Industrial Engineering in Apparel Manufacturing Dr. Prabir Jana, Dr. Manoj Tiwari ,2020-03-11 While there is pressure (from buyers), inclination (within self to do better) and a heightened aspiration among apparel manufacturers to use Industrial Engineering (IE) like other more industrialized sectors, there is no specific book as such dealing with IE in relation to apparel manufacturing. The existing books that are already written on IE possess academic rigour and generic functions applicable across industries, thus making it difficult for the practitioners to refer and clear discrete doubts related to apparel manufacturing. Undoubtedly, work study is the centrepiece of Industrial Engineering; however apart from work study, industrial engineers in apparel industry are also supposed to perform various other functions like preparing operation breakdown and operation flow chart, selecting machine type and attachment and workaids, planning machine layout for maximizing unidirectional material movement, optimising inventory and storage space and maintaining workplace health and safety. These are some of the areas that often lack significant attention. This practitioner's handbook is an amalgamation of theory and practices, including steps of implementation and common mistakes. A balanced approach is taken to make it equally meaningful and useful for the academics as well as the industry. A unique section titled "industry practices" is incorporated at the end of each chapter which shares the typical practices, constraints and benefits accrued by the industry, which will give meaningful insight to the readers and help them relate theory with actual practice.

Enhancing Professional Knowledge of Pre-Service Science Teacher Education by Self-Study Research Gayle A. Buck, Valarie L. Akerson, 2016-06-22 Self-study research is making an impact on the field of science education. University researchers employ these methods to improve their instruction, develop as instructors, and ultimately, impact their students' learning. This volume provides an introduction to self-study research in science education, followed by manuscripts of self-studies undertaken by university faculty and those becoming university faculty members in science teacher education. Chapter authors range from those new to the field to established researchers, highlighting the value of self-study research in science teacher education for every career rank. The fifteen self-studies provided in this book support and extend this contemporary work in science teacher education. They, and the subsequent reflections on professional knowledge, are organized into four sections: content courses for preservice teachers, elementary methods courses, secondary methods courses, and preparation of future teacher educators. Respondents from various locations around the globe share their reflections on these sections. A culminating reflection of the findings of these studies is provided at the end of the book that provides an overview of what we have learned from these chapters, as well as a reflection on the role of self-study research in the future of science teacher education.

Quality in Teacher Education and Professional Development John Chi-Kin Lee, Timo Ehmke, 2021-09-28 This book addresses the past and changing contexts of Chinese and German teacher education under the impact of globalization and echoes quality issues of teacher education. This edited book provides a comprehensive discussion on other

issues in the management and implementation of change in teacher education related to teacher education curricula for professional development of teachers. A combination of chapters provides an overview, a review of literature and research as well as offering examples of teacher education practice and updated empirical research on these topics co-edited by two senior scholars and written by experts from Mainland China (including Hong Kong) and Germany. The volume addresses key issues on teacher standards, ICT in education and e-learning in teacher education, STEM education, vocational teacher education, university-school partnership in teacher education and teaching Chinese or German as a second language. This is an up-to-date academic book to look at profound issues related to quality in teacher education and teachers' professional development in mainland China and Germany. It will be a useful reference for graduate students and researchers in the field of international and comparative education, teacher education and curriculum studies, teacher educators and practitioners to learn from trends, best practice and challenges that have been encountered in Mainland China and Germany.

Distance Education Keith Harry, Magnus John, Desmond Keegan, 1993 Essential reading for all involved in distance education, this book provides a comprehensive survey of the theory behind this special mode of teaching and learning, alongside international case studies of distance education in practice.

Distance Education: New Perspectives Keith Harry, Magnus John, Desmond Keegan, 2013-09-13 Although distance education has developed rapidly over the past decade, writing on the subject is still scattered over a diverse range of often inaccessible sources. This book brings together a selection of the best writing on distance education in recent years, and is an essential reference for all who work in the field.

Mobile Sensing in Psychology Matthias R. Mehl, Michael Eid, Cornelia Wrzus, Gabriella M. Harari, Ulrich W. Ebner-Priemer, 2023-12-18 The possibilities mobile sensing opens up for the social, behavioral, biomedical, and life sciences appear almost infinite and are bound to become even more comprehensive in the years to come. However, data collection with new information technology also poses new challenges for research and applied fields. Is everything that is possible also legally allowed? What are the personal and societal consequences of the possible deep insights into very private areas of life for research ethics and the relations between the researchers and those being researched? How can data be stored so that anonymity and privacy are preserved? How can quality criteria be formulated for this new and rapidly developing field of research? And how can we ensure that information and predictions derived from mobile sensing are psychometrically accurate and practically useful as we move from scientific proof-of-concept measurements to medical/clinical measurements that aim at supporting and improving the diagnostic process? This handbook answers these questions and based on the conviction that a profound understanding and the sound application of mobile sensing methods require specific knowledge and competencies: scientific background and the key concepts, how to generally plan and conduct a mobile sensing study, different methods of data collection with mobile sensing, both in terms of the technological know-how and the methodological how-to, and possibilities and limitations of mobile sensing and of best-practice examples from different areas of application--

Handbook of Early Childhood Education Robert C. Pianta, Susan M. Sheridan, 2015-08-12 Comprehensive and authoritative, this forward-thinking book reviews the breadth of current knowledge about early education and identifies important priorities for practice and policy. Robert C. Pianta and his associates bring together foremost experts to examine what works in promoting all children's school readiness and social-emotional development in preschool and the primary grades. Exemplary programs, instructional practices, and professional development initiatives?and the systems needed to put them into place?are described. The volume presents cutting-edge findings on the family and social context of early education and explores ways to strengthen collaboration between professionals and parents.

