Lebanon and Turkey Robert G. Rabil,2023 This comprehensive account of Lebanon-Turkey relations--grounded in layers of cultural, political, demographic, economic, and sectarian complexities--analyzes the dynamics that have shaped Lebanon since Ottoman rule. It underscores the lessons learned from this relationship, locating Lebanon-Turkey relations along a historical continuum.

**America and the Making of Modern Turkey** Ali Erken,2018-03-30 After the fall of the Ottoman Empire, Mustafa Kemal Atatürk's government encouraged substantial American investment in education and aid. It was argued that Turkey needed the technical skills and wealth offered by American education, and so a series of American schools was set up across the country to educate the Turkish youth. Here, Ali Erken, in the first study of its kind, argues that these organizations had a huge impact on political and economic thought in Turkey - acting as a form of 'soft power' for US national interests throughout the 20th Century. Robert College, originally a missionary school founded by US benefactors, has been responsible for educating two Turkish Prime Ministers, writers such as Orhan Pamuk and a huge number of influential economists, politicians and journalists. The end result of these American philanthropic efforts, Erken argues, was a consensus in the 1970s that the country must 'westernize'. This mindset, and the opposition viewpoint it engendered, has come to define political struggle in modern Turkey - torn between a capitalist 'modern' West and an Islamic 'Ottoman' East. The book also reveals how and why the Rockefeller and Ford foundations funneled large amounts of money into Turkey post-1945, and undertook activities in support of 'Western' candidates in Turkey as a bulwark against the Soviet Union. This is an essential contribution to the history of US-Turkish relations, and the influence of the West in Turkish political thought.

**American Interests and Policies in the Middle East, 1900-1939** John A. DeNovo,1963-11-29 American Interests and Policies in the Middle East, 1900-1939 was first published in 1963. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. Scholars concerned with the diplomatic history of the United States have largely neglected the subject of American relations with the Middle East during the four decades before World War I. With this study, Professor DeNovo fills the gap by describing and assessing the United States' cultural, economic, and diplomatic relations with Turkey, Persia, and the Arab East in that period. He traces, chronologically and topically, the activities of such American interest groups as Protestant missionaries, educators, philanthropists, archaeologists, businessmen, and technical advisers, as well as the official actions of their government. The account falls roughly into three chronological periods. The first section traces the interest groups through the pre-World War I years of political and cultural stirring in the Ottoman Empire and Persia. Special attention is given to the Chester Project for railroad development in Turkey. The second part deals with the upheavals accompanying World War I and the tasks of peacemaking from the Mudros armistice through the Lausanne settlement of 1923. The latter chapters detail the rise of the Turkish national movement, the deepening Persian and Arab nationalism, and the accommodation of American cultural and economic groups to these conditions. The author points out that before World War II began, Americans had acquired a significant interest in Middle Eastern oil and had become emotionally involved in the Arab-Zionist tension. In 1939 the United States was on the verge of a new phase in its Middle Eastern relations when that region would become more intimately linked to America's national security.

The British Experience In Iraq From 1914-1926: What Wisdom Can The United States Draw From Its Experience? Major Matthew W. Williams,2014-08-15 This thesis examines the British experience in Iraq from 1914-1926. Britain invaded Iraq to secure its oil interests and to protect its lines of communication to India. The British initially defeated Ottoman forces and captured the Basra vilayet (province) in December 1914. Although Basra's capture accomplished the objectives that Britain had sought to achieve at the outset of the campaign, it was followed by an ill-advised advance to Baghdad that culminated in defeat by the Ottomans at Kut-al-Amara in 1916. The British regrouped, however, and resumed the offensive, capturing Baghdad in 1917 and Mosul in 1918. After the war, Britain managed Iraq as a League of Nations Mandate from 1920-1932. The British installed Iraq's first ruler, King Feisal I in 1921 and helped demarcate its northern border with Turkey in 1926. This thesis explores the British military campaign in Iraq during World War I and its subsequent civil administration. The thesis will examine the actions Britain took during this time period and determine, what wisdom, if any, that the United States (US) can draw from these experiences in relation to its current efforts in Iraq. This study concludes that, if the US is going to accomplish its objectives in Iraq, it should base its future relationship with Iraq primarily by incentives and not coercion. Furthermore, any attempt by the US to simultaneously develop Iraq into an independent nation-state and maintain dominant, long-term influence will likely result in failure. Overall, if the US wants to accomplish its goals in Iraq, it should treat Iraq like an equal and strive to be the best friend it has never had.
