Telling the Story of Translation JUDITH. WOODSWORTH, 2019-02-21 Scholars have long highlighted the links between translating and (re)writing, increasingly blurring the line between translations and so-called 'original' works. Less emphasis has been placed on the work of writers who translate, and the ways in which they conceptualize, or even fictionalize, the task of translation. This book fills that gap and thus will be of interest to scholars in linguistics, translation studies and literary studies. Scrutinizing translation through a new lens, Judith Woodsworth reveals the sometimes problematic relations between author and translator, along with the evolution of the translator's voice and visibility. The book investigates the uses (and abuses) of translation at the hands of George Bernard Shaw, Gertrude Stein and Paul Auster, prominent writers who bring into play assorted fictions as they tell their stories of translations. Each case is interesting in itself because of the new material analysed and the conclusions reached. Translation is seen not only as an exercise and fruitful starting point, it is also a way of paying tribute, repaying a debt and cementing a friendship. Taken together, the case studies point the way to a teleology of translation and raise the question: what is translation for? Shaw, Stein and Auster adopt an authorial posture that distinguishes them from other translators. They stretch the boundaries of the translation proper, their words spilling over into the liminal space of the text; in some cases they hijack the act of translation to serve their own ends. Through their tales of loss, counterfeit and hard labour, they cast an occasionally bleak glance at what it means to be a translator. Yet they also pay homage to translation and provide fresh insights that continue to manifest themselves in current works of literature. By engaging with translation as a literary act in its own right, these eminent writers confer greater prestige on what has traditionally been viewed as a subservient art.

Performing Without a Stage Robert Wechsler, 1998 *Performing Without a Stage* is a lively and comprehensive introduction to the art of literary translation for readers of foreign fiction and poetry who wonder what it takes to translate, how the art of literary translation has changed over the centuries, what problems translators face in bringing foreign works into English and how they go about solving these problems. This book will also be of interest to translators, writers, editors, critics, and literature students, dealing as it does, often controversially, with such matters as the translator's fidelity to the author, the publishing and reviewing of translations, the nearly nonexistent public image of the stageless translator, and the value for writers and scholars of studying and practicing translation.

Textual and Contextual Voices of Translation Cecilia Alvstad, Annjo K. Greenall, Hanne Jansen, Kristiina Taivalkoski-Shilov, 2017-10-15 The notion of voice has been used in a number of ways within Translation Studies. Against the backdrop of these different uses, this book looks at the voices of translators, authors, publishers, editors and readers both in the translations themselves and in the texts that surround these translations. The various authors go on a hunt for translational agents' voice imprints in a variety of textual and contextual material, such as literary and non-literary translations, book reviews, newspaper articles, academic texts and e-mails. While all stick to the principle of studying text and context together, the different contributions also demonstrate how specific textual and contextual circumstances require adapted methodological solutions, ending up in a collection that takes steps in a joint direction but that is at the same time complex and pluralistic. The book is intended for scholars and students of Translation Studies, Comparative Literature, and other disciplines within Language and Literature.

On Translation Di JIN, Eugene Albert NIDA, 2006-03-01 Following the theoretical framework Nida had developed over decades of work on translation and semiotics, the two authors offer an easily comprehensible analysis of the complex problems involved in translation. After a critical review of the historical development of translation theory in the light of modern information theory, they elucidate the most fundamental principles of translation in accordance with the concept of dynamic equivalence. The treatment is closely related to actual translation practice, and the principles elucidated are applicable to all types of translation, though most of the examples analyzed are taken from translations between Chinese and English. This new and expanded edition has two main parts.

