**If I Were an Astronaut** Eric Braun,2010 Discusses activities astronauts do while they're in space.

*Give Me Some Space!* Philip Bunting,2021-05-04 One girl's mission to find life in space leads to an out-of-this-world adventure perfect for the astronaut-in-training in your life. Una loves imagining a life in space. Life on Earth is just so-so. But how will she get there? Can she complete her mission to discover life in space? Oh! And did she remember to feed her goldfish? From award-winning creator Philip Bunting, *Give Me Some Space* is a delightful story that expertly merges nonfiction facts with imaginative play. Readers will love blasting off with Una, and learning along the way!

**Fighting for Space** Amy Shira Teitel,2020-02-18 Spaceflight historian Amy Shira Teitel tells the riveting story of the female pilots who each dreamed of being the first American woman in space. When the space age dawned in the late 1950s, Jackie Cochran held more propeller and jet flying records than any pilot of the twentieth century—man or woman. She had led the Women's Auxiliary Service Pilots during the Second World War, was the first woman to break the sound barrier, ran her own luxury cosmetics company, and counted multiple presidents among her personal friends. She was more qualified than any woman in the world to make the leap from atmosphere to orbit. Yet it was Jerrie Cobb, twenty-five years Jackie's junior and a record-holding pilot in her own right, who finagled her way into taking the same medical tests as the Mercury astronauts. The prospect of flying in space quickly became her obsession. While the American and international media spun the shocking story of a woman astronaut program, Jackie and Jerrie struggled to gain control of the narrative, each hoping to turn the rumored program into their own ideal reality—an issue that ultimately went all the way to Congress. This dual biography of audacious trailblazers Jackie Cochran

and Jerrie Cobb presents these fascinating and fearless women in all their glory and grit, using their stories as guides through the shifting social, political, and technical landscape of the time.

*Breaking the Chains of Gravity* Amy Shira Teitel, 2015-10-22 The incredible story of spaceflight before the establishment of NASA. NASA's history is a familiar story, one that typically peaks with Neil Armstrong taking his small step on the Moon in 1969. But America's space agency wasn't created in a vacuum. It was assembled from pre-existing parts, drawing together some of the best minds the non-Soviet world had to offer. In the 1930s, rockets were all the rage in Germany, the focus both of scientists hoping to fly into space and of the German armed forces, looking to circumvent the restrictions of the Treaty of Versailles. One of the key figures in this period was Wernher von Braun, an engineer who designed the rockets that became the devastating V-2. As the war came to its chaotic conclusion, von Braun escaped from the ruins of Nazi Germany, and was taken to America where he began developing missiles for the US Army. Meanwhile, the US Air Force was looking ahead to a time when men would fly in space, and test pilots like Neil Armstrong were flying cutting-edge, rocket-powered aircraft in the thin upper atmosphere. *Breaking the Chains of Gravity* tells the story of America's nascent space program, its scientific advances, its personalities and the rivalries it caused between the various arms of the US military. At this point getting a man in space became a national imperative, leading to the creation of the National Aeronautics and Space Administration, otherwise known as NASA.

**Mousetronaut** Mark Kelly, 2012-10-09 A #1 New York Times bestseller “This little mouse may well inspire some big dreams.” —Kirkus Reviews “In this picture book based on the space shuttle Endeavor...Meteor is one of the smallest mice, but the most hardworking...the values of being small, useful, solving problems, and working hard—as opposed to being big and strong—will inspire young

readers.” —School Library Journal “Inspired by this real-life mouse, Kelly’s first children’s book tells the story of Meteor, a lightly anthropomorphized rodent who turns his tininess into an advantage when an important key gets stuck in a crack between two monitors...textured images and vivid portraits that make it absolutely clear that space travel is a larger-than-life adventure.” —Publishers Weekly A heartwarming picture book tale of the power of the small, from bestselling author and retired NASA astronaut Commander Mark Kelly. Astronaut Mark Kelly flew with “mice-tronauts” on his first spaceflight aboard space shuttle Endeavour in 2001. Mousetronaut tells the story of a small mouse that wants nothing more than to travel to outer space. The little mouse works as hard as the bigger mice to show readiness for the mission . . . and is chosen for the flight! While in space, the astronauts are busy with their mission when disaster strikes—and only the smallest member of the crew can save the day. With lively illustrations by award-winning artist C. F. Payne, Mousetronaut is a charming tale of perseverance, courage, and the importance of the small!

