The Spirit of Education ,1868

Education in Search of the Spirit John Fentress Gardner,1996 Real education will always seek to strengthen what is best in the human soul: its longing for the experience of spiritual truth that brings into the self an objective appreciation of the noble aspects of its own nature, together with a subjective sense of real affinity with the rest of humanity, the earth planet as a whole, and the great cosmos above and beyond. The premise of this book is that a human being is a being of body, soul, and spirit, whose core is eternal spirit, from which center one should strive to live. From this perspective, the aim of true education is to help our children activate this deepest center in themselves. For this, living, intuitive thinking must be brought to life in a new way. The organ for such thinking is the heart, where will and feeling join in uniting self and world, morality and truth, love and action. This book is in three parts. The first poses the problem; the second describes the Waldorf approach as a solution; and the third deals with questions of special interest to parents and educators alike, such as authority, discipline, and freedom; the nature of genius; and the question of cultural pluralism. The first edition of this book was titled *The Experience of Knowledge* in response to a clear call for experience in education. Certainly, if the sole purpose of education is to acquire information, learning becomes dry, abstract, and deadening. To have meaningful consequence in a person's life, coming to know must become an experience. Too often, however, such experience is understood simply as doing -- field trips, class projects, and so on. But doing, if unconnected to the whole person, is just activity. To become true experience, it must speak out of, and toward, a student's secret center: the spirit. Hence, the author affirms that authentic education is always in search of the spirit.

The Spirit of Education Jeff White, 2006 What is education? It's a term we use every day to describe the process of putting 25 or 30 young souls into a cinder block room and filling their heads with what-all over the course of the first quarter of their lives. But is that education? If it's not, what is it? And what are its consequences? Education--true education--is not a process of pouring in from without, but of calling forth what is within. It's not a process of memorization or socialization or instillation, but a process of nurturing, of allowing, of evoking. It's a process of bringing forth the person one is meant to be. The Spirit of Education attempts to begin anew our conversations about education: what it is, and where it might take us.

The Spirit of the School Julian Stern, 2011-11-03 Recent interest in personalized learning and the issues raised by Every Child Matters have led to renewed enthusiasm for the more personal and holistic aspects of schooling. This fascinating monograph draws on empirical evidence from schools across the world to answer key questions such as: - What is the spirit of the school? - How does it differ from school ethos? - What can teachers and pupils do to contribute to the spirit of the school? Drawing heavily on research into learning theories (from the social constructivist tradition), community (from the philosophy of John Macmurray) and dialogue (from the philosophy of

Martin Buber), Julian Stern's unique and illuminating book will stimulate fresh thinking about spiritual education.

Apprenticed To Spirit David Spangler,2011-08-18 An absorbing memoir of one man's path to understanding how we can learn to lead lives of greater blessing and to be sources of blessing and service for the world as a whole. For as long as he can remember, David Spangler has been physically aware of a spiritual world existing alongside this one. In 1965, David Spangler left college to follow an inner spiritual calling and encountered an extraordinary presence, which he named "John." Over the next quarter-century John would assist David in exploring the "inner worlds" of the spirit, and would tutor him in some of the most basic mysteries of life and the nature of the human spirit. In *Apprenticed to Spirit*, Spangler recounts how John showed him the way to develop a spiritual intelligence—what Spangler calls "a mind of the soul"—and how to integrate it into everyday life. Spangler learned to think with his soul and embarked on the apprenticeship to understanding the sacredness of our world and of the realms beyond ours—a journey that continues to this day.

Rediscovering the Spirit of Education After Scientific Management Jim Neyland,2010-01-01 This book explores the origins and fundamental assumptions of scientific management, and suggests how the spirit of education might be rediscovered by turning instead to a more 'ethical', 'socially interpersonal', and 'full bodied' orientation.

The Spirit of the Waldorf School Rudolf Steiner,1995 6 lectures and an essay, 1919-1920 (CW 297) World War I destroyed the structures, values, and self-confidence that created the seeming greatness of the nineteenth century. In its place stood ruins and the shards of a civilization. In response to this, Emil Molt--the director of the Waldorf-Astoria Cigarette Factory and a student of Rudolf Steiner--decided to establish a school to educate people who could create a new culture. Thus, the Waldorf school movement was begun. Rudolf Steiner agreed to act as the school's consultant, and his insights guided the school in accomplishing this ambitious task. The goal of this education was that, through living inner work guided by the insights of Rudolf Steiner, the teachers would

develop in the children such power of thought, depth of feeling, and strength of will that they would emerge from their school years as full members of the human community, able to meet and transform the world. These lectures occurred around the opening of the first Waldorf school. They serve as an excellent, inspiring introduction to Waldorf education as a whole. Here Steiner outlines--with freshness, immediacy, and excitement--the goals and intentions of a new form of education and speaks to parents of prospective students. He explains the school's guiding principles and describes how parents must participate, with understanding and interest, in the awakening of their children's creative forces so that a healthier society can come about. The Spirit of Our Work Cynthia Dillard, 2021-11-16 An exploration of how engaging identity and cultural heritage can transform teaching and learning for Black women educators in the name of justice and freedom in the classroom In *The Spirit of Our Work*, Dr. Cynthia Dillard centers the spiritual lives of Black women educators and their students, arguing that spirituality has guided Black people throughout the diaspora. She demonstrates how Black women teachers and teacher educators can heal, resist, and (re)member their identities in ways that are empowering for them and their students. Dillard emphasizes that any discussion of Black teachers' lives and work cannot be limited to truncated identities as enslaved persons in the Americas. *The Spirit of Our Work* addresses questions that remain largely invisible in what is known about teaching and teacher education. According to Dillard, this invisibility renders the powerful approaches to Black education that are embodied and marshaled by Black women teachers unknown and largely unavailable to inform policy, practice, and theory in education. *The Spirit of Our Work* highlights how the intersectional identities of Black women teachers matter in teaching and learning and how

educational settings might more carefully and conscientiously curate structures of support that pay explicit and necessary attention to spirituality as a crucial consideration.
