Deploying IPv6 in 3GPP Networks Jouni Korhonen, Teemu Savolainen, Jonne Soininen, 2013-04-01 Deploying IPv6 in 3GPP Networks – Evolving Mobile Broadband from 2G to LTE and Beyond A practical guide enabling mobile operators to deploy IPv6 with confidence The most widely used cellular mobile broadband network technology is based on the 3GPP standards. The history and background of the 3GPP technology is in the Global Mobile Service (GSM) technology and the work done in European Telecommunications Standards Institute (ETSI). This primary voice service network has evolved to be the dominant mobile Internet access technology. Deploying IPv6 in 3GPP Networks covers how Internet Protocol version 6 (IPv6) is currently defined in the industry standards for cellular mobile broadband, why and how this route was taken in the technology, and what is the current reality of the deployment. Furthermore, it offers the authors' views on how some possible IPv6 related advances 3GPP networks may be improved during the coming years. It gives guidance how to implement and deploy IPv6 correctly in the Third Generation Partnership Project (3GPP) mobile broadband environment, and what issues one may face when doing so. The book covers 3GPP technologies from 2G to LTE, and offers some ideas for the future. Key features written by highly respected and experienced authors from the IPv6 / mobile world Provides an explanation of the technical background for some not-so-obvious design choices, what to concentrate on, and what transition strategies should be used by the vendors and the operators Offers a useful reference guide for operators and vendors entering into IPv6 business

Broadband Services in Wales Great Britain: Parliament: House of Commons: Welsh Affairs Committee, 2012-09-17 In the Committee's report on broadband services it considers that the UK and Welsh Governments must work together and use all means available to bring broadband services in Wales up to speed with the rest of the UK, and eradicate broadband slow spots and notspots as a matter of urgency. Both Governments should consider promoting mobile and satellite technologies, particularly in remote areas of Wales in order to deliver this and not rely solely on rolling out fibre optic cabling. The availability of broadband has been consistently lower in Wales than the rest of the UK and although that gap has narrowed in recent years latest figures show the gap is widening again. The existence of notspots and slowspots has hindered existing businesses and deterred new businesses from choosing to locate to Wales - to the cost of the local economy. The Welsh Government's target is a commitment to provide all Welsh businesses with access to next-generation broadband by the middle of 2016. The Committee also says that both Governments must ensure that the roll-out of superfast broadband is not achieved at the expense of delivering a good broadband service for all. The Committee recommends that Ofcom undertake a study to evaluate whether

satellite broadband should be supported more vigorously in Wales; the delayed Spectrum auction, now planned for 2013, must ensure that 4G mobile services are available to at least 98% of people in Wales; and Ofcom must continue its efforts to open up access to infrastructure in Wales. BT's market power must be regulated effectively to ensure efficient operation of the market.

Merger Control Review Ilene Knable Gotts, 2017-09-20 The Merger Control Review, edited by Ilene Knable Gotts of Wachtell, Lipton, Rosen & Katz, provides an overview of the process in 38 jurisdictions, as well as a discussion of recent decisions, strategic considerations and likely upcoming developments in Merger Control. Given the ability of most competition agencies with pre-merger notification laws to delay, and even block, a transaction, it is imperative to take each jurisdiction - small or large, new or mature - seriously. It is, therefore, imperative that counsel for such a transaction develops a comprehensive plan prior to, or immediately upon, execution of an agreement concerning where and when to file notification with competition authorities regarding such a transaction. The intended readership of this book comprises both in-house and outside counsel who may be involved in the competition review of cross-border transactions. In our endeavour to keep our readers well informed, we have expanded the jurisdictions covered by this book to include the newer

regimes as well with several special chapters covering US, EU and Chinese Merger Control in Media and Pharmaceutical sectors. Contributors include: Susan Ning, King & Wood Mallesons; James Langenfeld, Navigant; Goenenc Guerkeynak, ELIG; Mr Jordan Ellison, Slaughter and May."Each country section provides an informative overview of recent and expected enforcement trends... A very useful book!" - Jean-Yves Art, Associate General Counsel, Microsoft, Belgium