**This Book Isn't Safe** Colin Furze, 2017-09-12 Colin Furze, five-time Guinness World Record Holder and YouTube's undisputed king of crazy inventions, instructs fans and curious young inventors on how to build ten brand new wacky inventions at home with an affordable tool kit. Colin Furze's bonkers and brilliant inventions such as a homemade hoverbike, DIY Wolverine Claws, an alarm clock ejector bed, and Hoover shoes have earned him 4.5 million YouTube subscribers and more than 450 million video views. Now Colin is on a mission to inspire a new generation of budding inventors with **This Book Isn't Safe!** This Book Isn't Safe contains instructions on how to make ten brand new inventions with a basic at-home toolkit, alongside behind-the-scenes stories about some of Colin's greatest inventions and top secret tips and tricks straight from his invention bunker (aka a shed in his backyard in Stamford Lincolnshire).

**Time and Space in Video Games** Federico Alvarez Igarzábal,2019-09-30 Video games are temporal artifacts: They change with time as players interact with them in accordance with rules. In this study, Federico Alvarez Igarzábal investigates the formal aspects of video games that determine how these changes are produced and sequenced. Theories of time perception drawn from the cognitive sciences lay the groundwork for an in-depth analysis of these features, making for a comprehensive account of time in this novel medium. This book-length study dedicated to time perception and video games is an indispensable resource for game scholars and game developers alike. Its reader-friendly style makes it readily accessible to the interested layperson.

**My Best-Ever Pop-Up Space Book** ,2015-08-26 DK's My Best-Ever Pop-Up Space Book is the perfect introduction to space for your child. Find out about the sun, moon, stars, space travel, astronauts, planet earth and the other planets too! With dramatic pop-ups on every space, a fold-out solar system and a fun sound to count-down with, little ones will love learning all about space! The unique blend of photography, adorable illustrated robots and simple text, will both educate and entertain your child.

**Mission to Space** John Bennett Herrington,2016 Go on a Mission to Space with Chickasaw astronaut John Herrington, as he shares his flight on the space shuttle Endeavour and his thirteen-day mission to the international Space Station. Learn what it takes to train for space flight, see the tasks he completed in space, and join him on his spacewalk 220 miles above the earth.

*What's Out There?* Lynn Wilson,1993-03-24 What is the sun made of? What causes night and day? Why does the moon change shape? Colorful collage illustrations and an easy-to-understand text bring planets, stars, comets, and the wondrous things out there in space right down to earth in a simple introduction to the solar system for young armchair astronauts.

*Hey-Ho, to Mars We'll Go!* Susan Lendroth, 2018-02-06 Perfect for STEM and space storytimes, this musical mission to Mars will have young astronauts singing along as they learn the science of space travel. Explore the science behind a trip to Mars, from launch to landing on the Red Planet. Set to the tune of *The Farmer in the Dell*, this jaunty journey follows five adorable, bobble-headed astronauts as they learn how to bathe in zero gravity, grow veggies in space, and entertain themselves on the six-month trip. Even the design of the book defies gravity, as text and art float free on the page, encouraging readers to turn the book sideways and upside-down.

*The Real Space Cowboys* Ed Buckbee, Wally Schirra, 2005 In 1959, seven U.S. military fighter pilots were selected to train as America's first astronauts. Alan Shepard, Gordon Cooper, Gus Grissom, John Glenn, Scott Carpenter, Wally Schirra and Deke Slayton would become known as the Mercury Seven (M7). These men, who had jockeyed for the best flying jobs in the military, began competing for rides on rockets. Most would eventually vie for the ultimate ride to the moon. The author Ed Buckbee, who has enjoyed a 40+ year association with the U.S. manned space flight program, follows these brave men who pioneered the U.S. space program. Through time and personal friendships, he captures dreams of flying higher, faster and farther than any-one in the known universe. Readers are invited behind the scenes to witness the competition between chimpanzees and astronauts, and the conflict between NASA engineers designing capsules and those who would pilot them. Through this book, readers feel the collective will of a nation to defeat the Russians in an all-out space race via an American team of 400,000 engineers, technicians, astronauts and support personnel who performed as if the country were at war. The eras of Mercury, Gemini and Apollo-- these were times of nobility and humility, but also times of arrogance, tension, and from time-to-time, humour. Gotcha's were commonplace astronaut pranks and a dubious answer to the question, Are you a turtle? resulted in a

