Africa's Business Revolution Acha Leke, Musta Chironga, George Desvaux, 2018-10-30 The Definitive Guide to Doing Business in Africa For global and Africa-based companies looking to access new growth markets, Africa offers exciting opportunities to build large, profitable businesses. Its population is young, fast-growing, and increasingly urbanized--while rapid technology adoption makes the continent a fertile arena for innovation. But Africa's business environment remains poorly understood; it's known to many executives in the West only by its reputation for complexity, conflict, and corruption. Africa's Business Revolution provides the inside story on business in Africa and its future growth prospects and helps executives understand and seize the opportunities for building profitable, sustainable enterprises. From senior leaders in McKinsey's African offices and a leading executive on the continent, this book draws on in-depth proprietary research by the McKinsey Global Institute as well as McKinsey's extensive experience advising corporate and government leaders across Africa. Brimming with company case studies and exclusive interviews with some of Africa's most prominent executives, this book comes to life with the vibrant stories of those who have navigated the many twists and turns on the road to building successful businesses on the continent. Combining an unrivalled fact base with expert advice on shaping and executing an Africa growth strategy, this book is required reading for global business executives looking to expand their existing operations in Africa--and for those seeking a road map to access this vast, untapped market for the first time.

The History of Business in Africa Grietjie Verhoef, 2017-10-16 This book offers a comprehensive study of the history of African business. By analyzing the specificities of African business culture, as well as the dynamically changing African policy context, the author sheds new light on the development of African enterprises, markets and institutions. The book covers a wide range of historical studies, starting with the earliest exchange networks, the new market opportunities resulting from European penetration, the dualism of state-owned companies and private enterprises during the twentieth century, the role of foreign direct investments and multinational companies during the 1990s, and the globalization of African business.

Globalization and the Cultures of Business in Africa Scott D. Taylor, 2012 Can Africa develop businesses beyond the extractive or agricultural sectors? What would it take for Africa to play a major role in global business? By focusing on recent changes, Scott D. Taylor demonstrates how Africa's

business culture is marked by an unprecedented receptivity to private enterprise. Challenging persistent stereotypes about crony capitalism and the lack of development, Taylor reveals a long and dynamic history of business in Africa. He shows how a hospitable climate for business has been spurred by institutional change, globalization, and political and economic reform. Taylor encourages a broader understanding of the mosaic of African business and the diversity of influences and cultures that shape it.

Africa South of the Sahara Robert Stock, 2012-12-01 This authoritative, widely adopted text provides a broad introduction to the geography of Africa south of the Sahara. The book analyzes the political, economic, social, and environmental processes that shape resource use and development in this large, diverse region. Students gain a context for understanding current development debates and addressing questions about the nature and sustainability of contemporary changes. Timely topics include the rise of foreign investment in Africa, the evolving geographies of rural-urban linkages, the birth of the Republic of South Sudan, and advances in the struggle against HIV/AIDS. New to This Edition: *Fully updated to reflect the latest data and trends in development. *Chapters on development theory, cultural and societal diversity, the political geography of postindependence Africa, economic integration, and the geography of poverty. *Substantially revised coverage of gender dynamics, urban living environments, mineral and energy resources, and many other topics. *Many of the 200+ maps, graphs, tables, and photographs are new or updated. Pedagogical Features Include: *Vignettes in every chapter that provide detailed case studies from a variety of countries and elaborate on key concepts. *Recommendations for further reading on each topic, including print and online sources. *Downloadable PowerPoint slides of all original figures, photos, and tables. *An extensive glossary.

BRICS and MICs: Implications for Global Agrarian Transformation Ben Cousins, Saturnino M. Borras Jr., Sérgio Sauer, Jingzhong Ye, 2020-05-21 The economic and political rise of the BRICS countries (Brazil, Russia, India, China and South Africa), and powerful middle-income countries (MICs) such as Argentina, Indonesia and Turkey, has far-reaching implications for global agrarian transformation. These countries are key sites of agricultural commodity production, distribution, circulation and consumption and are contributing to major shifts in the character of agro-food systems. This comprehensive collection explores these issues through the lens of critical agrarian studies, which examine fundamental social change in, and in relation to, rural worlds. The authors explore key themes such as the processes of agrarian change associated with individual countries within the grouping, the role and impact

of BRICS countries within their respective regions, the role of other MICs within these regions and the rising importance of MICs within global and regional agro-food systems. The book encompasses a wide variety of case studies, including the expansion of South African agrarian capital within Africa; Brazil as a regional agro-food power and its complex relationship with China, which has been investing heavily in Brazil; the role of BRICS and MICs in Bolivia's soy complex; crop booms within China; China's role in land deals in Southeast Asia; and Vietnamese investment in Cambodia. This book will be of interest to students and researchers of critical agrarian studies, with a focus on BRICS and MICs. It was originally published as a special issue of the journal *Globalizations*.