Professional Development of Officers Study: System-wide issues Charles W. Bagnal, 1985

Teacher Professional Learning through Lesson Study in Virtual and Hybrid Environments Rongjin Huang, Nina Helgevold, Jean Lang, Heng Jiang, 2023-08-18 Offering a rich, critical investigation of how technology can be used to strengthen and promote lesson study in both virtual and hybrid environments, this edited book presents insights into the numerous challenges as well as opportunities for supporting teachers' and teacher educators' professional learning in such a novel setting. Providing an international perspective, research in this book highlights on the one hand the necessity of exploring how the known theoretical perspectives and methodological approaches for researching on lesson study and effective characteristics of conducting lesson study can be adapted to the new environments. On the other hand, further analysis reveals the benefits of using various advanced technologies in lesson study, the new practice of professional development of teachers and teacher educators, and also documents related issues of conducting lesson study in such complex contexts. The chapters focus on online cross-cultural lesson study; the key aspects of conducting online lesson study and the effectiveness of it. Features of facilitation and the development of facilitators for online lesson study are explored, alongside the ways in which online lesson study can help address various problems of practice such as implementing equitable teaching, facilitating student interaction in virtual environments, and migration to remote teaching in STEM. This resourceful text provides needed support to both researchers and practitioners, from primary to higher education, with special attention to both teacher and student learning.

Handbook of Research on Diversity and Social Justice in Higher Education Keengwe, Jared, 2020-05-22 There is growing pressure on teachers and faculty to understand and adopt best practices to work with diverse races, cultures, and languages in modern classrooms. Establishing sound pedagogy is also critical given that racial, cultural, and linguistic integration has the potential to increase academic success for all learners. To that end, there is also a need for educators to prepare graduates who will better meet the needs of culturally diverse learners and help their learners to become successful global citizens. The Handbook of Research on Diversity and Social Justice in Higher Education is a cutting-edge research book that examines cross-cultural perspectives, challenges, and opportunities pertaining to advancing diversity and social justice in higher education. Furthermore, the book explores multiple concepts of building a bridge from a monocultural pedagogical framework to

cross-cultural knowledge through appropriate diversity education models as well as effective social justice practices. Highlighting a range of topics such as cultural taxation, intercultural engagement, and teacher preparation, this book is essential for teachers, faculty, academicians, researchers, administrators, policymakers, and students.

Health Professional as Educator Susan B. Bastable, Pamela Gramet, Karen Jacobs, Deborah Sopczyk, 2010-10-06 *Health Professional as Educator: Principles of Teaching and Learning* focuses on the role of the health professional as educator of patients/clients, staff, and students in the clinical arena and classroom settings. It covers key principles of teaching and learning in both scope and depth, providing information from research and practice on the educational process, the characteristics of the learner, and techniques and strategies of teaching and learning. This comprehensive text covers important topics including literacy; compliance and motivation; assessment of learning needs, learning styles, and readiness to learn; behavioral objectives; teaching methods; instructional materials; technology in education; gender, socioeconomic, and cultural influences on learning; and evaluation of teaching and learning. Case studies are provided in each chapter for application of the concepts, review questions at the end of each chapter assist the reader with review of the important material presented, and an instructor's manual provides numerous materials for presentation and testing of content. Unlike other textbooks on education, this text contains a comprehensive coverage of literacy in the adult client population, including guidelines on how to develop and/or critique printed education materials for effective patient/client teaching. It also includes a chapter on writing behavioral objectives and developing teaching plans and learning contracts. There are unique topics included in this text, such as the teaching and learning of motor skills, how to access motivation, the concept of the learning curve, the concept of the spacing effect (massed and distributive learning); gender, socioeconomic, and cultural attributes of the learner, working with a wide variety of diverse populations, and the ethics of student-teacher and client-teacher relationships. - Publisher.

The Last Lecture Randy Pausch, 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of

everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Technology, Curriculum, and Professional Development John Woodward, Larry Cuban, 2001 The 11 papers in this collection address various aspects of the adoption and implementation of technology in the education of students with disabilities. Opening Education Terry Evans, Daryl Nation, 2013-04-15 We live in a society with ever-changing needs and expectations. Education practitioners and policy makers need therefore to face the challenges of new economic, social and technological conditions in their work. There is a global concern to develop forms of education and training which are open to the demands of needs of learners, and which are accessible at times and places suitable to those learners. Governments, institutions and practitioners are developing and implementing policies which reflect these trends. The overall theme of this book is the relationship between government and organizational policies and the work of practitioners in open and distance learning. The book does this by exploring a selection of international examples. The authors, many of them recognized experts, write from a wide range of international and organizational perspectives. Each one draws on significant experience within his or her field. Terry Evans is Head of the Graduate School of Education at Deakin University. He was the foundation director of the Master of Distance Education course there and has extensive experience teaching undergraduate and postgraduate students. Daryl Nation is Deputy Head of the School of Humanities and Social Sciences at Monash University. He is Associate Professor in the School and divides his time between policy development, research and teaching.

The First 20 Hours Josh Kaufman, 2013-06-13 Forget the 10,000 hour rule— what if it's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don't have and effort you can't spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In *The First 20 Hours*, Josh Kaufman offers a systematic approach to rapid skill acquisition— how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, *The First 20 Hours* will help you pick up the basics of any skill in record time . . . and have more fun along the way.