healthy bar tab. But what of our first space heroes after the Apollo program was completed? Accepting the call of Project Mercury meant a lifetime commitment. Their work continued with motivational programs for youth through the U.S. Space Camp programs, public programs at institutions such as the Smithsonian's National Air and Space Museum, the U.S. Space & Rocket Center, the U.S. Astronaut Hall of Fame, and others. The author himself shared the task of motivating the next generation through creation of U.S. Space Camp and the Astronaut Hall of Fame. Bonus DVD-10 with rare film footage: 1976 Interview with Wernher von Braun; 30th Anniversary Documentary on Skylab; Gotcha film about Alan Shepard; Space Camp Documentary - Reach For The Stars; 1997 Panel Discussion at Pensacola with Armstrong, Shepard, Lovell, Aldrin & Cernan; 2002 Panel Discussion at Pensacola with the Mercury Astronauts; Gotcha Documentary - The Lighthouse Never Fails; U.S. Space & Rocket Center Documentary - From the Valley to the Moon; Documentary - The Flight of Freedom 7; Mercury Astronauts Documentary - The First; Gotcha film of Apollo 12.

*The Shape of Space* Jeffrey R. Weeks, 2001-12-12 Maintaining the standard of excellence set by the previous edition, this textbook covers the basic geometry of two- and three-dimensional spaces. Written by a master expositor, leading researcher in the field, and MacArthur Fellow, it includes experiments to determine the true shape of the universe and contains illustrated examples and engaging exercises that teach mind-expanding ideas in an intuitive and informal way. Bridging the gap from geometry to the latest work in observational cosmology, the book illustrates the connection between geometry and the behavior of the physical universe and explains how radiation remaining from the big bang may reveal the actual shape of the universe.

Space Song Rocket Ride Sunny Scribens, 2018-09-01 Blast through the galaxy to our own solar system and explore the mysteries of space to a rocking beat. Packed with educational endnotes about

space exploration and more. A QR code on the book provides access to video animation and audio.

An Exploration of Space 1999 Through the Lens of Video Games: Payne 1999 John K. Balor, 2019-07-02 This book contains transcripts from Online Alpha discussions where the video game PAYNE 1999, game theory and game-study theories are used for analysing and commenting on problems of conflict and cooperation in SPACE 1999. The discussions build on more than a decade of conversations and debate about PAYNE 1999, and the aim of the book is to put the various threads together while also developing new ideas and providing direction for further investigations. The book has been developed on an idealistic basis, and it is sold at the lowest price the publisher was willing to accept. A free e-book version can be downloaded at [www.lulu.com](http://www.lulu.com).

*Sally Ride* Lynn Sherr, 2014 Sally Ride made history as the first American woman in space. A member of the first astronaut class to include women, she broke through a quarter-century of white male fighter jocks when NASA chose her for the seventh shuttle mission, cracking the celestial ceiling and inspiring several generations of women. After a second flight, Ride served on the panels investigating the Challenger explosion and the Columbia disintegration that killed all aboard. In both instances she faulted NASA's rush to meet mission deadlines and its organizational failures. She cofounded a company promoting science and education for children, especially girls.

**Me and My Place in Space** Joan Sweeney, 2018-09-18 Where am I in the solar system? A beloved bestseller, now refreshed with new art from Christine Gore, that will help children discover their place in the Milky Way. Where is the earth? Where is the sun? Where are the stars? Now with new art by Christine Gore, here is an out-of-this world introduction to the universe for children. With Earth as a starting point, a young astronaut leads readers on a tour past each planet and on to the stars, answering simple questions about our solar system. In clear language, drawings, and diagrams,

space unfolds before a child's eyes. Colorful illustrations, filled with fun detail, give children a lot to look for on every page, and a glossary helps reinforce new words and concepts. A terrific teaching tool, *Me and My Place in Space* is an easy and enjoyable way to introduce the concept of space to budding astronomers.

*Space, Time, and Stuff* Frank Arntzenius, Cian Seán Dorr, 2012-01-19 Frank Arntzenius presents a series of radical ideas about the structure of space and time, and establishes a new metaphysical position which holds that the fundamental structure of the physical world is purely geometrical structure. He argues that we should broaden our conceptual horizons and accept that spaces other than spacetime may exist.

**Beyond Earth** Asif A. Siddiqi, 2018 This is a completely updated and revised version of a monograph published in 2002 by the NASA History Office under the original title *Deep Space Chronicle: A Chronology of Deep Space and Planetary Probes, 1958-2000*. This new edition not only adds all events in robotic deep space exploration after 2000 and up to the end of 2016, but it also completely corrects and updates all accounts of missions from 1958 to 2000--Provided by publisher.

*A Universe from Nothing* Lawrence Maxwell Krauss, 2013 This is a provocative account of the astounding new answers to the most basic philosophical question: Where did the universe come from and how will it end?
