**Analysis of Social Aspects of Migrant Labourers Living with HIV/AIDS Using Fuzzy Theory and Neutrosophic Cognitive Maps** W. B. Vasantha Kandasamy,Florentin Smarandache,2004-01-01 HIV/AIDS is everyones business. Today is more an issue of society, than a matter of medicine In this bold attempt that searches for sociological solutions, the gripping real life stories of sixty migrant labourers living with HIV/AIDS in rural Tamil Nadu, India, have been documented. Their socio-psychological aspects have been analyzed using the latest fuzzy mathematical tools like Fuzzy Cognitive Maps, Bidirectional Associative Memories, and Fuzzy Relational Maps. Because of the need to represent the real world, Neutrosophy (the philosophy of neutralities) and its connected structure, Neutrosophic Cognitive Maps, have been employed for their unique ability to handle indeterminacy between concepts. Presented in a lucid manner, this book is an important contribution to HIV/AIDS literature.

Life Lessons from Gitaji on New Society BRIJ MOHAN,2021-03-26 Life Lessons from Gitaji on New Society deals with social life with special reference to Indian way of living in introspection and the future ahead to find ways to live in peace and harmony as its age old philosophy has pronounced. The detailed history, the origins of age-old philosophy of human classification for functioning of the society has been discussed to understand the fundamentals of Indian society since Vedic period. The purpose is to understand the age-old social values still imbibed in the contemporary Indian society, which has now undergone a sea of change due to changes in social, political and economic conditions. The purpose of writing this book is to understand the undercurrent of present day's social values so messed up in historical texts and contemporary social, political and economic conditions. The result of such phenomenon are visible through untouchability, casteism and communalism, which have cropped up due to misinterpretation of purity and hygiene (chuachut - untouchability), class system (varnashram) and equality of all religion (sarv dharm sambhaav). Besides these, the Indian society has undergone the world's biggest migration and massacre during partition of the country on religious lines. The scar of that violence has created an atmosphere of hatred and mistrust amongst Hindus and Muslims, two vital constituents of Indian society, which would require a great amount of time and efforts to heal. We find that Indian society faces challenges that are unfolding in present times and Gitaji's wisdom is most relevant to guide the society towards a futuristic environment with its holistic approach. We should ponder upon the challenges unfolding before the young generation and how to cope up with those and to build up a new society free from the malice of casteism, communalism and indisciplined democracy with our rich heritage and wisdom of Vedic scriptures in general and specifically the wisdom of Gitaji.

**Encounters Across Difference** Natalia Bloch,2021-05-07 In Encounters across Difference, Natalia Bloch examines tourism encounters in the informal sector in India and their potential to empower subaltern communities. Drawing from ethnographic evidence in Hampi and Dharamshala, Bloch explores the potential of tourism to promote political engagement, volunteering, sponsorship, local entrepreneurship, and women's empowerment. Contrary to the frequent criticism of tourism to the Global South as a colonial practice, Bloch argues that workers and small entrepreneurs in displaced communities see tourists as allies in their political struggles and, on a more individual level, as an opportunity to build better lives.

**Sustainable Approaches to Urban Transport** Dinesh Mohan,Geetam Tiwari,2019-07-02 As cities become increasingly congested, current transport patterns are unsustainable: heavy in energy use, high in economic and environmental cost, and exacerbating inequity between those who can access high-speed travel and those who cannot. Good urban planning develops human-scale cities and encourages modes such as bicycles, increased zones exclusive to pedestrians within cities, and changed fiscal policies to incentivize public over private transport. Equally, it requires good engineering design to manage road use. Sustainable Approaches to Urban Transport brings together contributions from leading international experts in urban planning, transport, and governance who suggest changes to make our cities more sustainable in the face of climate change. All professionals working in transport and engineering and planning students will find an overview of a broad field in this interdisciplinary collection of essays.
