**Women Nobel Peace Prize Winners, 2d ed.** Anita Price Davis, Marla J. Selvidge, 2015-12-01 From the first woman Nobel Peace Prize recipient, Bertha von Suttner (1905), to the latest and youngest female Nobel laureate, Malala Yousafzai (2014), this book in its second edition provides a detailed look at the lives and accomplishments of each of these sixteen Prize winners. They did not expect recognition or fame for their work--economist Emily Greene Balch (1946) was surprised to learn that anyone knew about her. But they did not work in isolation: all met with discouragement, derision, threats or--in Yousafzai's case--attempted murder and exile. A history of the Prize and a biographical sketch of Alfred Nobel are included.

Founded in 1901 by the inventor of dynamite, Alfred Nobel, the Nobel Prize is the world's most celebrated honour. It grants its

winners instant celebrity status and acclaim. It is very difficult to select the best out of best, because general perception is that a Nobel laureate is always the best in the concerned field. **How to Win the Nobel Prize in Literature** David Carter, 2013-03-28 With humor, wit, and insight, David Carter sets out a number of fail-safe rules to follow in order to win the Nobel Prize in literature. There are acclaimed writers— James Joyce, Marcel Proust, Tolstoy, Mark Twain— who never won the Nobel Prize, and others, less well known, such as Henryk Sienkiewicz, Paul Heyse, and Romain Rolland, who did. What exactly does one have to do to impress, or be snubbed by, the Nobel Committee? This book is a fascinating survey of the Nobel Prize for literature, constructed as a tongue-in-cheek series of rules. Be a man is one of them, and Make sure your best work has been translated into Swedish another. Presenting biographical information as well as extracts from their work, David Carter will try to answer a number of questions about the prize, such as What are the outstanding qualities of the winners' works? Were there any unusual circumstances attending the award? and Who else was considered and rejected and why?

**The Beginner's Guide to Winning the Nobel Prize** Peter Doherty, 2006 In *The Beginner's Guide to Winning the Nobel Prize*, Doherty recounts his unlikely path to becoming a Nobel Laureate. Beginning with his humble origins in Australia, he tells how he developed an interest in immunology and describes his award-winning, influential work with Rolf Zinkernagel on T-cells and the nature of immune defense. In prose that is at turns amusing and astute, Doherty reveals how his nonconformist upbringing, sense of being an outsider, and search

for different perspectives have shaped his life and work. Doherty offers a rare, insider's look at the realities of being a research scientist. He lucidly explains his own scientific work and how research projects are selected, funded, and organized; the major problems science is trying to solve; and the rewards and pitfalls of a career in scientific research. For Doherty, science still plays an important role in improving the world, and he argues that scientists need to do a better job of making their work more accessible to the public. Throughout the book, Doherty explores the stories of past Nobel winners and considers some of the crucial scientific debates of our time, including the safety of genetically modified foods and the tensions between science and religion. He concludes with some tips on how to win a Nobel Prize, including advice on being persistent, generous, and culturally aware, and he stresses the value of evidence. *The Beginner's Guide to Winning the Noble Prize* is essential reading for anyone interested in a career in science.

**Nobel Prizes and Life Sciences** Erling Norrby, 2010 The Nobel Prizes in natural sciences have achieved the reputation of being the ultimate accolade for scientific achievements. This book gives a unique insight into the selection of Nobel Prize recipients, in particular the life sciences. The evolving mechanisms of selection of prize recipients are illustrated by reference to archives, which have remained secret for 50 years. Many of the prizes subjected to particular evaluation concern awards given for discoveries in the field of infectious diseases and the

interconnected field of genetics. The book illustrates the individuals and environments that are conducive to scientific creativity. Nowhere is this enigmatic activity'-- the mime mover in advancing the human condition highlighted as lucidly as by identification individuals worthy of Nobel Prizes. --Book Jacket.

**The Nobel Prize** Agneta Wallin Levinovitz, Nils Ringertz, 2001-08-14 The Nobel Prize, as founded in Alfred Nobel's will, was the first truly international prize. There is no other award with the same global scope and mission. The Nobel Prizes in Physics, Chemistry, Physiology or Medicine, Literature, Peace, and the Bank of Sweden Prize in Economic Sciences (from 1969) have not only captured the most significant contributions to the progress of mankind, they also constitute distinct markers of the major trends in their respective areas. The main reason for the prestige of the Prize today is, however,

the lasting importance of the names on the list of Laureates and their contributions to human development. In celebration of the centennial of the Nobel Prize in 2001, this book offers a clear perspective on the development of human civilization over the past hundred years. The book serves to present the major trends and developments and also provide information about the life and philosophy of Alfred Nobel, the history of the Nobel Foundation, and the procedure for nominating and selecting Nobel Laureates.

