A10 Thunderbolt II Ken Neubeck, 2019-06-03 The Fairchild Republic A-10 Thunderbolt II, commonly nicknamed the Warthog due to its unusual and ungainly appearance, became the most effective close-air-support aircraft that has ever served for the US Air Force and Air National Guard. Designed around the GAU-8/A Avenger autocannon, the aircraft was a highly effective tank killer during Operation Desert Storm. The Warthog continues to serve, from its first appearance in 1976 through subsequent wars up to the present time, and well into the future. This concise, illustrated book covers the construction, development, and combat history of this unusual aircraft and features superb detail and combat photography. Part of the Legends of Warfare series.

A-10s Over Kosovo Phil M. Haun, Christopher E. Haave, Air University Press, 2011 First published in 2003. The NATO-led Operation Allied Force was fought in 1999 to stop Serb atrocities against ethnic Albanians in Kosovo. This war, as noted by the distinguished military historian John Keegan, marked a real turning point . . . and proved that a war can be won by airpower alone. Colonels Haave and Haun have organized firsthand accounts of some of the people who provided that airpower—the members of the 40th Expeditionary Operations Group. Their descriptions—a new wingman's first combat sortie, a support officer's view of a fighter squadron relocation during combat, and a Sandy's leadership in finding and rescuing a downed F-117 pilot—provide the reader with a legitimate insight into an air war at the tactical level and the airpower that helped convince the Serbian president, Slobodan Milosevic, to capitulate.

M1 Abrams at War Michael Green, 2005 The impact of the M1 tank cannot be overstated; while applying lessons learned from mistakes of the past, this new tank defined tanks and armored warfare for the foreseeable future. It redefined how the U.S. Army thought, planned, trained, and fought. The M1 carried the army into an order-of-magnitude change that ran the gamut of ground warfare. The speed that the army moved across the battlefield was increased, the methods used to supply this faster-moving force were redefined and mastered, the methods used to provide supporting fire from artillery and close-air-support aircraft were redefined and mastered, and the decision-making process used by the leadership at virtually all levels was accelerated. For the first time in history, the U.S. Army had the best tank in the world. The M1 Abrams became the yardstick for foreign countries potential enemies, and friends alike, to measure the capabilities of their own tanks . . . the M1 embodied what arguably may be the ultimate balance of the three classic tank design criteria - firepower, mobility, and protection--Introduction.

Defending Air Bases in an Age of Insurgency Shannon Caudill, Air University Press, 2014-08 This anthology discusses the converging operational issues of air base defense and counterinsurgency. It explores the diverse challenges associated with defending air assets and joint personnel in a counterinsurgency environment. The authors are primarily Air Force officers from security forces, intelligence, and the office of special investigations, but works are included from a US Air Force pilot and a Canadian air force officer. The authors examine lessons from Vietnam, Iraq, Afghanistan, and other conflicts as they relate to securing air bases and sustaining air operations in a high-threat counterinsurgency environment. The essays review the capabilities, doctrine, tactics, and training needed in base defense operations and recommend ways in which to build a strong, synchronized ground defense partnership with joint and combined forces. The authors offer recommendations on the development of combat leaders with the depth of knowledge, tactical and operational skill sets, and counterinsurgency mind set necessary to be effective in the modern asymmetric battlefield.

M1 Abrams Tank Henry Wilson, 2015-10-30 The M1 Abrams has proved itself to be the finest main battle tank in the World since its introduction into US Army service in 1981. It combines the ultimate balance between firepower, mobility and protection as demonstrated by its superior performance during the two Gulf Wars and in Afghanistan. It routed the Soviet equipment of Saddam Hussein's army and today remains the yardstick by which friends' and foes' MBTs are judged. Its versatility and continual modernisation of weaponry armour and engineering guarantees that the M1 Abrams will remain the US Army's spearpoint for years to come. Expert author Michael Green has produced a comprehensive collection of images and highly informed text.

Airborne Warfare James Maurice Gavin, 2020-04-13 To every member of the 82nd Airborne Division who dropped as part of the American paratroop landings during World War Two, they breathed a little easier knowing their commander Jumpin' Jim Gavin would be jumping with them. General Gavin's paratroops drop-landed and fought in Sicily, Normandy on D-Day and during the abortive attempt to capture the Rhine bridges during Operation Market-Garden. He shared the risks of all his men parachuting into enemy territory, often only armed with his GI issue rifle. His memoirs are an outstanding addition to the literature of the Airborne in World War II.

