Publishing Higher Degree Research Janice Orrell,David D. Curtis,2016-08-23 This book is proof of what is possible when higher degree candidates and their supervisors collaborate to ensure publication of higher degree research; one of the responsibilities that comes with higher degree candidature and supervision. It transcends the limitations inherent in traditional 'isolationist', 'master and apprentice' relationships to reveal the transformative value of building productive networks among academics and students. Written for higher degree research policy makers, administrators, supervisors and candidates

in the field of education, this book aims to provoke departmental mindfulness of the higher degree research journey and, in light of this, reconsideration of the nature of supervisory roles and practices. It explores key research on higher degree research candidature and supervisory practices; reveals the reflections of 14 higher degree candidates' experiences in terms of the impact and transformations that occur as a result of undertaking research, not least of which is writing for publication; showcases aspects of their research in their published chapters; and accords them first author status. Its five sections are: Publishing Higher Degree Research: key research on higher degree research candidature and supervisory practices, and the process of transforming students from candidates into published researchers. Learning with Technology: in Aboriginal education and in primary and early childhood education. Professional Learning and Practice: in the development of teacher research and inquiry, enhancing and assuring learning quality in Indonesia and Lesotho, and higher order thinking in teaching trade skills. Student Learning: in teaching English language in Indonesia, and the place of intimation in creativity and innovation in mathematics teaching. Curriculum Change: in teaching University mathematics in English in Indonesia, integrating graduate attributes in an Islamic University in Aceh, enabling innovation in Acehnese schools and reforming assessment in Rwanda.

Digital Disruption in Marketing and Communications Edoardo Magnotta,2019-10-18 This book sets out the new frontier of marketing and communication through real case histories. Companies must rethink their traditional approaches to successfully face the upcoming challenges. They must learn how to innovate and change things when they go well. New emerging technologies such as AI and IoT are the new frontiers of the digital transformation that are radically changing the way consumers and companies communicate and engage with each other. Marketing makes a company a change-maker, while communications tell the story to engage customers and stakeholders. The book introduces brand positioning (to match brand values and consumers' attributes), and brand as human being (to raise trust, loyalty and engagement among customers and stakeholders), through Enel X and its partnership with Formula E in the e-mobility case, and the PMI case (its disruptive effect on tobacco industry). After a deep analysis of the disruptive effects on business models of the digital transformation, the book explores digital communications through the Pietro Coricelli case (how a well-designed digital strategy can raise reputation and sales). The book also provides a new holistic approach and identifies a future leader, through the H-FARM case (how to disrupt business models and education). The book is aimed at researchers, students and practitioners, and provides an improved understanding of marketing and communications, and the evolution of the strategic, organisational, and behavioural

model.

<u>Das Android-Smartphone-Buch</u> Hans Dorsch,2014-05-02 Mit dem Handy einfach nur telefonieren? Das war einmal. Wer heute einen Mobilfunkvertrag abschließt, bekommt in der Regel ein Smartphone angeboten. Die meisten dieser Geräte nutzen Android als Betriebssystem. Und auch wenn Ihnen das eigentlich egal ist, Android-Smartphones bringen bereits eine eingebaute Funktionalität mit, die sich sehen lassen kann. Leider ist es häufig mühsam, diese Möglichkeiten zu entdecken. Den wenigsten Geräten liegt nämlich ein ordentliches Handbuch bei. Hier springt Hans Dorsch ein. Kompakt und systematisch stellt er alle eingebauten Funktionen von Android-Smartphones vor, weist Sie auf Apps hin, die den Funktionsumfang noch einmal erheblich erweitern, und verrät viele Tipps und Kniffe. So werden Sie Ihren Androiden garantiert noch viel mehr schützen. Die Anleitungen und Tipps in diesem Buch sind für die Android-Systemversionen 4.4 (KitKat) und höher geschrieben. Die meisten Inhalte

treffen auch auf Geräte mit niedrigeren Systemversionen zu. Der Autor hat als Grundlage für dieses Buch Geräte von Google (gefertigt von LG) und Samsung verwendet. Die Bildschirme können bei jedem Gerät etwas anders aussehen, die Funktionen stimmen jedoch weitgehend überein.
