**Pour le Sport** Roxanna Curto,Rebecca Wines,2021-11-03 This edited volume gathers together studies examining various aspects of physical culture in literature written in French from Europe and around the Francophone world. We define “physical culture” as the systematic care for and development of the physique, and interpret it to include not only sport in the modern sense, but also all the athletic activities that preceded it or relate to it, such as bodily forms of exercise, leisure, and artistic creation. Our essays pursue diverse interpretive approaches and focus on texts from a wide variety of periods (medieval to the present) and genres (short stories, novels, essays, poetry) in order to consider the fundamental–yet highly neglected–place of physical activities in literature and culture from the French-speaking world. Some of the questions the essays explore include: Does the genre “sports literature” exist in French, and if so, what are its characteristics? How do governments or other political entities mobilize sports literature? What role do narratives about sports—especially the creation of teams—play in the construction of national, regional and/or local identities? How is physical culture used in literary works for pedagogical or ideological purposes? To what extent do sports performances provide a metaphorical and figurative discourse for discussing literature and culture?

*European Romanticism* Stephen Prickett, 2014-04-14 Romanticism was always culturally diverse. Though English-language anthologies have previously tended to see Romanticism as predominantly British, the term itself actually originated in Germany, where it became the banner of a Europe-wide movement involving the profound intellectual and aesthetic changes which we now associate with modernity. This anthology is the first to place British Romanticism within a comprehensive and multi-lingual European context, showing how ideas and writers interconnected across national and linguistic boundaries. By reprinting everything in the original languages, together with an English translation of all non-English material in parallel on the opposite page, it offers a new intellectual map of Romanticism. Material is thematically arranged as follows: - Art & Aesthetics - The Self - History - Language - Hermeneutics & Theology - Nature - The Exotic - Science While focusing on European texts, the inclusion of essays on their North American and Japanese reception means that Romanticism can be seen as a global phenomenon, influencing a surprising number of the ways in which the modern world sees itself.

**Pionniers du droit occidental au Moyen Age** André Gouron,2023-05-31  
'Pioneers' seems fitting to Professor Gouron to describe the jurists (civilists) of the 12th-century Latin West, that were the bearers of a new science, born in Bologna about 1100. Away from Bologna these pioneers were isolated, scattered from Scotland to Styria or Catalonia, and no more than one hundred can now be identified. These people, and their manuscripts and the relationships between them, are the subject of this collection, the fifth in the Variorum series by André Gouron, himself to be regarded as a pioneer in this field of research. This volume brings together twenty-two studies which have appeared since 1997 in widely scattered publications, often hard to access, along with additional notes and indexes.