Keywords: Reviews: "This wonderful book gives a comprehensive review of the Nobel prizes awarded since 1901 ... Reading the book is like reading a compressed history of humankind in the twentieth century. It shows how by and large the Nobel prizes have indeed tracked the epoch-making events in this turbulent century." M Veltman Nobel Laureate in Physics (1999), Emeritus Professor of Physics University of Michigan, Ann Arbor

Nobel Michael Worek, 2010-06-03 The story of the

winners of the world's most prestigious prize, now updated to include the 2009 recipients. The Nobel Prize is widely regarded as the most prestigious award one can receive. The Prize is administered by the Nobel Foundation, and the award ceremonies receive extensive media coverage. The awards are often politically controversial, and many winners use their acceptance speech to further favorite causes. Along with background information, the book provides a look at the 200 most famous and most interesting Nobel winners. The profiles are arranged by prize and by year. A photo or illustration appears with each profiled Laureate. Other illustrations help to explain complex subjects in science and make it easier for the reader to appreciate the accomplishments for which the prize has been awarded. A number of fascinating facts emerge from this lively account. For example, only 40 of the 829 Nobel Laureates have been women, among them Marie Curie, who won twice. Linus Pauling is the only person to have been awarded two Nobel Prizes in different categories, the 1954 Nobel Prize in Chemistry and the 1962 Nobel Peace Prize. The youngest Laureate is Lawrence Bragg, who was 25 years old when he received the Nobel Prize in Physics with his father in 1915. The oldest is Leonid Hurwicz, who was 90 years old when he received the 2007 Economics Prize. Two Laureates have declined the Nobel Prize: Jean-Paul Sartre, and Le Duc Tho. Other famous names include Ernest Hemingway, Albert Einstein, Albert Schweitzer, James Watson and Francis Crick, Paul Krugman, Charles Kao, Elizabeth Blackburn and Barack Obama. Nobel: A

Century of Prize Winners is sure to find a readership among the millions who follow the awards each year and want to understand more about the most important prize in the world.

*Losing the Nobel Prize: A Story of Cosmology, Ambition, and the Perils of Science's Highest Honor* Brian Keating, 2018-04-24 Riveting.—Science A Forbes, Physics Today, Science News, and Science Friday Best Science Book Of 2018 Cosmologist and inventor of the BICEP (Background Imaging of Cosmic Extragalactic Polarization) experiment, Brian Keating tells the inside story of the mesmerizing quest to unlock cosmology's biggest mysteries and the human drama that ensued. We follow along on a personal journey of revelation and discovery in the publish-or-perish world of modern science, and learn that the Nobel Prize might hamper—rather than advance—scientific progress. Fortunately, Keating offers practical solutions for reform, providing a vision of a scientific future in which cosmologists may finally be able to see all the way back to the very beginning.

**The Nobel Peace Prize** Fredrik S. Heffermehl, 2010-08-19 In this groundbreaking and controversial critique of the selections of Nobel Peace Prize winners, an eminent Norwegian lawyer and peace activist calls for its return to legal and moral compliance with the will of Alfred Nobel who wished to support disarmament to prevent war. The Nobel Peace Prize is the world's most coveted award, galvanizing the world's attention for 110 years. In recent decades, it has also become the world's most reviled award, as heads of

militarized states and out-and-out warmongers and terrorists have been showered with peace prizes. Delving into previously unpublished primary sources, Fredrik Heffermehl reveals the history of the inner workings of the Norwegian Nobel Committee as it has come under increasing political, geopolitical, and commercial pressures to make inappropriate awards. As a Norwegian lawyer, Heffermehl makes the case that the Norwegian politicians entrusted with the Nobel peace awards have brushed aside the legal requirements in Scandinavian estate law using the prize to promote their own political and personal interests instead of the peace ideas Alfred Nobel had in mind. Evaluating each of the 119 Nobel Peace Prizes awarded between 1901 and 2009, the author tracks the ever-widening divergence of the committee's selections from Nobel's intentions and concludes that all but one of the last ten prizes are illegitimate under the law.

**Great Stories by Nobel Prize Winners** Leo Hamalian, 1959

Nobel Prize Women in Science Sharon Bertsch McGrayne, 2001-04-12 Since 1901 there have been over three hundred recipients of the Nobel Prize in the sciences. Only ten of them—about 3 percent—have been women. Why? In this updated version of *Nobel Prize Women in Science*, Sharon Bertsch McGrayne explores the reasons for this astonishing disparity by examining the lives and achievements of fifteen women scientists who either won a Nobel Prize or played a crucial role in a Nobel Prize - winning project. The book reveals the relentless discrimination these women

faced both as students and as researchers. Their success was due to the fact that they were passionately in love with science. The book begins with Marie Curie, the first woman to win the Nobel Prize in physics. Readers are then introduced to Christiane Nusslein-Volhard, Emmy Noether, Lise Meitner, Barbara McClintock, Chien-Shiung Wu, and Rosalind Franklin. These and other remarkable women portrayed here struggled against gender discrimination, raised families, and became political and religious leaders. They were mountain climbers, musicians, seamstresses, and gourmet cooks. Above all, they were strong, joyful women in love with discovery. Nobel Prize Women in Science is a startling and revealing look into the history of science and the critical and inspiring role that women have played in the drama of scientific progress.

