Improvement in Butt-log Grade with Increase in Tree Size, for Six Hardwood Species George R. Trimble (Jr.), 1965 S2Work carried out by the Northeastern Forest Experiment Station in West Virginia in the past 12 years provides useful information about the relationships between tree d.b.h. and butt-log grade. The upper logs are not included in the relationships. Being smaller and containing more knots, these upper logs are generally of lower grade than the butt logs. Thus the average grade of all material in the sawlog portion of the tree is generally lower than the average grade of the butt log. In the West Virginia data, species differences in d.b.h.-grade relationship are readily apparent. This inherent tendency for species to have different proportions of the various grades in logs of the same size is a familiar phenomenon to grade-conscious foresters who work with hardwoods. The results in this paper provide a quantitative evaluation of this tendency for six of the local species.S3.

Touch Sue Hurwitz, 1996-12-15 Explains the sense of touch, including a discussion of the skin and nerve endings.

What Is Touch? Jennifer Boothroyd, 2017-08-01 Audisee® eBooks with Audio combine professional narration and text highlighting for an engaging read aloud experience! A furry dog. A scaly lizard. Your sense of touch lets you feel these things and more. But how does your sense of touch work? And how does it help you? Read this book to find out! Learn all about your five senses in the Your Amazing Senses series - part of the Lightning Bolt Books™ collection. With high-energy designs, exciting photos, and fun text, Lightning Bolt Books™ bring nonfiction topics to life!

Hands Are for Holding: The Sense of Touch Katherine Hengel, 2012-01-01 This title introduces young readers to the sense of touch. Engaging photos show kids using their hands in relation to real world experiences like holding hands and reading Braille. Simple sentences make this title fun for kids to read and understand the what, how, when and why of one of the five senses. Fun facts, a comprehension quiz and a glossary are also included. Aligned to Common Core Standards and correlated to state standards. Sandcastle is an imprint of Abdo Publishing, a division of ABDO.

Computer Science Logo Style: Symbolic computing Brian Harvey, 1997 This series is for people--adults and teenagers--who are interested in computer programming because it's fun. The three volumes use the Logo programming language as the vehicle for an exploration of computer science from the perspective of symbolic computation and artificial intelligence. Logo is a dialect of Lisp, a language used in the most advanced research projects in computer science, especially in artificial intelligence. Throughout the series, functional programming techniques (including higher order functions and recursion) are emphasized, but traditional sequential programming is also used when appropriate. In the second edition, the first two volumes have been rearranged so that illustrative case studies appear with the techniques they demonstrate. Volume 1 includes a new chapter about higher order functions, and the recursion chapters have been reorganized for greater clarity. Volume 2 includes a new tutorial chapter about macros, an exclusive capability of Berkeley Logo, and two new projects. Throughout the series, the larger program examples have been rewritten for greater readability by more extensive use of data abstraction. Volume 1 Symbolic Computing, is addressed to a reader who has used computers and wants to learn the ideas behind

them. Symbolic computing is the manipulation of words and sentences, in contrast both to the graphics most people associate with Logo and to the numerical computation with which more traditional languages such as Pascal and C++ are most comfortable. This volume is well known for its clear and thorough presentation of recursion, a key idea in computer science that other texts treat as arcane and difficult. The Logo programs in these books and the author's free Berkeley Logo interpreter are available via the Internet or on diskette.

Sense of Touch Carey Molter, 2010-09 Introduction to touch for early readers.

Lo que toco / What I Touch Alex Appleby, 2014-08-01 Touch is one of the earliest senses we develop. It's easy to understand: just reach out and grab it! Beginning readers are given an opportunity to explore a world of textures in this book presented in standard Latin American Spanish and English. From rough surfaces like sand to smooth cloths and silks, the contrast between sensations makes for a learning experience at every turn. Full-color photographs provide strong picture-text correlation to enhance comprehension of this basic science concept.

Guide to Trees Introduced into Southern Africa Hugh Glen, 2016-08-01 Southern Africa is home to more than 2,000 introduced (not indigenous) trees. These non-native species are encountered daily and form a familiar part of our urban landscapes, growing successfully in parks, gardens, along road sides, and in other open spaces. This guide features nearly 600 of the most common and familiar of these and, using the same model of identification as *FG Trees of Southern Africa*, facilitates ID based on leaf and stem features. The book provides the country of origin for each species and offers key information on cultivation and uses. Each entry is supported by colour images that depict key features, and a shaded map that shows the plant's

cold tolerance (where the species can grow). An essential guide for landscapers and gardeners as well as tree enthusiasts who will struggle to find these trees in their guide to indigenous trees.

Field Guide to Trees of Southern Africa Braam van Wyk, 2013-08-06 This comprehensively updated and expanded edition of the region's best-selling field guide to trees offers much, much more than the highly successful first edition. Fully updated text (including additional species entries) and distribution maps, numerous new photographs and a new 87-page section of full-tree photographs makes this well-loved guide even more indispensable in the field. Southern Africa has a rich variety of tree species, with an estimated 2 100 indigenous species and more than 100 naturalised aliens. Field Guide to Trees of Southern Africa describes and illustrates more than 1 000 of these, focusing on trees that are the most common and most likely to be encountered. Species are logically arranged in 43 groups based on easy-to-observe leaf and stem features, and each account is illustrated by full-colour photographs of the plant's diagnostic parts. The text also touches on the practical uses of the plants.

Nature in a Nutshell Elaine Egbert, 2003 These daily devotionals for kids are filled with amazing facts from the world of nature. The author shows how every dancing daffodil, sparkling star, and cuddly critter reveals something new and wonderful about the Creator.

Soft and Smooth, Rough and Bumpy Dana Meachen Rau, 2005 Discusses the sense of touch and how it affects the body.

Our Skin Can Touch Jodi Lyn Wheeler-Toppen, 2019-05-01 Touch is one of the five senses. Our hands let us feel. Simple, fun text teaches readers about the sense of touch and how the skin lets us feel. Quizzable

text is at an Accelerated Reader ATOS level of 1.0 or lower.
