Heaven Is a Beautiful Place Genevieve C. Peterkin,2015-03-13 Born in 1928 in the small coastal town of Murrells Inlet, South Carolina, Genevieve "Sister" Peterkin grew up with World War II bombing practice in her front yard, deep-sea fishing expeditions, and youthful rambles through the lowcountry. She shared her bedroom with a famous ghost and an impatient older sister. But most of all she listened. She absorbed the tales of her talented

mother and her beloved friend, listened to the stories of the region's older residents, some of them former slaves, who were her friends, neighbors, and teachers. In this new edition she once again shares with readers her insider's knowledge of the lowcountry plantations, gardens, and beaches that today draw so many visitors. Beneath the humor, hauntings, and treasures of local history, she tells another, deeper story—one that deals with the struggle for racial equality in the South, with the sometimes painful adventures of marriage and parenthood, and with inner struggles for faith and acceptance. This edition includes a new foreword by coastal writer and researcher Lee G. Brockington and a new afterword by coauthor and lowcountry novelist William P. Baldwin.

The Online Safety Playbook Arun Soni, 2022-03-01

Children must learn several fundamental skills early in life to protect their safety. Before crossing the street, look both ways. Seatbelts must be worn at all times. Do not talk to strangers. Another item to add to the list is to be wary of hackers and cyber predators. Teachers and parents may teach students of all ages fundamental cybersecurity skills and encourage them to use digital hygiene daily. They can achieve it by including more online educational resources into their curricula and at the same time educating and updating themselves with cybersecurity skills. Children can be taught to automatically protect themselves against cyber threats, just as they do while crossing the street. Just ask yourself- Are we preparing our children for life in the digital age? Are we providing them with the required training and resources to deal with never-before-seen cyber threats? Is our educational system able to keep up with the rapid changes in our society, including technological advancements? The only problem with teaching Cybersecurity in schools and homes is that

educators/parents may not be entirely updated on the subject. Or may not feel confident enough to teach it due to a lack of knowledge. That is why there is assistance for students of all age groups, educators and parents.

A Therapist's Guide to EMDR: Tools and Techniques for Successful Treatment Laurel Parnell, 2010-02-17 A Therapist's Guide to EMDR reviews the theoretical basis for EMDR and presents new information on the neurobiology of trauma. It provides a detailed explanation of the procedural steps along with helpful suggestions and modifications. Areas essential to successful utilization of EMDR are emphasized. These include: case conceptualization; preparation for EMDR trauma processing,

including resource development and installation; target development; methods for unblocking blocked processing, including the creative use of interweaves; and session closure. Case examples are used throughout to illustrate concepts. The emphasis in this book is on clinical usefulness, not research. This book goes into the therapy room with clinicians who actually use EMDR, and shows readers how to do it in practice, not just in theory. In short, this is the new, practical book on EMDR.
