TV (The Book) Alan Sepinwall, Matt Zoller Seitz, 2016-09-06 Is The Wire better than Breaking Bad? Is Cheers better than Seinfeld? What's the best high school show ever made? Why did Moonlighting really fall apart? Was the Arrested Development Netflix season brilliant or terrible? For twenty years-since they shared a TV column at Tony Soprano's hometown newspaper-critics Alan Sepinwall and Matt Zoller Seitz have been debating these questions and many more, but it all ultimately boils down to this: What's the greatest TV show ever? That debate reaches an epic conclusion in TV (THE BOOK). Sepinwall and Seitz have identified and ranked the 100 greatest scripted shows in American TV history. Using a complex, obsessively all-encompassing scoring system, they've created a Pantheon of top TV shows, each accompanied by essays delving into what made these shows great. From vintage classics like The Twilight Zone and I Love Lucy to modern masterpieces like Mad Men and Friday Night Lights, from huge hits like All in the Family and ER to short-lived favorites like Firefly and Freaks and Geeks, TV (THE BOOK) will bring the triumphs of the small screen together in one amazing compendium. Sepinwall and Seitz's argument has ended. Now it's time for yours to begin!

Digital Interactive TV and Metadata Arthur Lugmayr, Samuli Niiranen, Seppo Kalli, 2004-06-22 The book shows how digital-interactive television (digiTV) will affect the relation between the broadcaster and the consumer. Standardization processes, technological paradigms, and application development issues will be discussed. The emerging applications, innovations, and future concepts are described in detail. The triangle: content - end-user - technology will be conceptualized to create a vision and to overview provision of services that will be major innovative elements in the world of digital television. From the technical side, eXtensible Markup Language (XML)-based metadata standards are a major element in realizing new innovative concepts in the world of digital, interactive television. This book clearly shows by the introduction of applications and use-scenarios, which conceptual requirements and metadata models are applicable, which metadata subsets are applicable due to resource limitations, which metadata aspects are needed for nonlinear content viewing, etc. The book gives a broad and detailed both visionary and technical overview useful for graduates, engineers, and scientists; and last but not least decision-makers in the broadcasting industry.

Mobile TV: Customizing Content and Experience Aaron Marcus, Anxo Cereijo Roibás, Riccardo Sala, 2009-12-01 Developing usable, useful, and appealing solutions for the customer or user experience requires customization according to specific users' needs amidst frequently changing physical and social environments. Complex design problems like these require interdisciplinary perspectives that cover software functionality, human interaction and communication experiences, and perceived value. After defining and summarizing current research and development, this book focuses on Mobile TV experience in everyday life, innovative conceptual and participatory design methods, contextual analysis methods, social context for interactive multimedia systems, advanced interaction with mobile digital content, and future trends for the wide range of products and services that will be offered in the decade to come. The Editors have carefully balanced the theoretical and empirical approaches providing a valuable insight into principles and methods, as well as actionable guidelines and recommendations for all those interested in exploring how to achieve the core objectives of usability, usefulness, and social appeal of this new mobile-video technology. The book answers many questions, and raises some new ones that only future technology development and deployment in mobile human-computer interaction and communication can answer.

Slow TV Roel Puijk, 2021 Slow TV refers to a form of broadcasting long events for their entire duration, preferably in real time. Popularized by the Norwegian Broadcasting Corporation (NRK), the

form became a phenomenon in 2009 after NRK's broadcast of a seven-hour train ride between Bergen and Oslo. Since then, slow TV programming has gained traction outside of Norway on television stations around the world and via streaming services like Netflix. In this academic study, Roel Puijk combines quantitative and qualitative research methods to explore different aspects of the Norwegian slow TV phenomenon, from the programming's production and development to its viewing and ultimate reception. Puijk relates slow TV to media events and media tourism, discussing its effects on cultural and economic developments and its evolving relationship to local and national identity. The result is an illuminating interdisciplinary study of media innovation and its effects on contemporary culture.