The Modern Hog Guide Jake Melampy, 2007-01-01 The A-10 has been around for over thirty years, but books detailing the jet's intricacies have been few and far between. Following on from The Modern Viper Guide from the same author, The Modern Hog Guide explores the A-10 in all its glory, from the Desert Storm era, pre-LASTE A-10A, right up through the modern glass cockpit A-10C, all in beautiful, full-color photos.

Coercion, Survival, and War Phil Haun, 2015-07-01 In asymmetric interstate conflicts, great powers have the capability to coerce weak states by threatening their survival—but not vice versa. It is therefore the great power that decides whether to escalate a conflict into a crisis by adopting a coercive strategy. In practice, however, the coercive strategies of the U.S. have frequently failed. In *Coercion, Survival and War* Phil Haun chronicles 30 asymmetric interstate crises involving the US from 1918 to 2003. The U.S. chose coercive strategies in 23 of these cases, but coercion failed half of the time: most often because the more powerful U.S. made demands that threatened the very survival of the weak state, causing it to resist as long as it had the means to do so. It is an unfortunate paradox Haun notes that, where the U.S. may prefer brute force to coercion, these power asymmetries may well lead it to first attempt coercive strategies that are expected to fail in order to justify the war it

desires. He concludes that, when coercion is preferred to brute force there are clear limits as to what can be demanded. In such cases, he suggests, U.S. policymakers can improve the chances of success by matching appropriate threats to demands, by including other great powers in the coercive process, and by reducing a weak state leader's reputational costs by giving him or her face-saving options.

Flight Artworks Gary Eason, 2015-09-18 Collected in book form for the first time – and also available as an ebook – are some of Gary Eason's acclaimed Flight Artworks: carefully researched and crafted photorealistic pictures of historical air combat. This first volume presents images of WWII scenes, selected from artworks created since 2011. From my point of view as a pilot for the last 43 years and an RAF fighter pilot for 30 years, the realism he captures is uncanny - Squadron Leader Clive Rowley MBE RAF (Retd) Third edition, September 2015

First Platoon Annie Jacobsen, 2021-01-12 A powerful story of war in our time, of love of country, the experience of tragedy, and a platoon at the center of it all. This is a story that starts off close and goes very big. The initial part of the story might sound familiar at first: it is about a platoon of mostly nineteen-year-old boys sent to Afghanistan, and an experience that ends abruptly in catastrophe. Their part of the story folds into the next: inexorably linked to those soldiers and never comprehensively reported before is the U.S. Department of Defense's quest to build the world's most powerful biometrics database, with the ability to identify, monitor, catalog, and police people all over the world. First Platoon is an American saga that illuminates a transformation of society made possible by this new technology. Part war story, part legal drama, it is about identity in the age of identification. About humanity—physical bravery, trauma, PTSD, a yearning to do right and good—in the age of biometrics, which reduce people to iris scans, fingerprint scans, voice patterning, detection by odor, gait, and more. And about the power of point of view in a burgeoning surveillance state. Based on hundreds of formerly classified documents, FOIA requests, and exclusive interviews, First Platoon is an investigative exposé by a master chronicler of government secrets. First Platoon reveals a post-9/11 Pentagon whose identification machines have grown more capable than the humans who must make sense of them. A Pentagon so powerful it can cover up its own internal mistakes in pursuit of endless wars. And a people at its mercy, in its last moments before a fundamental change so complete it might be impossible to take back.

War Hawgs Don Logan, 2006 Don Logan's all-new pictorial book is intended as both a complementary and supplementary volume to his first A-10 book (see page 20). This book bridges the gap between 1997, when his first A-10 book was published, and summer 2006 with 550 current action A-10 photographs and updated Squadron information, including the effect of Base Realignment and Closure (BRAC) 2006 on A-10 units. All twelve continental U.S. bases operating A-10s are covered, as well as A-10s on the Nellis AFB range complex, Bollen Range at Fort Indiantown Gap near Harrisburg Pennsylvania, Razorback Range at Fort Chaffee near Fort Smith Arkansas, and Claiborne Range at Fort Polk near Alexandria, Louisiana. The three bases outside the forty-eight contiguous United States bases - Eielson AFB in Alaska, Spangdahlem AB in Germany, and Osan AB in South Korea - are also represented.
