Concrete Permeability and Durability Performance

Roberto J. Torrent, Rui D. Neves, Kei-ichi

Imamoto, 2021-12-22 Durability and service life design of concrete constructions have considerable socio-economic and environmental consequences, in which the permeability of concrete to aggressive intruders plays a vital role.

Concrete Permeability and Durability Performance provides deep insight into the permeability of concrete, moving from theory to practice, and presents over 20 real cases, such as Tokyo's Museum of Western Art, Port of Miami Tunnel and Hong Kong-Zhuhai-Macao sea-link, including field tests in the Antarctic and Atacama Desert. It stresses the importance of site testing for a realistic durability assessment and details the Torrent Method for non-destructive measurement of air-permeability. It also delivers answers for some vexing questions: Should the coefficient of permeability be expressed in m^2 or m/s ? How to get a mean pore radius of concrete from gas-permeability tests? Why should permeability preferably be measured on site? How can service life of reinforced concrete structures be predicted by site testing of gas-permeability and cover thickness? Practitioners will find stimulating examples on how to predict the coming service life of new structures and the remaining life of existing structures, based on site testing of air-permeability and cover thickness. Researchers will value theoretical principles, testing methods, as well as how test results reflect the influence of concrete mix composition and processing.

A Compendious Syriac Dictionary Robert Payne

Smith, 1998 This standard lexicon of Syriac has long been the choice of students of Syriac, both for its comprehensiveness and also because of its handy size. It

originated as an abridgement of Payne Smith's Thesaurus Syriacus, a substantially larger work that also tends to be less accessible for the student. Here the meanings of the Syriac words are given in English, and the order of the Syriac is alphabetical, to avoid requiring the student to know the root of the word being looked up. An essential tool for anyone studying or researching Syriac texts or literature and for students of the Semitic languages. The Compendious Syriac Dictionary was first published by Oxford University Press in 1903 and has been out of print for a number of years. A quality Eisenbrauns reprint based on the 1976 printing.

Hardware and Software: Verification and Testing Hana Chockler, Alan J. Hu, 2009-04-20 These are the conference proceedings of the 4th Haifa Verification Conference, held October 27–30, 2008 in Haifa, Israel. This international conference is a unique venue that brings together leading researchers and practitioners of both formal and dynamic verification, for both hardware and software systems. This year's conference extended the successes of the previous years, with a large jump in the number of submitted papers. We received 49 total submissions, with many more high-quality papers than we had room to accept. Submissions came from 19 different countries, reflecting the growing international visibility of the conference. Of the 49

submissions, 43 were regular papers, 2 of which were later withdrawn, and 6 were tool papers. After a rigorous review process, in which each paper received at least four independent reviews from the distinguished Program Committee, we accepted 12 regular papers and 4 tool papers for presentation at the conference and inclusion in this volume. These numbers give acceptance rates of 29% for regular papers and 67% for tool papers (34% combined) — comparable to the elite, much older, conferences in the field. A Best Paper Award, selected on the basis of the reviews and scores from the Program Committee, was presented to Edmund Clarke, Alexandre Donzé, and Axel Legay for their paper entitled “Statistical Model Checking of Mixed-Analog Circuits with an Application to a Third-Order Delta-Sigma Modulator.” The refereed program was complemented by an outstanding program of invited talks, panels, and special sessions from prominent leaders in the field.
