The impact of the Chilean law on food labelling on the food production sector Food and Agriculture Organization of the United Nations,2021-07-02
The worrying increase in overweight and obesity in the Region has led the countries to develop regulations and public policies to overcome this problem. Many of these aim to transform food environments to be healthier, improving access and influencing people's behavior, discouraging the purchase and consumption of unhealthy foods. In Chile, in 2016 a Law on Nutritional Composition of Foods and its advertising was implemented, which mandates the use of warning stamps HIGH IN on foods with high sugar, sodium, saturated fat or energy content, also prohibiting their sale in schools and advertising with a focus on children under 14 years of age. The food industry in Chile played a very active role during the discussion and implementation of the law, having as major concern the impact it could have on the productive sector. At the time of its implementation, it showed good compliance with the use of stamps, also responding with reformulation and development of new products, also adjusting its advertising and marketing campaigns. This document evaluates four aspects of the response of the food production sector in the implementation of the first phase of the Law: attitudes of the main actors of the food sector, food reformulation, use of stamps as a marketing strategy and impact on variables of the manufacturing sector and commercial. This information is an additional input to the discussion of the impact of the labeling laws that are being implemented in countries of the Region.

Chile Guillermo Perry,Danny M. Leipziger,1999-01-01 The Chilean model has been expostulated for some time in the Latin American and Caribbean region and elsewhere because it appeared that the country, despite terrible political and economic turmoil, embodied important lessons about economic management. Over the last 15 years, Chile has been the Latin American country with the most consistent and successful economic record. The success of Chile's economic reforms and the subsequent dramatic increase in real income are well known. To a large extent, Chile's positive fiscal outcomes

have been the result of sound policies as well as sound fiscal institutions. However, there is room for improvement in the education and health sectors, and the results for Chile in terms of equality of income are not positive. 'Chile: Recent Policy Lessons and Emerging Challenges' presents a series of papers analyzing different aspects of Chilean public policy, which cover economic and social policies as well as regulatory and governance issues. The book is broken down into three parts: The first part examines the contribution of macroeconomic policies to superior outcomes; the second part analyzes the many advances in the social sector and the remaining troublesome issues; and the third part evaluates regulatory reforms and the effects of privatization. Since no public policy model is static, further reforms are needed to maintain Chile's economic growth as well as to respond effectively to public demands. As Chile grapples with its pockets of poverty, the balance between social safety nets and the need for greater efficiency in labor markets, a rebalancing of regulatory powers, and other thorny issues, it will need to rely on its institutional experience in public policy and conflict resolution.

The Global Journalist in the 21st Century David H. Weaver, Lars Willnat, 2020-10-25 The Global Journalist in the 21st Century systematically assesses the demographics, education, socialization, professional attitudes and working conditions of journalists in various countries around the world. This book updates the original Global Journalist (1998) volume with new data, adding more than a dozen countries, and provides material on comparative research about journalists that will be useful to those interested in doing their own studies. The editors put together this collection working under the assumption that journalists' backgrounds, working conditions and ideas are related to what is reported (and how it is covered) in the various news media round the world, in spite of societal and organizational constraints, and that this news coverage matters in terms of world public opinion and policies. Outstanding features include: Coverage of 33 nations located around the globe, based on recent surveys conducted among representative samples of local journalists Comprehensive analyses by well-known media scholars from each country A section on comparative studies of journalists An appendix with a collection of survey questions used in various nations to question journalists As the most comprehensive and reliable source on journalists around the world, The Global Journalist will serve as the primary source for evaluating the state of journalism. As such, it promises to become a standard reference among journalism, media, and communication students and researchers around the world.