Part I is the complete text of the original work as published in the early 1980s. Part II consists of six of Professor Jin's more recent essays, which provide further insights into the principle of equivalent effect and its applications in literary translation. Particular attention is paid to practical procedures and the extremely complex relationship between creative translation and real fidelity. Published by City University of Hong Kong Press. 城市大學出版社

Translating Cultures Abraham Rosman, Paula G. Rubel, 2020-06-15 The task of the anthropologist is to take ideas, concepts and beliefs from one culture and translate them into first another language, and then into the language of anthropology. This process is both fascinating and complex. Not only does it raise questions about the limitations of language, but it also challenges the ability of the anthropologist to communicate culture accurately. In recent years, postmodern theories have tended to call into question the legitimacy of translation altogether. This book acknowledges the problems involved, but shows definitively that 'translating cultures' can successfully be achieved. The way we talk, write, read and interpret are all part of a translation process. Many of us are not aware of translation in our everyday lives, but for those living outside their native culture, surrounded by cultural difference, the ability to translate experiences and thoughts becomes a major issue. Drawing on case studies and theories from a wide range of disciplines -including anthropology, philosophy, linguistics, art history, folk theory, and religious studies - this book systematically interrogates the meaning, complexities and importance of translation in anthropology and answers a wide range of provocative questions, such as: - Can we unravel the true meaning of the Christian doctrine of trinity when there have been so many translations? - What impact do colonial and postcolonial power structures have on our understanding of other cultures? - How can we use art as a means of transgressing the limitations of linguistic translation? **Translating Cultures: Perspectives on Translation and Anthropology** is the first book fully to address translation in anthropology. It combines textual and ethnographic analysis to produce a benchmark publication that will be of great importance to anthropologists, philosophers, linguists, historians, and cultural theorists alike.

Translating Into Success Robert C. Sprung, Simone Jaroniec, 2000-05-15 The boom in international trade has brought with it an increased demand for addressing local consumers in their native language and cultural idiom. Given the complex nature and new media involved in communicating with their constituent markets, companies are developing ever more complex tools and techniques for managing foreign-language communication. This book presents select case studies that illustrate the state-of-the-art of language management. It covers a cross-section of sectors, each of which has particular subtleties in language management: • software localization • finance • medical devices • automotive The book also covers a cross-section of topical and strategic issues: • time-to-market (scheduling challenges; simultaneous release in multiple languages) • global terminology management • leveraging Internet, intranet, and email • centralized versus decentralized management models • financial and budgeting techniques • human factors; management issues unique to language projects • technological innovation in language management (terminology tools, automatic translation) The target audience is language professionals involved with the management aspect of language projects. This includes translators and linguists, managers at language-service providers, language managers at manufacturing/service companies, educators and language/translation students. The heart of the book is the concept of the case study, particularly the Harvard Business School case-study model. Industry leaders and analysts provide some 15 case studies covering the spectrum of language applications. Readable and nonacademic — it can serve both as a text for those studying language and translation, as well as those in the field who need to know the "state-of-the-art" in language management.

Becoming a Translator Douglas Robinson, 2004-03 Robinson reveals how to translate faster and more accurately, how to deal with problems and stress, and how the market works. This second edition has been revised throughout, and includes an exploration of new technologies used by translators.

The Art of Translating Prose Burton Raffel, 1994 Burton Raffel considers and effectively illustrates the fundamental features of prose, those features that most clearly and idiomatically define

an author's style. He addresses those features that must be attended closely and imaginatively as one moves them from the original-language work.

Less Translated Languages Albert Branchadell, Lovell Margaret West, 2005 This is the first collection of articles devoted entirely to less translated languages, a term that brings together well-known, widely used languages such as Arabic or Chinese, and long-neglected minority languages with power as the key word at play. It starts with some views on English, the dominant language in Translation as elsewhere, considers the role of translation for minority languages both a source of inequality and a means to overcome it, takes a look at translation from less translated major languages and cultures, and ends up with a closer look at translation into Catalan, a paradigmatic case of less translated language, in a final section that includes a vindication of six prominent Catalan translators. Combining sound theoretical insight and accurate analysis of relevant case studies, the contributors to this collection make a convincing case for a more thorough examination of less translated languages within the field of Translation Studies.

