The War of the Worlds Peter J. Beck,2016-08-25 First published in 1897, H.G. Wells's alien invasion narrative The War of the Worlds was a landmark work of science fiction and one that continues to be adapted and referenced in the 21st century. Chronicling the novel's contexts, its origins and its many multi-media adaptations, this book is a complete biography of the life - and the afterlives - of The War of the Worlds. Starting with the initial serialisations in US newspapers, Peter Beck goes on to examine Orson Welles's legendary 1938 radio adaptation, TV and film adaptations from George Pal to Steven Spielberg, Jeff Wayne's rock opera and the numerous other works that have taken their inspiration from Wells's original. Drawing on new archival research, this is a comprehensive account of the continuing impact of The War of the Worlds.

The Time Machine and the War of the Worlds H. G. Wells, 2013-07-09 Contents: *The Time Machine* *War of the Worlds* *The Time Traveller* (for so it will be convenient to speak of him) was expounding a recondite matter to us. His grey eyes shone and twinkled, and his usually pale face was flushed and animated. The fire burned brightly, and the soft radiance of the incandescent lights in the lilies of silver caught the bubbles that flashed and passed in our glasses. Our chairs, being his patents, embraced and caressed us rather than submitted to be sat upon, and there was that luxurious after-dinner atmosphere when thought roams gracefully free of the trammels of precision. And he put it to us in this way—marking the points with a lean forefinger—as we sat and lazily admired his earnestness over this new paradox (as we thought it) and his fecundity.

The War of the Worlds By H. G. Wells (Annotated Edition) H G Wells,2020-10-31 The unnamed narrator from Woking, England, begins by comparing the unsuspecting human population to the contents of a slide on a microscope, those contents as unaware of the beings observing them as the Earthlings are of the Martians with intellects vast and cool and unsympathetic who watch them as they go about their daily activities. He claims Mars is older than Earth and wonders why man-so blinded by his vanity-has failed to recognize for so long the probability of the existence of intelligent life on its neighboring planet. He observes that just as Mars is cooling as it ages and its inhabitants long for a younger, verdant world, so too must humanity face the same fate. Foreshadowing the destruction the aliens will bring, the narrator reminds readers of the cruelty that humans have also brought on their fellow beings, as when native Tasmanians were wiped out by British colonialists off the coast of Australia.