Queer TV China Jamie J. Zhao, 2023-02-16 The 2010s have seen an explosion in popularity of Chinese television featuring same-sex intimacies, LGBTQ-identified celebrities, and explicitly homoerotic storylines even as state regulations on “vulgar” and “immoral” content grow more prominent. This emerging “queer TV China” culture has generated diverse, cyber, and transcultural queer fan communities. Yet these seemingly progressive televisual productions and practices are caught between multilayered sociocultural and political-economic forces and interests. Taking “queer” as a verb, an adjective, and a noun, this volume counters the Western-centric conception of homosexuality as the only way to understand nonnormative identities and same-sex desire in the Chinese and Sinophone worlds. It proposes an analytical framework of “queer/ing TV China” to explore the power of various TV genres and narratives, censorial practices, and fandoms in queer desire-voicing and subject formation within a largely heteropatriarchal society. Through examining nine cases contesting the ideals of gender, sexuality, Chineseness, and TV production and consumption, the book also reveals the generative, negotiative ways in which queerness works productively within and against mainstream, seemingly heterosexual-oriented, televisual industries and fan spaces. “This cornucopia of fresh and original essays opens our eyes to the burgeoning queer television culture thriving beneath official media crackdowns in China. As diverse as the phenomenon it analyses, *Queer TV China* is the spark that will ignite a prairie fire of future scholarship.” —Chris Berry, Professor of Film Studies, King’s College London “This timely volume explores the various possibilities and nuances of queerness in Chinese TV and fannish culture. Challenging the dichotomy of ‘positive’ and ‘negative’ representations of gender and sexual minorities, *Queer TV China* argues for a multilayered and queer-informed understanding of the production, consumption, censorship, and recreation of Chinese television today.” —Geng Song, Associate Professor and Director of Translation Program, University of Hong Kong

ABC Family to Freeform TV Emily L. Newman, Emily Witsell, 2018-02-16 Launched in 1977 by the Christian Broadcasting Service (originally associated with Pat Robertson), the ABC Family/Freeform network has gone through a number of changes in name and ownership. Over the past decade, the network--now owned by Disney--has redefined family programming for its targeted 14- to 34-year-old demographic, addressing topics like lesbian and gay parenting, postfeminism and changing perceptions of women, the issue of race in the U.S., and the status of disability in American culture. This collection of new essays examines the network from a variety of perspectives, with a focus on inclusive programming that has created a space for underrepresented communities like transgender youth, overweight teens, and the deaf.

Satiric TV in the Americas Paul Alonso, 2018-05-04 In a time of global infotainment, the crisis of modern journalism, the omnipresence of celebrity culture and reality TV, and the colonization of public discourse by media spectacle and entertainment, postmodern satiric media have emerged as prominent critical voices playing an unprecedented role at the heart of public debate. Indeed, satiric media has filled gaps left not only by traditional media but also by weak social institutions and discredited political elites. In *Satiric TV in the Americas*, Paul Alonso analyzes the most influential satiric TV shows in the Americas--focusing on shows in Argentina, Peru, Ecuador, Mexico, Chile and the United States--in order to understand their critical role in challenging the status quo, traditional journalism, and the prevalent local media culture. Alonso illuminates the phenomenon of satire as resistance and negotiation in public discourse, the role of entertainment media as a site where socio-political tensions are played out, and the changing notions of journalism in today's democratic societies. Introducing the notion of critical metatainment -- a transgressive, self-referential reaction to the process of tabloidization and the cult of celebrity in the media spectacle era -- *Satiric TV in the Americas* is the first book to map, contextualize, and analyze relevant cases to understand the relation between political information, social and cultural dissent, critical humor, and entertainment in the region. Evaluating contemporary satiric media as a consequence of the collapse of modernity and its arbitrary dichotomies, *Satiric TV in the Americas* also shows that, as satiric formats travel to a particular national context, they are appropriated in different ways and adapted to local circumstances, with distinct consequences.

A Transnational Study of Law and Justice on TV Peter Robson, Jennifer L Schulz, 2016-11-17 This collection examines law and justice on television in different countries around the world. It provides a benchmark for further study of the nature and extent of television coverage of justice in fictional, reality and documentary forms. It does this by drawing on empirical work from a range of scholars in different jurisdictions. Each chapter looks at the raw data of how much justice material viewers were able to access in the multi-channel world of 2014 looking at three phases: apprehension (police), adjudication (lawyers), and disposition (prison/punishment). All of the authors indicate how television developed in their countries. Some have extensive public service channels mixed with private media channels. Financing ranges from advertising to programme sponsorship to licensing arrangements. A few countries have mixtures of these. Each author also examines how TV justice has developed in their own particular jurisdiction. Readers will find interesting variations and thought-provoking similarities. There are a lot of television shows focussed on legal themes that are imported around the world. The authors analyse these as well. This book is a must-read for anyone interested in law, popular culture, TV, or justice and provides an important addition to the literature due to its grounding in empirical data.