Translation and Gender Luise Von Flotow, 2016-04-08 The last thirty years of intellectual and artistic creativity in the 20th century have been marked by gender issues. Translation practice, translation theory and translation criticism have also been powerfully affected by the focus on gender. As a result of feminist praxis and criticism and the simultaneous emphasis on culture in translation studies, translation has become an important site for the exploration of the cultural impact of gender and the gender-specific influence of culture. With the dismantling of 'universal' meaning and the struggle for women's visibility in feminist work, and with the interest in translation as a visible factor in cultural exchange, the linking of gender and translation has created fertile ground for explorations of influence in writing, rewriting and reading. Translation and Gender places recent work in translation against the background of the women's movement and its critique of 'patriarchal' language. It explains translation practices derived from experimental feminist writing, the development of openly interventionist translation strategies, the initiative to retranslate fundamental texts such as the Bible, translating as a way of recuperating writings 'lost' in patriarchy, and translation history as a means of focusing on women translators of the past.

A short guide to post-editing Jean Nitzke, Silvia Hansen-Schirra, Artificial intelligence is changing and will continue to change the world we live in. These changes are also influencing the translation market. Machine translation (MT) systems automatically transfer one language to another within seconds. However, MT systems are very often still not capable of producing perfect translations. To achieve high quality translations, the MT output first has to be corrected by a professional translator. This procedure is called post-editing (PE). PE has become an established task on the professional translation market. The aim of this text book is to provide basic knowledge about the most relevant topics in professional PE. The text book comprises ten chapters on both theoretical and practical aspects including topics like MT approaches and development, guidelines, integration into CAT tools, risks in PE, data security, practical decisions in the PE process, competences for PE, and new job profiles.

Translating the Middle Ages Dr Charles D Wright, Dr Karen L Fresco, 2013-01-28 Drawing on approaches from literary studies, history, linguistics, and art history, and ranging from Late Antiquity to the sixteenth century, this collection views 'translation' broadly as the adaptation and transmission of cultural inheritance. The essays explore translation in a variety of sources from manuscript to print culture and the creation of lexical databases. Several essays look at the practice of textual translation across languages, including the vernacularization of Latin literature in England, France, and Italy; the translation of Greek and Hebrew scientific terms into Arabic; and the use of Hebrew terms in anti-Jewish and anti-Muslim polemics. Other essays examine medieval translators' views and performance of translation, looking at Lydgate's translation of Greek myths through mental images rendered through rhetorical figures or at how printing transformed the rhetoric of intervernacular translation of chivalric romances. This collection also demonstrates translation as a key element in the construction of cultural and political identity in the *Fest des Romains* and Chester Whitsun Plays, and in the papacy's efforts to compete with Byzantium by controlling the translation of Greek writings.

How to Translate Nicolae Sfetcu, 2015-04-19 A guide for translators, about the translation theory, the translation process, interpreting, subtitling, internationalization and localization and computer-assisted translation. A special section is dedicated to the translator's education and associations. The guide includes, as annexes, several independent adaptations of the corresponding European Commission works, freely available via the EU Bookshop as PDF and via SetThings.com as EPUB, MOBI (Kindle) and PDF. For a "smart", sensible translation, you should forget not the knowledge acquired at school or university, but the corrective standards. Some people want a translation with the touch of the source version, while another people feel that in a successful version we should not be able to guess the original language. We have to realize that both people have right and wrong, and that their only fault is to present requirement as an absolute truth. Teachers agree at least on this principle: "If a sentence is ambiguous, the translation must also be". There is another critical, less easy to argue, based on an Italian phrase with particularly strong wording: "Traduttore, traditore". This critique argues that any translation will betray the author's language, spirit, style ... because of the choices on all sides. What to sacrifice, clarity or brevity, if the formula in the text is brief and effective, but impossible to translate into so few words with the exact meaning? One could understand this criticism that it encourages us to read "in the text." It seems obvious that it is impossible to follow this advice into practice.

The Manipulation of Literature (Routledge Revivals) Theo Hermans, 2014-08-07 First published in 1985, the essays in this edited collection offer a representative sample of the descriptive and systematic approach to the study of literary translation. The book is a reflection of the theoretical thinking and practical research carried out by an international group of scholars who share a common standpoint. They argue the need for a rigorous scientific approach to the phenomena of translation – one of the most significant branches of Comparative Literature – and regard it as essential to link the study of particular translated texts with a broader methodological position. Considering both broadly theoretical topics and particular cases and traditions, this volume will appeal to a wide range of students and scholars across disciplines.