**Peace, They Say** Jay Nordlinger, 2012-03-20 In this book, Jay Nordlinger gives a history of what the subtitle claims is the "world's most famous and problematic award." The Nobel Peace Prize, like the other Nobel prizes, began in 1901. So we have a neat, sweeping history of the 20th century, and about a decade beyond. The Nobel prize involves a first world war, a second world war, a cold war, a terror war, and more. It contends with many of the key issues of modern times, and of life itself. It also presents a parade of interesting people—some 120 laureates, not a dullard in the bunch. Some of these laureates have been historic statesmen, such as Roosevelt (Teddy) and Mandela. Some have been heroes or saints, such as Martin Luther King and Mother Teresa. Some

belong in other categories—where would you place Arafat? Controversies also swirl around the awards to Kissinger, Gorbachev, Gore, and Obama, to name just a handful. Probably no figure in this book is more interesting than a non-laureate: Alfred Nobel, the Swedish scientist and entrepreneur who started the prizes. The book also takes up many a person who did not win the peace prize, but might have, or should have: Gandhi? Peace, They Say is enlightening and enriching, and, here and there, fun. It has its opinions, but it also provides what is necessary for readers to form their own opinions. What is peace, anyway? All these people who have been crowned “champions of peace,” and the world’s foremost—should they have been? Such is the stuff this book is made on.

**100 Years of Nobel Prizes** Baruch Aba Shalev, 2002  
Winning a Nobel Prize is unquestionably the highest possible recognition of intellectual and personal achievement. This book provides a detailed statistical analysis of what is required to win a Nobel, why it sometimes takes a long time to collect the award, and what the prizes have meant to human progress.

**The Last Gift** Abdulrazak Gurnah, 2014-02-11  
One day, long before the troubles, he slipped away without saying a word to anyone and never went back. And then another day, forty-three years later, he collapsed just inside the front door of his house in a small English town. It was late in the day when it happened, on his way home after work, but it was also late in the day altogether. He had left things for too long and there was no one to blame for it but himself. Abbas has never

told anyone about his past-before he was a sailor on the high seas, before he met his wife Maryam outside a Boots in Exeter, before they settled into a quiet life in Norwich with their children, Jamal and Hanna. Now, at the age of sixty-three, he suffers a collapse that renders him bedbound and unable to speak about things he thought he would one day have to. Jamal and Hanna have grown up and gone out into the world. They were both born in England but cannot shake a sense of apartness. Hanna calls herself Anna now, and has just moved to a new city to be near her boyfriend. She feels the relationship is headed somewhere serious, but the words have not yet been spoken out loud. Jamal, the listener of the family, moves into a student house and is captivated by a young woman with dark-blue eyes and her own, complex story to tell. Abbas's illness forces both children home, to the dark silences of their father and the fretful capability of their mother Maryam, who began life as a foundling and has never thought to find herself, until now.

*The World's Most Prestigious Prize* Geir Lundestad, 2019-09-12 *The World's Most Prestigious Prize: The Inside Story of the Nobel Peace Prize* is a fascinating, insider account of the Nobel peace prize. Drawing on unprecedented access to the Norwegian Nobel Institute's vast archive, it offers a gripping account of the founding of the prize, as well as its highs and lows, triumphs and disasters, over the last one-hundred-and-twenty years. But more than that, the book also draws on the author's unique insight during his twenty-five years as Director of the Norwegian Nobel Institute

and Secretary of the Norwegian Nobel Committee. It reveals the real story of all the laureates of that period - some of them among the most controversial in the history of the prize (Gorbachev, Arafat, Peres and Rabin, Mandela and De Klerk, Obama, and Liu Xiaobo) - and exactly why they came to receive the prize. Despite all that has been written about the Nobel Peace Prize, this is the first-ever account written by a prominent insider in the Nobel system.

**Nobel Prizes that Changed Medicine** Gilbert Thompson, 2012 This book brings together in one volume fifteen Nobel Prize-winning discoveries that have had the greatest impact upon medical science and the practice of medicine during the 20th century and up to the present time. Its overall aim is to enlighten, entertain and stimulate. This is especially so for those who are involved in or contemplating a career in medical research. Anyone interested in the particulars of a specific award or Laureate can obtain detailed information on the topic by accessing the Nobel Foundation's website. In contrast, this book aims to provide a less formal and more personal view of the science and scientists involved, by having prominent academics write a chapter each about a Nobel Prize-winning discovery in their own areas of interest and expertise.
