Strengthen Your Paintings with Dynamic Composition Frank Webb, 2015-01-27 Create compelling paintings by mastering compositional techniques While happy accidents may occasionally contribute to producing strong, eye-catching paintings, conscious painting is more important. According to author Frank Webb, Composition is more important than fact, technique, or subject. To create compelling, expressive works, you must make the composition the foundation of your plan. This book provides example-by-example demonstrations of how you can achieve this. The works of 24 professional artists included in this book give you

an over-the-shoulder look at how to apply composition techniques. Armed with this information, you can paint a powerful picture and--just as importantly--analyze and improve a work that has gone wrong. *Strengthen Your Paintings with Dynamic Composition* is an indispensable addition to the artist's library that you will read and re-read. Webb's memorable instruction will guide the beginner through composition challenges and serve as a reference for the more experienced painter. Frank Webb, a professional artist since 1947, is a Dolphin Fellow of the American Watercolor Society, which he has represented in international exhibitions in Canada, New York, England, Scotland, and Mexico City. A guest instructor in all 50 states, juror, and lecturer, Webb has received over 110 major medals and awards from national competitions, including six from the American Watercolor Society. Collectors of Webb's paintings include National Taiwan Arts Education Center, Baylor University, Palmer Museum of Art at Penn State University, Portland Museum of Art, and South Arkansas Arts Center, to name a few. Webb is featured in *Who's Who in American Art* and *Who's Who in the East*, and he is also a member of the Allied Artists of America, Audubon Artists, the Rocky Mountain National Watermedia Association, and many other art associations.

8 Steps to a Pain-Free Back Esther Gokhale, 2013-03-01 With a fresh approach to a common problem, this self-help guide to overcoming back pain advocates adopting the natural, healthy posture of athletes, young children, and people from traditional societies the world over. Arguing that most of what our culture has taught us about posture is misguided—even unhealthy—and exploring the current epidemic of back pain, many of the commonly cited reasons for the degeneration of spinal discs and the stress on muscles that leads to back pain are examined and debunked. The historical and anthropological roots of poor posture in Western cultures are studied as is the absence of back pain complaints in the cultures of Africa, Asia, South America, and rural Europe. Eight detailed chapters provide illustrated step-by-step

instructions for making simple, powerful changes to seated, standing, and sleeping positions. No special equipment or exercise is required, and effects are often immediate.

The Art of Eric Carle Eric Carle, 2021-03-09 Carle is one of the most beloved illustrators of children's books. This retrospective is more than just an appreciation of his art, however. The book also contains an insightful autobiography illustrated with personal photographs, an anecdotal essay by his longtime editor, a photographic essay on how Carle creates his collages, and writings by Carle and his colleagues. Still, it is the artwork in the oversize volume that seizes the imagination. More than 60 of his full-color collage pictures are handsomely reproduced and serve as a statement of Carle's impressive talent. - Booklist

Painting, Photography, and the Digital Carl Robinson, 2022-10-07 This anthology investigates the interconnections between painting, photography, and the digital in contemporary art practices. It brings together 15 contributors, including internationally acclaimed artists Matt Saunders, Clare Strand, Elias Wessel, and Dan Hays, to write about a diverse range

of art-making involving medium cross-over. Topics discussed here include reflections on the painted-on-photograph, reordering photographs into paintings, digital collage, printing digital landscapes onto recycled electronic media, viewer immersion in painted virtual reality (VR) worlds, photography created from paint, and the “truth” of the mediums. Underpinned by significant theoretical concepts, the volume provides unique insights into explorations of the mediums’ interconnectivity, which questions the position of the traditional genres. As such, this book is essential reading for practitioners, theorists, and students researching the nature of painting, photography, and digital art practices today.