CEO Guide to Doing Business in South Africa Ade Asefeso MCIPS MBA, 2012-01-24 Often, new exporters will feel a bit overwhelmed about trading with South Africa. Much consideration and planning will need to go into deciding on the company type, delivery of products and services, marketing strategies, and local conditions. Before making these big decisions exporters and investors should spend some time thinking about business objectives.

Digital Innovations, Business and Society in Africa Richard Boateng, Sheena Lovia Boateng, Thomas Anning-Dorson, Longe Olumide Babatope, 2022-01-01 For African enterprises, entrepreneurs and governments to take full advantage of new digital opportunities, they need a shared strategic understanding of where they are, what they have, and what they may need to have for the future. This book presents this shared strategic vision to guide future coordinated actions of African enterprises, entrepreneurs, consumers/citizens and governments in using new and emerging digital technologies. It showcases how consumers/citizens, entrepreneurs, organisations, institutions and governments are leveraging new and emerging digital innovations to disrupt and transform value creation and service delivery in Africa.

The Oxford Handbook of the South African Economy Arkebe Oqubay, Fiona Tregenna, Imraan Valodia, 2021-11-18 While sharing some characteristics with other middle-income countries, South Africa is a country with a unique economic history and distinctive economic features. It is a regional economic powerhouse that plays a significant role, not only in southern Africa and in the continent, but also as a member of BRICS. However, there has been a lack of structural transformation and weak economic growth, and South Africa faces the profound triple challenges of poverty, inequality, and unemployment. Any meaningful debate about economic policies to address these challenges needs to be informed by a deep understanding of historical developments, robust empirical evidence, and rigorous analysis of South Africa's complex economic landscape. This volume seeks to provide a wide-

ranging set of original, detailed, and state-of-the-art analytical perspectives that contribute to scientific knowledge as well as to well-informed and productive discourse on the South African economy. While concentrating on the more recent economic issues facing South Africa, the handbook also provides historical and political context. It offers an in-depth examination of strategic issues in the country's key economic sectors, and brings together diverse analytical perspectives.

Africa's Critical Choices Dunod Editeur,2019-02-22 This volume examines contemporary Africa, a vast continent which, while entering the era of globalization, is also confronted by a number of issues, including the environment and climate change, demographics, trade issues, internal and external migration, education, economic Issues, governance, and the influence of other countries. Written by former Prime Minister of Niger and current Chief Executive Officer of the Secretariat of the New Partnership for Africa's Development (NEPAD), Dr Ibrahim Assane Mayaki, this book offers an overview of Africa, and looks to the next generation of leaders in the continent, aiming to offer a manifesto for future change.

Infrastructure for Economic Development and Poverty Reduction in Africa Afeikhena Jerome,2011 Evaluates the role of infrastructure in promoting economic growth and poverty reduction in Africa. Examines complementary physical infrastructure: telecommunications, power, transport (roads, railways, ports and airports) and water supply. Explores Africa's infrastructure endowment and financing options.

Manufacturing Militance Gay W. Seidman,2023-09-01 Challenging prevailing theories of development and labor, Gay Seidman's controversial study explores how highly politicized labor movements could arise simultaneously in Brazil and South Africa, two starkly different societies. Beginning with the 1960s, Seidman shows how both authoritarian states promoted specific rapid-industrialization strategies, in the process reshaping the working class and altering relationships between business and the state. When economic growth slowed in the 1970s, workers in these countries challenged social and political repression; by the mid-1980s, they had become major voices in the transition from authoritarian rule. Based in factories and working-class communities, these movements enjoyed broad support as they fought for improved social services, land reform, expanding electoral participation, and racial integration. In Brazil, Seidman takes us from the shopfloor, where disenfranchised workers organized for better wages and working conditions, to the strikes and protests that spread to local communities. Similar demands for radical change emerged in South Africa, where community groups in black townships joined organized labor in a challenge to minority rule that linked class consciousness to racial oppression. Seidman details the complex

dynamics of these militant movements and develops a broad analysis of how newly industrializing countries shape the opportunities for labor to express demands. Her work will be welcomed by those interested in labor studies, social theory, and the politics of newly industrializing regions.

