market for an undergraduate education.

**The Resilience Imperative** Michael Lewis,Patrick Conaty,2012-06-12 Argues that the economy can only be improved through major changes that will make it more decentralized and cooperative, including such novel ideas as energy self-sufficiency, interest-free financing, affordable housing, local food systems and more. Original.

**The Modernization Imperative** Bruce Charlton,Peter Andras,2017-03-14 This book argues that contemporary society in Western democracies is generally misunderstood to be a pyramidal hierarchy dominated either by government or the economy. Neither view is correct. We live in a fundamentally pluralistic society divided into numerous ‘modular’ social systems each performing different functions; these include politics, public administration, the armed forces, law, economics, religion, education, health and the mass media. Because each is specialized, none of these systems are dominant and there is no overall hierarchy of power. Modernizing societies are therefore structured more like a mosaic than a pyramid. Modernization is the tendency for growth in the adaptive complexity and efficiency of the social systems. Growth in complexity is shaped by selection processes which maintain the functionality of social systems. The best examples are the market economy, science and democratic politics. The process of modernization is both inevitable and, on the whole, desirable: this constitutes the modernization imperative. Therefore, the proper question should not be whether society should modernize, but how.

The Imperative of Development Geoffrey Gertz,Homi J. Kharas,Johannes F. Linn,2017 The achievements and legacy of the Wolfensohn Center for Development at Brookings The Imperative of Development highlights the research and policy analysis produced by the Wolfensohn Center for Development at Brookings. The Center, which operated from 2006 to 2011, was the first home at Brookings for research on international development. It sought to help identify effective solutions to key development challenges in order to create a more prosperous and stable world. Founded by James and Elaine Wolfensohn, the Center's mission was to to create knowledge that leads to action with real, scaled-up, and lasting development impact. This volume reviews the Center's achievements and lasting legacy, combining highlights of its most important research with new essays that examine the context and impact of that research. Six primary research streams of the Wolfensohn Center's work are highlighted in The Imperative of Development: the shifting structure of the world economy in the twenty-first century; the challenge of scaling up the impact of development interventions; the effectiveness of development assistance; how to promote economic and social inclusion for Middle Eastern youth; the case for investing in early child development; and the need for global governance reform. In each chapter, a scholar associated with the particular research topic provides an overview of the issue and its broader context, then describes the Center's work on the topic and the subsequent influence and impact of these efforts. The Imperative of Development chronicles the growth and expansion of the first center for development research in Brookings's 100-year history and traces how the seeds of this initiative continue to bear fruit.

**The Decarbonization Imperative** Michael Lenox,Rebecca Duff,2021-10-19 Time is of the essence. Climate change looms as a malignant force that will reshape our economy and society for generations to come. If we are going to avoid the worst effects of climate change, we are going to need to effectively decarbonize the global economy by 2050. This doesn't mean a modest, or even a drastic, improvement in fuel efficiency standards for automobiles. It means 100 percent of the cars on the road being battery-powered or powered by some other non-carbon-emitting powertrain. It means 100 percent of our global electricity needs being met by renewables and other non-carbon-emitting sources such as nuclear power. It means electrifying the global industrials sector and replacing carbon-intensive chemical processes with green alternatives, eliminating scope-one emissions—emissions in production—across all industries, particularly steel, cement, petrochemicals, which are the backbone of the global economy. It means sustainable farming while still feeding a growing

global population. Responding to the existential threat of climate change, Michael Lenox and Rebecca Duff propose a radical reconfiguration of the industries contributing the most, and most harmfully, to this planetary crisis. Disruptive innovation and a particular calibration of industry dynamics will be key to this change. The authors analyze precisely what this might look like for specific sectors of the world economy—ranging from agriculture to industrials and building, energy, and transportation—and examine the possible challenges and obstacles to introducing a paradigm shift in each one. With regards to existent business practices and products, how much and what kind of transformation can be achieved? The authors assert that markets are critical to achieving the needed change, and that they operate within a larger scale of institutional rules and norms. Lenox and Duff conclude with an analysis of policy interventions and strategies that could move us toward clean tech and decarbonization by 2050.

The Entrepreneurial Imperative Carl J. Schramm, PhD, 2013-02-26 In 2004, Carl Schramm, president of the Kauffman Foundation, the world's leading foundation for entrepreneurship, published a groundbreaking essay with a radical premise: that Americans literally have no conception of the secret that truly underlies our economic success, and that for the United States to survive and continue to lead the world's economy, it is imperative we learn to understand and employ that secret. The secret that has led the American economy to become the world's strongest? Our unparalleled skill as entrepreneurs. As Schramm compellingly shows in this sweeping manifesto, entrepreneurship alone—not anything else—can give America the necessary leverage to remain an economic superpower. Not technology, since everyone now has the same technology, or access to it. Not education—we are years behind other nations in this area. Not basic manufacturing, long since moved overseas from the United States. And not capital markets, now truly global entities. Drawing on detailed research conducted by the Kauffman Foundation and on his decades of experience as an entrepreneur himself and as a leader and mentor to other entrepreneurs, Schramm persuasively demonstrates in detail what this entrepreneurial imperative means for the way we run universities and foundations, lead companies, make personal job decisions, and even conduct our foreign affairs. The Entrepreneurial Imperative will change not only the way our government, corporations, and nonprofits operate, but also our day-to-day lives as working Americans.