Business Analytics Jeffrey D. Camm,James J. Cochran,Michael J. Fry,Jeffrey W. Ohlmann,2020-03-10 Present the full range of analytics -- from descriptive and predictive to prescriptive analytics -- with Camm/Cochran/Fry/Ohlmann's market-leading BUSINESS ANALYTICS, 4E. Clear, step-by-step instructions teach students how to use Excel, Tableau, R and JMP Pro to solve more advanced analytics concepts. In addition, MindTap and WebAssign customizable digital course solutions offer an interactive eBook, auto-graded exercises from the printed book, algorithmic practice problems with solutions and Exploring Analytics visualizations to strengthen students' understanding of course concepts.

Digital Service Delivery in Africa Ogechi Adeola,Jude N. Edeh,Robert E. Hinson,Fulufhelo Netswera,2022-02-07 The dynamics of the world's pervasive digital technologies is transforming organisations and enabling enterprises to create sustainable competitive advantage. This presents huge economic opportunities for Africa. This book responds to the need for African enterprises and organisations—particularly those in the service sector—to fully exploit the inherent potential in digital platforms by putting in place processes to respond effectively to changing consumer demands. Digital service delivery is conceptualised as a key driver of effective management and service delivery across the value chain of businesses. The authors offer insights into the opportunities, drivers, structures, and models of digital service delivery specific to the African context, using case studies and country-based themes that highlight how the adoption of digital platforms and practices can transform service delivery for value-creation. The book examines the scope and applications of digital businesses, emphasising the emergence, value-creation, and strategic implications for Africa's private and public enterprises. Students, entrepreneurs, IT innovators, academics, and policymakers will gain a greater understanding of how digitalisation is shaping consumer expectations, industry practices, and service delivery in Africa.

The Economist ,1921

The Rise of Africa's Middle Class Henning Melber, 2016-12-15 Across Africa, a burgeoning middle class has become the poster child for the 'Africa rising' narrative. Ambitious, aspirational and increasingly affluent, this group is said to embody the values and hopes of the new Africa, with international bodies ranging from the United Nations Development Programme to the World Bank regarding them as important agents of both economic development and democratic change. This narrative, however, obscures the complex and often ambiguous role that this group actually plays in African societies. Bringing together economists, political scientists, anthropologists and development experts, and spanning a variety of case studies from across the continent, this collection provides a much-needed corrective to the received wisdom within development circles, and provides a fresh perspective on social transformations in contemporary Africa.

Psychology in Economics and Business Gerrit Antonides, 2012-12-06 This book is targeted at students of economics and business administration and presents the state of the art in behavioral economics and economic psychology and their applications to economics and business. It discusses economic psychological themes, information processing, and applications in fields including entrepreneurial behavior, perceptions of price, risk, inflation and economic activities, and economic socialization.

Who Owns the World's Media? Eli M. Noam, The International Media Concentration Collaboration, 2015-12-07 Media ownership and concentration has major implications for politics, business, culture, regulation, and innovation. It is also a highly contentious subject of public debate in many countries around the world. In Italy, Silvio Berlusconi's companies have dominated Italian politics. Televisa has been accused of taking cash for positive coverage of politicians in Mexico. Even in tiny Iceland, the regulation of media concentration led to that country's first and only public referendum. *Who Owns the World's Media?* moves beyond the rhetoric of free media and free markets to provide a dispassionate and data-driven analysis of global media ownership trends and their drivers. Based on an extensive data collection effort from scholars around the world, the book covers thirteen media industries, including television, newspapers, book publishing, film, search engines, ISPs, wireless telecommunication and others, across a ten to twenty-five year period in thirty countries. In many countries--like Egypt, China, or Russia--little to no data exists and the publication of these chapters will

become authoritative resources on the subject in those regions. After examining each country, Noam and his collaborators offer comparisons and analysis across industries, regions, and development levels. They also calculate overall national concentration trends beyond specific media industries, the market share of individual companies in the overall national media sector, and the size and trends of transnational companies in overall global media. This definitive global study of the extent and impact of media concentration will be an invaluable resource for communications, public policy, law, and business scholars in doing research and also for media, telecom, and IT companies and financial institutions in the private sector.
